

FARWELL PARK IMPROVEMENTS

Community Engagement Results Summary - Priority Projects

EVENTS/ENGAGEMENT

NRRC Meeting: July 12, 2021

Youth Design Team Site Visit: July 13th 2021

Open House #1 @ Farwell Park: July 20th 2021

Open House #2 @ Farwell Park: July 29th 2021

National Night Out @ Farwell Park: August 3rd 2021

Online Survey: Open July 13 to August 13 2021

Approximatly **115 people** both online and at open houses participated in the survey to help determine priority projects.

TOP COMMENTS -What We Heard

- New accessible surface to replace sand in playground
- Improve visibility and sightlines in park
- Minimize places to hide or do negative activities
- Safety improvements to the street surrounding the park
- Bike racks needed near the playground
- Splash pad or mister
- Playground improvements should be prioritized
- Park programing is needed for youth (winter programming)
- Restrooms or portable toilets
- Stage could provide a place for musicians to perform (especially in a Covid-19 enviroment)
- Stage should not be prioritized as it would not get a lot of regular use (Alternative could be more multi-use pavilion type space)
- Lots of un-supervised youth at park
- Increase naturalized areas with native plants

PROJECT PRIORITIES

1- first Priority 6- Last Priority

Improved Playground

New Site Amenities

Splash Pad

New Natural Areas

**New Park Building/
Kiosk**

New Stage

Funding available for the first phase of implementing the North Service Area Plan for Hall will accomidate some of the projects, but not all. For instance, the budget will not accomodate playground and splash pad both. Projects not implemented in phase 1 will be implemented in a future phase.

Minneapolis Park and Recreation Board Staff will consider these survey results along with budget, maintenance needs and consultant recomendations in determining scope of work for first phase of projects.

FARWELL PARK IMPROVEMENTS

Community Engagement

Above Left. Community attending open house at park. Above Right. Drawing by Youth Design Team member showing observations of potential park improvements at Farwell.

Above. The MPRB Youth Design Team consisting of Minneapolis youth helped with engagement for the project for several weeks during the summer of 2021. Right. Community engagement event during summer 2021.

FARWELL PARK IMPROVEMENTS

What site improvements should be built first?

Please rank what improvements should be prioritized & built first. 1 being first and 6 being last.

Place a numbered dot in the boxes provided below.

New Park Building/Kiosk

A small park building or kiosk near the play area could provide park program information, allow for park storage, and create a screened platform for a portable toilet.

Small Splash Pad

Near the play area and kiosk is a new splash pad, a small interactive water feature with just a few elements. This element fills a need in the area, where no water facilities are easily accessible. The facility could be user-activated, include a few plaza-mounted jets or a single overhead cascade. The picnic area would move slightly southward to accommodate this new feature.

Improved Playground

The existing playground while relatively functional does not meet ADA standards and is getting near to the end of its lifespan. A new playground would involve additional community input to design and plan what style and types of play features are included. Playground will be improved in their existing location.

Stage

A new, small, permanent performance stage occupies the southeastern corner of the park, where it can utilize the open lawn area for audience seating.

The design of this feature could reflect some of the historic elements of the neighborhood, like the stone columns at neighborhood entrances. It would include electrical service, but not built-in amplification. It would be geared for both programmed and impromptu performances, whether an organized local music festival, or just for youth practicing spoken word or rap to friends and family.

New Site Amenities

New walking paths flank all sides of the park, allowing neighbors to stroll a loop within the park, without crossing streets. This could also be a good feature for young park users learning to stroll or ride in a safe environment. Moving the picnic area could include upgrading picnic amenities and other site improvements could include new benches and a new bike rack.

New Natural Areas

Naturalized planting areas flank the park walks and provide pollinator habitat.
