

# Oh poop.

## Stepping in dog doo really stinks.

There are more than 100,000 dogs living in Minneapolis creating more than 41,000 pounds of solid waste each day. Dog poop contains MILLIONS of e.coli bacteria and directly affects water quality in lakes, streams and the river when not disposed of properly. **Be responsible and do your part to help keep our water clean and safe.**

# Yuck.

**Do you realize where that abandoned dog poop ends up? I drink out of this lake.**
