Executive Summary

Landmark Environmental, LLC (Landmark) was retained by Hennepin County, the Minneapolis Park and Recreation Board (MPRB), and the Hennepin County Regional Railroad Authority (HCRRA) (collectively referred to as the "User"), to complete this Phase I Environmental Site Assessment (ESA) of property that supports community gardens and a regional bike and walking path located at 2845 Garfield Avenue South in Minneapolis, Hennepin County, Minnesota (Property). The Phase ESA is being conducted for the purposes of satisfying the U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule, as amended on December 15, 2022, to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. Additionally, this Phase I ESA was prepared in general conformance with the American Society for Testing and Materials (ASTM) Practice E 1527-21 (Practice) and User-specific requirements. The User intends to construct a bituminous paved trail on an existing gravel path and create a new trail connection to extend onto the Midtown Greenway connecting neighborhood streets.

The Property is currently owned by Minneapolis Park and Recreation Board (MPRB) and the Hennepin County Regional Railroad Authority (HCRRA) (collectively referred to as the "Property Owner") and used as a community garden and the Midtown Greenway bike and walking path, respectively. The general Property vicinity has been developed since at least the 2000s for current residential and commercial use.

The northern portion of the Property originally was developed as a grain elevator in 1886. The first portion of the elevator was situated on the west side of the Property and then expanded to cover most of the northern portion of the Property in the 1910s. Sometime in the mid-1980s the grain elevator structures were razed. By 1991, a community garden was established and has remained gardens until the present.

The Midtown Greenway originally was developed as a multi-track railroad prior to 1889 and remained a railroad until sometime between 2002 and 2004, when the railroad was removed and converted into a bike and pedestrian trail.

A regulatory records review for the Property was obtained from Environmental Data Resources, Inc. (EDR) on December 19, 2023. In addition, Landmark reviewed other publicly accessible databases including the Minnesota Pollution Control Agency's (MPCA's) What's in My Neighborhood (WIMN), Petroleum Remediation Program (PRP) Maps Online, and Minnesota Groundwater Contamination Atlas, as well as the

Minnesota Department of Agriculture's (MDA's) WIMN. The Property was identified in regulatory lists searched by EDR, including a Voluntary Investigation & Cleanup (VIC) and Minnesota Department of Agriculture (MDA) Incident Investigation sites. Details regarding these listings are included in Section 4.4. As discussed in Section 4.4, adjacent and potentially upgradient sites (sites within ¼ mile west of the Property with respect to anticipated groundwater flow to the east) identified in the regulatory searches **are** suspected to have the potential for impacting soil vapor or groundwater beneath the Property.

Recognized environmental conditions (RECs) indicate the presence or likely presence of any hazardous substances or petroleum products on the Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the Property or into ground, groundwater, or surface water of the Property. Historical recognized environmental conditions (HRECs) are defined as past releases that have been addressed to a degree allowing for unrestricted use of the Property. Controlled recognized environmental conditions (CRECs) are defined as past releases that have been addressed but allow contamination to remain in place subject to the implementation of required controls. A *de minimis* condition is related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action from appropriate governmental agencies. A business environmental risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Property. A significant data gap is a data gap or data failure that affects the ability to identify a REC at the Property.

Based upon the records review, Property reconnaissance, previous investigations, and interviews, the following known or suspect environmental conditions were identified for the Property:

Finding: Historic Property uses involving the use of petroleum compounds or hazardous substances, including a grain elevator and railroad.

Finding: Analytical sample results from previous investigations for the VIC listing indicating detected concentrations of diesel range organics (DRO) and polycyclic aromatic hydrocarbons (PAHs) as benzo(a)pyrene (BaP) equivalents in soil above applicable risk-based screening criteria.

Previous investigations identified DRO and PAHs as BaP equivalents impacted soil above regulatory criteria at the Property. Since the VIC listing was investigated to the satisfaction of the MPCA and issued closure, the VIC listing and historic uses **are**

considered a CREC with respect to soil. Groundwater and soil vapor sampling did not occur at the Property. However, since there are no occupied buildings on the Property and there are no plans to construct a building, the above findings are **not** considered a RECs, CRECs, or HRECs with respect to groundwater and soil vapor.

Finding: Historical uses of the west, south, and east-adjacent sites involving hazardous substances or petroleum products, including coal yards, lumber yard, manufacturers, and auto repair shops.

Finding: Potential impacts from adjacent and upgradient regulatory listed sites, including VIC and LUST sites.

Soil, groundwater, and soil vapor impacts were detected at the west-adjacent site and therefore, have the potential to impact groundwater and soil vapor at the Property. As stated, there are no occupied buildings on the Property with no plans for building construction, as such, the above findings are **not** considered RECs, CRECs, or HRECs for the Property.

This Phase I ESA has revealed the following CRECs in connection with the Property for the specified Property use of the User:

- Historic Property uses involving the use of petroleum compounds or hazardous substances, including a grain elevator and railroad.

- Analytical sample results from previous investigations for the VIC listing indicating detected concentrations of DRO and PAHs as BaP equivalents in soil above applicable risk-based screening criteria.

It should be noted that if the Property use changes to include an occupied building, these findings and conclusions should be reevaluated.

1.0 Introduction

Landmark Environmental, LLC (Landmark) completed a Phase I Environmental Site Assessment (ESA) on behalf of Hennepin County, the Minneapolis Park and Recreation Board (MPRB), and the Hennepin County Regional Railroad Authority (HCRRA) (collectively referred to as the "User") of community gardens and a regional bike and walking path located at 2845 Garfield Avenue South in Minneapolis, Hennepin County, Minnesota (Property). The Property location is shown on **Figure 1**. Landmark performed this Phase I ESA and prepared this Phase I ESA report (Report) in general conformance with the U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule, as amended on December 15, 2022, the American Society for Testing and Materials (ASTM) Practice E 1527-21 (the Practice), and User-specific requirements.

1.1 Purpose

Landmark was retained by the User to complete this Phase I ESA for the purposes of satisfying the AAI Final Rule requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. Landmark was also retained by the User to complete this Phase I ESA for the purposes of understanding potential environmental conditions that could materially impact the construction of new walking paths associated with the Property and understanding environmental conditions of the Property to aid in the decision-making processes relating to soil encountered during construction in accordance with the Practice and User-specific requirements.

1.2 Detailed Scope of Services

This Phase I ESA consisted of reviewing readily ascertainable and reasonably reviewable regulatory and land use information, as well as conducting a physical Property reconnaissance and Property representative and local government interviews. Records reviewed for preparation of this Phase I ESA are listed in Section 12.0. Photographs taken during the Property reconnaissance are included in **Appendix A**. Historical research and regulatory records are included in **Appendix B** and **C**, respectively. Additional Property information including User-provided information is included in **Appendix D**. Evaluation of available information was used to determine if evidence exists that indicates the release of hazardous substances, hazardous materials or petroleum products to the Property. Any deviations from the standards, guidelines, or

requirements presented in the AAI Final Rule, the Practice, and/or User-specific requirements are discussed below and/or in Sections 1.5 or 5.0 of this Report.

The following additional non-scope considerations was addressed as part of the Phase I ESA conducted at the Property and discussed in Section 7.0: per- and polyfluoroalkyl substances (PFAS).

The scope of the Phase I ESA did **not** involve the collection and analysis of any type of sample or survey with respect to the following: matters of structural engineering; compliance with environmental regulations; compliance with industrial hygiene and/or health and safety programs; asbestos-containing materials (ACM) or lead-based paint (LBP); presence of radon and/or radionuclides; lead in drinking water; presence of wetlands; presence of cultural, historic, and/or ecological resources and/or endangered species; quality of indoor air; biological agents; mold; potential for earthquakes and/or flooding; presence of high voltage powerlines; or regulatory compliance.

Landmark concurrently completed a Phase II Environmental Investigation at the Property under a separate cover.

1.3 Special Terms and Conditions

The purpose of the Report is to aid in the environmental assessment of the Property and not to evaluate the structural condition of the buildings or other features of the Property. Except as identified in Sections 1.4 and 1.5 below, no intentional deviations from the Practice were made in preparing the Report.

Landmark has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession under similar budget and time constraints. Landmark assumes responsibility for its own observations and statements made in this Report, along with its interpretation of the information gathered. No other warranty is made or intended.

Since Landmark was not retained to verify information, Landmark assumes no responsibility for the accuracy of information that it obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Property, and vendors of public data. To the extent that Landmark does not identify contamination or potential sources of contamination to the Property in the Report, Landmark's conclusions in the Report are not representations that the Property is free of contamination. Performance of the Practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental

conditions (RECs), controlled recognized environmental conditions (CRECs), or historical recognized environmental conditions (HRECs) in connection with the Property, recognizing reasonable limits on time and cost.

The Practice states that RECs indicate "*(1)* the presence of hazardous substances or petroleum products in, on, or at the Property due to a release to the environment; *(2)* the likely presence of hazardous substances or petroleum products in, on, or at the Property due to a release or likely release to the environment; or *(3)* the presence of hazardous substances or petroleum products in, on, or at the Property under conditions that pose a threat of a future release to the environment." CRECs are defined as past releases "that have been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations [AULs] or other property use limitations)." CRECs are considered RECs. HRECs are defined as "a previous release of hazardous substances or petroleum products affecting the Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Property to any controls (for example, AULs or other property use limitations)." A HREC is not considered a REC.

A *de minimis* condition is "related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." A *de minimis* condition is not considered to be a REC. A business environmental risk (BER) is "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Property, not necessarily related to those environmental issues required to be investigated as defined by the Practice." A BER is not considered to be a REC. A significant data gap is a data gap or data failure that affects the ability to identify a REC at the Property. A significant data gap may or may not be considered a REC.

Under no circumstances can Landmark represent or warrant that hazardous or toxic materials do not exist on the Property.

1.4 Significant Assumptions

Landmark assumes that the information provided by the User, regulatory database provider, and regulatory and public agencies is true and reliable.

No additional significant assumptions were made with respect to the Property.

1.5 Limitations and Deviations

The findings, opinions, and conclusions in this Report are subject to the following data limitations and deviations, which in turn, may result in a significant data gap that will affect the ability to identify an environmental condition at the Property:

- Historical documentation dated prior to 1889 was not readily ascertainable for the Property.

- The following areas of the Property were not accessible or not inspected during the Property reconnaissance:

    - The locked garden shed and roof were not accessed.
    - Vegetative stress could not be assessed due to the season.

Based on available information, these limitations and deviations do not represent significant data gaps and are not expected to impact the conclusions presented in this Report.

Historical documentation was reviewed for significant data gaps and none were identified. Significant data gaps in historical records are defined as 5 years or more during which the Property use changed and no historical records were available.

1.6 User Reliance

The Report was prepared for the exclusive use of User. As defined by the Practice, no others may rely on the Report without the User's and Landmark's written permission. Landmark owes no duties of care or otherwise to anyone other than the User and makes no warranties to anyone other than the User.

2.0 User-Provided Information

For preparation of this Report, the User provided (or contracted with Landmark to provide) the following information regarding the Property.

2.1 Reason for Performing Phase I

The User intends to construct a bituminous paved trail on an existing gravel path and create a new trail connection to extend onto the Midtown Greenway connecting neighborhood streets.

2.2 Title Records

A title records search was not provided by the User for incorporation in this Phase I ESA. The User did not contract with Landmark to provide a title records search as part of the scope for this Phase I ESA.

2.3 Environmental Liens or Activity and Use Limitations

The User indicated no knowledge of environmental liens or AULs for the Property.

2.4 Specialized Knowledge

Specialized information provided by the User regarding the environmental condition of the Property is included throughout the applicable sections of the Report.

2.5 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information available within or known throughout the local community that was provided by the User regarding the environmental condition of the Property is included throughout the applicable sections of the Report.

2.6 Valuation Reduction for Environmental Issues

The User did not report knowledge of a valuation reduction of the Property for environmental issues.

2.7 Owner, Property Manager, and Occupant Information

The User provided contact information for the following Property Owner representative: Ms. Colleen O'Dell, Minneapolis Park and Recreation Board. This representative was contacted regarding their knowledge of current and historic Property uses; no response was received by the writing of this Report.

2.8 Other Information—Such as Previous Assessments or Investigations

The User provided additional information for the Property. The User provided the following report:

- Peer Environmental & Engineering Resources, Inc. (PEER). May 3, 2001. *Phase II Investigation, Soo Line Community Gardens Site, Minneapolis, Minnesota*. (2001 Investigation)

Information from these documents is used throughout the pertinent sections of this Report. The report is summarized in Section 4.4.

3.0 Property Description

3.1 Location and Legal Description

The Property is located at 2845 Garfield Avenue South, Minneapolis, Hennepin County, Minnesota in the Southwest Quarter of Section 34 in Township 29 North, Range 24 West. The Property consists of one entire tax parcel and a portion of a second tax parcel. The Property Identification Numbers (PID) for the Property are as follows:

- 34-029-24-33-0005 (2845 Garfield Avenue South) "Garden"
- 34-029-24-33-0001 (portion of) "Midtown Greenway"

The Property location is shown on **Figure 1**. The Property layout with existing features is shown on **Figure 2**. For ease of discussion, the parcels are separately referred to as the "Garden" or "Midtown Greenway," as noted above; or jointly referred to as the Property.

3.2 Property and Vicinity General Characteristics

The Property is currently owned by Minneapolis Park and Recreation Board (MPRB) and the Hennepin County Regional Railroad Authority (HCRRA) (collectively referred to as the "Property Owner") and used as a community garden and the Midtown Greenway bike and walking path, respectively. The Property consists of 1.54 acres of land that currently is zoned as Urban Neighborhood.

The general Property vicinity has been developed since at least the 2000s for current residential and commercial use.

3.3 Current Use of the Property

As stated, current uses of the Property are a community garden and a bike and walking path. These uses are **not** likely to involve the use, treatment, storage, disposal, or generation of significant quantities of hazardous substances or petroleum products. Current Property features are shown on **Figure 2**.

3.4 Descriptions of Structures, Roads, Other Improvements

The Property supports one small garden shed that is approximately 235 square feet in size. The garden shed is situated in the north-central portion of the Property. The shed is not heated and is used for storage of garden tools. No other buildings are located on the

Property. A chain-link fence is located along the east and west sides of the garden. The Property is supplied with municipal water, sanitary sewer, and stormwater connections.

Garfield Avene is west-adjacent to the Property and Harriet Avenue is east-adjacent to the Property.

3.5 Current Uses of Adjoining Properties

The Property is adjacent to residential developments to the north and west (single-family homes to the north and mixed-use apartments to the west) and commercial developments to the south and east (self-storage facility to the east and beverage company, yoga studio, café, and fitness center to the south).

Current uses of adjacent sites are **not** likely to involve the use, treatment, storage, disposal, or generation of significant quantities of hazardous substances or petroleum products.

4.1 Physical Setting Sources

Surface elevations of the Property range from 855 to 878 feet above mean sea level. Surrounding properties are topographically level with the garden. The Midtown Greenway is at a lower elevation than surrounding properties by 20-30 feet. Approximately 200 to 250 feet of unconsolidated sediments consisting of outwash (sand, loamy sand, and sand; overlain by loess less than 4 feet thick) underlie the Property. The uppermost bedrock units consisting of quartz sandstone (St. Peter Sandstone) is present at an approximate depth of 200 to 250 feet beneath the Property.

Groundwater is anticipated to be present beneath the Property at an approximate depth of 25 to 45 feet based on surface elevations compared to published water-table elevations and nearby well records. The anticipated groundwater flow direction is east toward the Mississippi River, the nearest likely discharge zone. The nearest surface water body is Lake of the Isles located approximately 0.8 miles from the Property. The Property is supplied with municipal water.

4.2 Historical Use Information on the Property

The Garden parcel originally was developed as a grain elevator in 1886. The first portion of the elevator was situated on the west side of the Garden parcel and then expanded to cover most of the Garden parcel in the 1910s. By 1935, the elevator was operated by Archer Daniels Midland (ADM). ADM occupied the Garden parcel until the 1980s. Sometime in the mid-1980s the grain elevator structures were razed. By 1991, a community garden was established and has remained gardens until the present.

The Midtown Greenway originally was developed as a multi-track railroad prior to 1889 and remained a railroad until sometime between 2002 and 2004, when the railroad was removed and converted into a bike and pedestrian trail.

According to available records, an oil burner was present at the Garden parcel in 1935. Historic hazardous substances and/or petroleum products storage and handling practices at the Property are unknown. However, based on Landmark's experience, grain elevators have the potential to be impacted by hazardous substances and/or petroleum products.

Private wells or septic systems are not known to be present at the Property.

Given the Property's historic uses as a grain elevator and railroad, historical activities at the Property **did** likely involve the use of significant quantities of hazardous substances and/or petroleum products.

4.3 Historical Use Information on Adjoining Properties

The general Property vicinity originally was developed since the 1880s for residential use. Land use shifted to some commercial and industrial uses to the east and west starting in the 1910s and commercial uses to the south starting in the 1950s. Land use shifted back to residential use to the west in the 2000s. Some uses historically involved the use/storage of hazardous substances and/or petroleum products, as described below.

North

The north-adjacent properties supported residential use since 1900. No significant changes have occurred to the properties over time.

East

The east-adjacent property was originally developed for residential and commercial use by at least 1889. A coal and wood yard was apparent on the southern portion of the property from at least 1889 until sometime prior to 1912 when a feed mill and ice house were depicted on the property. By 1930, the southern half of the property was used as a machine shop/oil burner manufacturer, storage yard, and auto parking. Sometime in the 1960s, a metal working/roofing material manufacturer building was constructed on the southeast corner of the property. By 1978, the current building configuration was apparent on the Parcel. Various manufacturing and commercial occupants have occupied the property building. Currently, Extra Space Storage occupies the building.

South

The south-adjacent properties were originally developed for residential use by at least 1889. By 1890, a commercial manufacturing building was apparent on the northwest portion of the southwest property and by 1912, a coal yard occupied the southeast property. The commercial manufacturing building was no longer apparent by 1924. In 1950, a commercial building with an addresses of 2904 Harriet Avenue was constructed on the previous coal yard. Occupants of 2904 Harriet Avenue included a contractor's equipment storage, Field C.O. Co Warehouse, Ziems Carpet Work Room Inc (installation), Luhning Enterprises (architectural hardware), Ram Security Inc, Uptown Imports (auto repair), Minneapolis Asian Auto Repair/Minneapolis Volvo & Saab Repair, and Big Watt Cold Beverage Co.

Houses on the southwest property were razed sometime in 1979 and a commercial building was constructed. Sometime between 1979 and 1988 an addition was added to the south side of the original building. Occupants of this building included Artemis Leather (leather manufacturer), Boedeker Plumbing & Heating, Ventco Inc (plumbing & heating), A1 Appliance Installer, Associated HVAC, Norblom Plumbing, Balanced Properties, Uptown Hub (nutrition club), and MPLS Boxing Club.

West

The west-adjacent property was originally developed for residential use by at least 1889. By 1912, a portion of the west-adjacent property supported a lumber yard then transitioned to a plumbing & heating wholesaler by 1924. Beginning in 1949, the property was occupied by a roofing materials wholesaler. Other commercial occupants have included insulation company, brick warehouse, telephone company, coal company, boiler repair, chimney cleaning and vehicle maintenance. In 2007, the property was redeveloped as a multi-family apartment building. Environmental investigations were conducted on the property during redevelopment activities, see Section 4.4.

In summary, surrounding historic uses to the east, south, and west **did** have the potential to have used, stored, or managed significant quantities of hazardous substances and petroleum products.

4.4 Standard Environmental Record Sources

A regulatory records review for the Property was obtained from Environmental Data Resources, Inc. (EDR) on December 19, 2023. The regulatory report is in **Appendix C**. Where possible, duplicate database listings in the EDR report were removed from the following regulatory review and are not discussed further. In addition, Landmark reviewed other publicly accessible databases including the Minnesota Pollution Control Agency's (MPCA's) What's in My Neighborhood (WIMN), Petroleum Remediation Program (PRP) Maps Online, and Minnesota Groundwater Contamination Atlas, as well as the Minnesota Department of Agriculture's (MDA's) WIMN.

The Property **was** identified in regulatory lists searched by EDR and the MDA's WIMN.

- **Voluntary Investigation & Cleanup (VIC) (VP13690):** Identified as "Soo Line Gardens," the Property enrolled in the VIC program in October 2000 following an investigation that detected elevated levels of diesel range organics (DRO) and low levels of volatile organic compounds (VOCs) in soil. In April 1999, eight soil samples were collected from six hand augers. Samples were collected from a depth of 2 feet in four of the six borings; in the other two borings, soil samples

were collected at 6 inches and 3 or 3.5 feet and analyzed for DRO, VOCs, and MDA List 1 pesticides. Groundwater was not encountered. DRO concentrations ranged from 9.8 milligrams per kilogram (mg/kg) to 1,400 mg/kg. Low levels of VOCs related to petroleum were detected in one or more samples. All VOC detections were below regulatory criteria. No List 1 Pesticides were detected in any of the samples.

An additional investigation was conducted in 2001. Six composite samples and nine grab samples were collected from depths ranging from ground surface to 4 feet below ground surface (bgs). Samples were analyzed for selected metals (aluminum, arsenic, boron, cadmium, lead, magnesium, and mercury), VOCs, semi-volatile organic compounds (SVOCs), DRO, total cyanide, and pesticides including cyfluthrin, methoxychlor, and malathion. Results of VOCs, metals and pesticides reported results less than the MPCA residential soil reference values (RSRVs) or non-detect. DRO concentrations ranged from 15 to 140 mg/kg. Polycyclic aromatic hydrocarbons (PAHs) measured as benzo(a)pyrene (BaP) equivalents ranged from less than detection limits up to 16.2 mg/kg. The higher concentrations of DRO and BaP equivalents exceeding the MPCA Best Management Practices for Off-Site Use of Fill and the MPCA RSRVs were generally collected from 3 to 4 feet bgs. Based on the review of the investigation by the MPCA, it was determined that it was unlikely that the gardeners were exposed to any significant health risk from direct exposure and that gardening could continue at the Property based on a preliminary evaluation of the plant-uptake exposure pathway. The MPCA issued closure on November 24, 2001.

- **MDA Incident Investigation (CF-4978).** Identified on the MDA's WIMN as "Hennepin County Taxpayer Services," this listing is related to potential agricultural contamination from the former use as a grain elevator. Since no pesticides were detected as part of the investigations related to VP13690, the MDA did not require additional pesticide sampling and the listing was closed on November 12, 2004.

  The VIC listing **is** known to have impacted soil beneath the Property.

The EDR report provided a list of sites that were unable to be located due to poor address information (orphan summary). These listed orphan sites were reviewed and generally located. Those found to be located within applicable ASTM search distances are included in the tally below.

Sites identified within the search radii defined by the Practice are as follows (where possible, duplicate database listings in the EDR report were removed from the tally):

0	Federal National Priority List (NPL) site list (≤1.0 miles).
1	Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list (≤0.5 miles).
1	Federal CERCLIS No Further Remedial Action Planned (NFRAP) site list (≤0.5 miles)
0	Federal Resource Conservation and Recovery Act (RCRA) non-Corrective Action Sites (CORRACTS) Transfer, Storage, and Disposal (TSD) Facility (≤0.5 miles).
0	Federal RCRA CORRACTS list (≤1.0 miles).
6	Federal RCRA generators list (Property and adjoining properties).
0	Federal Emergency Response Notification System (ERNS) list (Property only).
8	State list of hazardous waste sites identified for investigation or remediation (NPL or CERCLA equivalent sites) (≤1.0 miles).
66/85	State Voluntary Investigation & Cleanup (VIC) Program/Petroleum Brownfield (PB) Program sites (≤0.5 miles).
0	State landfill and/or solid waste disposal site lists (≤0.5 miles).
53/7	State leaking underground storage tanks/leaking above-ground storage tanks (LUST/LAST) lists (≤0.5 miles).
1/1	State registered underground storage tanks/above-ground storage tanks (UST/AST) list (Property and adjoining properties).

Details for the above-listed adjacent or potentially upgradient sites (sites within ¼ mile west of the Property with respect to anticipated groundwater flow to the east) are as follows:

- Murals of Lynlake; 2833 Lyndale Avenue South; VIC, UST, and AST listings; located west-adjacent to the Property.
    - VIC (VP24010): This site enrolled in the VIC program in December 2007. An investigation conducted in 2006 detected limited amounts of contamination in the soil at the site with the only detection of DRO at a concentration of 18 mg/kg. An additional investigation conducted in 2007 identified groundwater contaminated with VOCs, mostly perchloroethylene (PCE) and trichloroethylene (TCE).

Another investigation conducted in 2008 included the installation of three monitoring wells and detected concentrations of PCE that ranged from 33 micrograms per liter (ug/L) to 94 ug/L and concentrations of TCE that ranged from 4.9 ug/L to 19 ug/L. It was determined that PCE and TCE in the groundwater was coming from an off-site source to the northwest. Three soil vapor samples were also collected in 2008. PCE was detected above regulatory criteria. As a result, a vapor mitigation system was installed in the newly constructed mixed-used building. The MPCA issued and Off-Site Source Determination on March 27, 2008, a Response Action Plan (RAP) Implementation Report Approval on December 1, 2008, and site closure on December 30, 2008.

  - UST/AST (TS0003201): Identified as "George F Cook Construction Co," this listing is associated with two removed USTs; one 6,000-gallon gasoline UST and one 8,000-gallon diesel UST. One active 350-gallon used oil AST is also associated with this listing.

This site **is** suspected to have the potential for impacting soil vapor and/or groundwater beneath the Property.

- Ventco Inc; 2905 Garfield Avenue; RCRA Very Small Quantity Generator (VSQG) listing; located southwest-adjacent to the Property. This listing is associated with the generation of unspecified waste. No violations have been reported. As such, this listing is not suspected to have an impact on the subsurface of the Property.

- Uptown Imports Inc.; 2904 Harriet Avenue South; AST, RCRA-VSQG, and EDR Historic Auto listings; located southeast-adjacent to the Property.
  - AST (TS0121927): This listing is associate with one active 250-gallon used oil AST. No releases have been reported from this AST.
  - RCRA-VSQG: This listing is associated with the generation of ignitable waste, lead, and benzene. One violation reported in 1993; corrective actions were completed and returned to compliance.
  - EDR Historic Auto: Although not included in the tally above, these listings could be considered significant according to Landmark's professional experience. According to EDR records, a dry cleaner occupied the Property from 1962 to 2014 under "Bloomington Cleaners."

This site is **not** suspected to have an impact on the subsurface of the Property.

- MPLS College of Art & Design-Whittier; 2845 Harriet Avenue South; RCRA-VSQG and RCRA Non-Generator (NonGen) listings; located east-adjacent to the Property.
    - RCRA-VSQG: Identified as "Mpls College of Art & Design - Whittier," at the address of 2845 Harriet Avenue, this listing is associated with handling/generating of ignitable waste. No violations were reported.
    - RCRA-VSQG: Identified as "Manley Cycle – Harriet Ave," at the address of 2845 Harriet Avenue, this listing is associated with handling/generating of spent halogenated solvents, including PCE, and TCE, and methylene chloride. No violations were reported.
    - RCRA-VSQG: Identified as "Gruppo Inc.," at the address of 2835 Harriet Avenue, this listing is associated with handling/generating of ignitable waste and PCE. No violations were reported.
    - RCRA-NonGen: Identified as "Minneapolis Enameling Grand," at the address of 2842 Grand Avenue South, this listing is associated with former handling/generating of chromium, lead, spent halogenated solvents, including PCE and TCE, spent nonhalogenated solvents. No violations were reported.

  This site is **not** suspected to have an impact on the subsurface of the Property.

- Multiple historical dry cleaners; EDR Historical Cleaners listings; upgradient from the Property. More than six dry cleaners were identified adjoining and upgradient from the Property in the EDR Report. Dry cleaners are known to use chlorinated solvents, which easily migrate if released to the subsurface. The multitude of historical dry cleaners in the vicinity of the Property **are** suspected to have the potential for impacting soil vapor and/or groundwater beneath the Property.

- Multiple VIC and LUST sites; adjoining and upgradient from the Property. At least fifteen regulatory sites are identified in the EDR report as adjoining or upgradient to the Property. The multitude of regulatory listings in the vicinity of the Property **are** suspected to have the potential for impacting soil vapor and/or groundwater beneath the Property.

In summary, the above-described adjacent and potentially upgradient sites (sites within ¼ mile west of the Property with respect to anticipated groundwater flow to the east) identified in the regulatory searches **are** suspected to have the potential for impacting soil vapor or groundwater beneath the Property.

4.5 Additional Environmental Record Sources

Previous environmental assessments and/or investigations were conducted at the Property or portions thereof. Copies of these investigation reports or report excerpts are in **Appendix C**. Previous investigations consisted of the following:

- *Limited Phase II Investigation, 2845 Garfield Avenue South, Minneapolis, Minnesota,* prepared by ThermoRetec Consulting Corporation for Hennepin County and dated June 1999. (1999 Investigation)

- *Phase II Investigation, Soo Line Community Gardens Site, Minneapolis, Minnesota,* prepared by Peer Environmental & Engineering Resources, Inc. for the Minneapolis Community Development Agency and Hennepin County and dated May 3, 2001. (2001 Investigation)

Results from the 1999 Investigation and the 2001 Investigation are presented in Section 4.4 under VP13690.

5.0 Property Reconnaissance

5.1 Methodology and Limiting Conditions

The Property reconnaissance was conducted by Tristin Faust, a representative of Landmark, on December 21, 2023. Existing Property features are shown on **Figure 2**; Property reconnaissance photographs are in **Appendix A**. Mr. Michael Torres (Hennepin County), the key Property representative was present during the Property reconnaissance.

Limiting conditions during the Property reconnaissance consisted of the following:

- The locked garden shed and the roof of the garden shed were not accessed during the Property reconnaissance.
- Vegetative stress could not be assessed due to the season.

5.2 General Site Setting

The Property is in an area of mixed residential and commercial land use. The periphery of the Property is characterized by commercial developments to the south and east and residential developments to the north and west. Access is unrestricted to pedestrian traffic; vehicular access to the Property is via Garfield Avenue to the west and Harriet Avenue to the east.

The following table summarizes the Property reconnaissance and interview findings. All items that currently are present at the Property are noted in the table. The table also notes whether or not the identified features are considered to be of potential environmental concern. Discussions of those that are considered to be of potential environmental concern are referenced. Features that were not identified to be present at the Property are not further discussed.

On-Site Features	Currently Present (Y/N)	Potential Environmental Condition (Y/N)	Report Section
Hazardous Substance/Petroleum Products	N	N	
USTs	N	N	
ASTs	N	N	
Odors	N	N	
Air Emissions (stacks, hoods, etc.)	N	N	
Pools of Liquid	N	N	
Drums	N	N	
Unlabeled Substance Containers	N	N	
Electrical Equipment/Possible PCBs	N	N	
Hydraulic Equipment/Possible PCBs	N	N	
Staining/Corrosion of Containers/Equip.	N	N	
Drains	N	N	
Sumps	N	N	
Pits, Pond, Lagoons	N	N	
Stained Soil or Pavement	N	N	
Surface Disposal/Debris	N	N	
Stressed Vegetation	NA	N	5.1
Evidence of Spills or Releases	N	N	
Indications of On-Site Fill Material	N	N

Fuel Pipelines	N	N	
Process Waste Water	N	N	
Wells	N	N	
Septic Systems	N	N	
Dry Cleaning Operations	N	N	
Agricultural Use	N	N	
Oil Gas Production/Exploration	N	N	
Railroad Uses	N	N	
Remedial Activities	N	N	

5.3 Exterior Observations

The exterior of the Property is mostly covered with community garden plots with a non-paved parking area and non-paved pathways.

The following were **not** observed to be present in outdoor areas at the Property: outdoor bulk chemical storage in the form of USTs, ASTs, or drums; transformers; electrical or hydraulic equipment; visible evidence of filling, excavation, or burned areas; pits, ponds, or lagoons; stained soil or pavement; indications of septic system or cesspool; pipelines; rail lines; liquid discharges into drains, ditches, or streams or onto adjacent property.

5.4 Interior Observations

There are no structures located on the Property, apart from a small garden shed used for storing gardening supplies for the tenants.

6.0 Interviews

6.1 Interview with Property Owner

Property Owner Representative
Name: Ms. Colleen O'Dell
Company Name: MPRB
Email: CODell@minneapolisparks.org

Landmark attempted to contact Ms. O'Dell regarding her knowledge of current and historic Property uses; no response was received by the writing of this Report.

6.2 Interview with Property Manager

None.

6.3 Interview with Occupants

Not applicable.

6.4 Interviews with Local Government Officials

Local government information was provided by Historical Information Gatherers (HIG). Relevant information is incorporated throughout this Report.

6.5 Interviews with Others

User Representative
Date of Interview: February 8, 2024
Name: Ms. Michael Torres
Company Name: Hennepin County
Years Familiar with Property: 2 years
Email: Michael.Torres@hennepin.us

Relevant information provided by Mr. Torres was used throughout the Report. He is aware of documented releases to the Property and environmental condition related to the Property and adjacent properties that are discussed in Section 4.4.

7.1 Per- and Polyfluoroalkyl Substances (PFAS)

Following guidance from the MPCA PFAS Monitoring Plan (Plan) issued March 2022, Landmark reviewed North American Industry Classification System (NAICS) codes at the Property and in the vicinity of the Property to identify industry facilities or sites likely to use, emit, or discharge PFAS. NAICS codes were provided by the EDR report. No NAICS codes were identified at the Property or at sites located within a ¼ mile of the Property related to PFAS use. As such, the potential for a release of PFAS to soil or groundwater at the Property is unlikely.

8.0 Findings

Based upon the records review, Property reconnaissance, interviews, and review of previous investigation data, the following known or suspect environmental conditions were identified for the Property:

- Historic Property uses involving the use of petroleum compounds or hazardous substances, including a grain elevator and railroad.

- Analytical sample results from previous investigations for the VIC listing indicating detected concentrations of DRO and PAHs as BaP equivalents in soil above applicable risk-based screening criteria.

- Historical uses of the west, south, and east-adjacent sites involving hazardous substances or petroleum products, including coal yards, lumber yard, manufacturers, and auto repair shops.

- Potential impacts from adjacent and upgradient regulatory listed sites, including VIC and LUST sites.

9.0 Opinions

This section of the Report provides Landmark's rationale for concluding whether the findings are or are not considered to constitute RECs, CRECs, or HRECs. Additionally, this section identifies BERs, de minimis conditions, and significant data gaps. As stated, RECs indicate the presence or likely presence of any hazardous substances or petroleum products on the Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the Property or into ground, groundwater, or surface water of the Property. CRECs are defined as past releases that have been addressed but allow contamination to remain in place subject to the implementation of required controls. HRECs are defined as past releases that have been addressed to a degree allowing for unrestricted use of the Property. A *de minimis* condition is related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action from appropriate governmental agencies. A BER is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Property. A significant data gap is a data gap or data failure that affects the ability to identify a REC at the Property.

Finding: Historic Property uses involving the use of petroleum compounds or hazardous substances, including a grain elevator and railroad.

Finding: Analytical sample results from previous investigations for the VIC listing indicating detected concentrations of DRO and PAHs as BaP equivalents in soil above applicable risk-based screening criteria.

Previous investigations identified DRO and PAHs as BaP equivalents impacted soil above regulatory criteria at the Property. Since the VIC listing was investigated to the satisfaction of the MPCA and issued closure, the VIC listing and historic uses **are** considered a CREC with respect to soil. Groundwater and soil vapor sampling did not occur at the Property. However, since there are no occupied buildings on the Property and there are no plans to construct a building, the above findings are **not** considered a RECs, CRECs, or HRECs with respect to groundwater and soil vapor.

Finding: Historical uses of the west, south, and east-adjacent sites involving hazardous substances or petroleum products, including coal yards, lumber yard, manufacturers, and auto repair shops.

Finding: Potential impacts from adjacent and upgradient regulatory listed sites, including VIC and LUST sites.

Soil, groundwater, and soil vapor impacts were detected at the west-adjacent site and therefore, have the potential to impact groundwater and soil vapor at the Property. As stated, there are no occupied buildings on the Property with no plans for building construction, as such, the above findings are **not** considered RECs, CRECs, or HRECs for the Property.

It should be noted that if the Property use changes to include an occupied building, these findings and conclusions should be reevaluated.

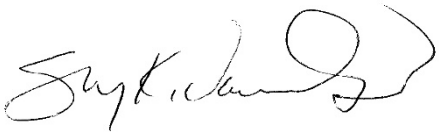
10.0 Conclusions

Landmark performed this Phase I ESA in December 2023 and January and February 2024 in general conformance with the EPA AAI Final Rule, the Practice, and User-specific requirements for the Property. Any exceptions to, or deletions from the EPA AAI Final Rule, the Practice, and User-specific requirements are described in Sections 1.5 and/or 5.0 of this Report.

This Phase I ESA has revealed the following CRECs in connection with the Property for the specified Property use of the User:

- Historic Property uses involving the use of petroleum compounds or hazardous substances, including a grain elevator and railroad.

- Analytical sample results from previous investigations for the VIC listing indicating detected concentrations of DRO and PAHs as BaP equivalents in soil above applicable risk-based screening criteria.



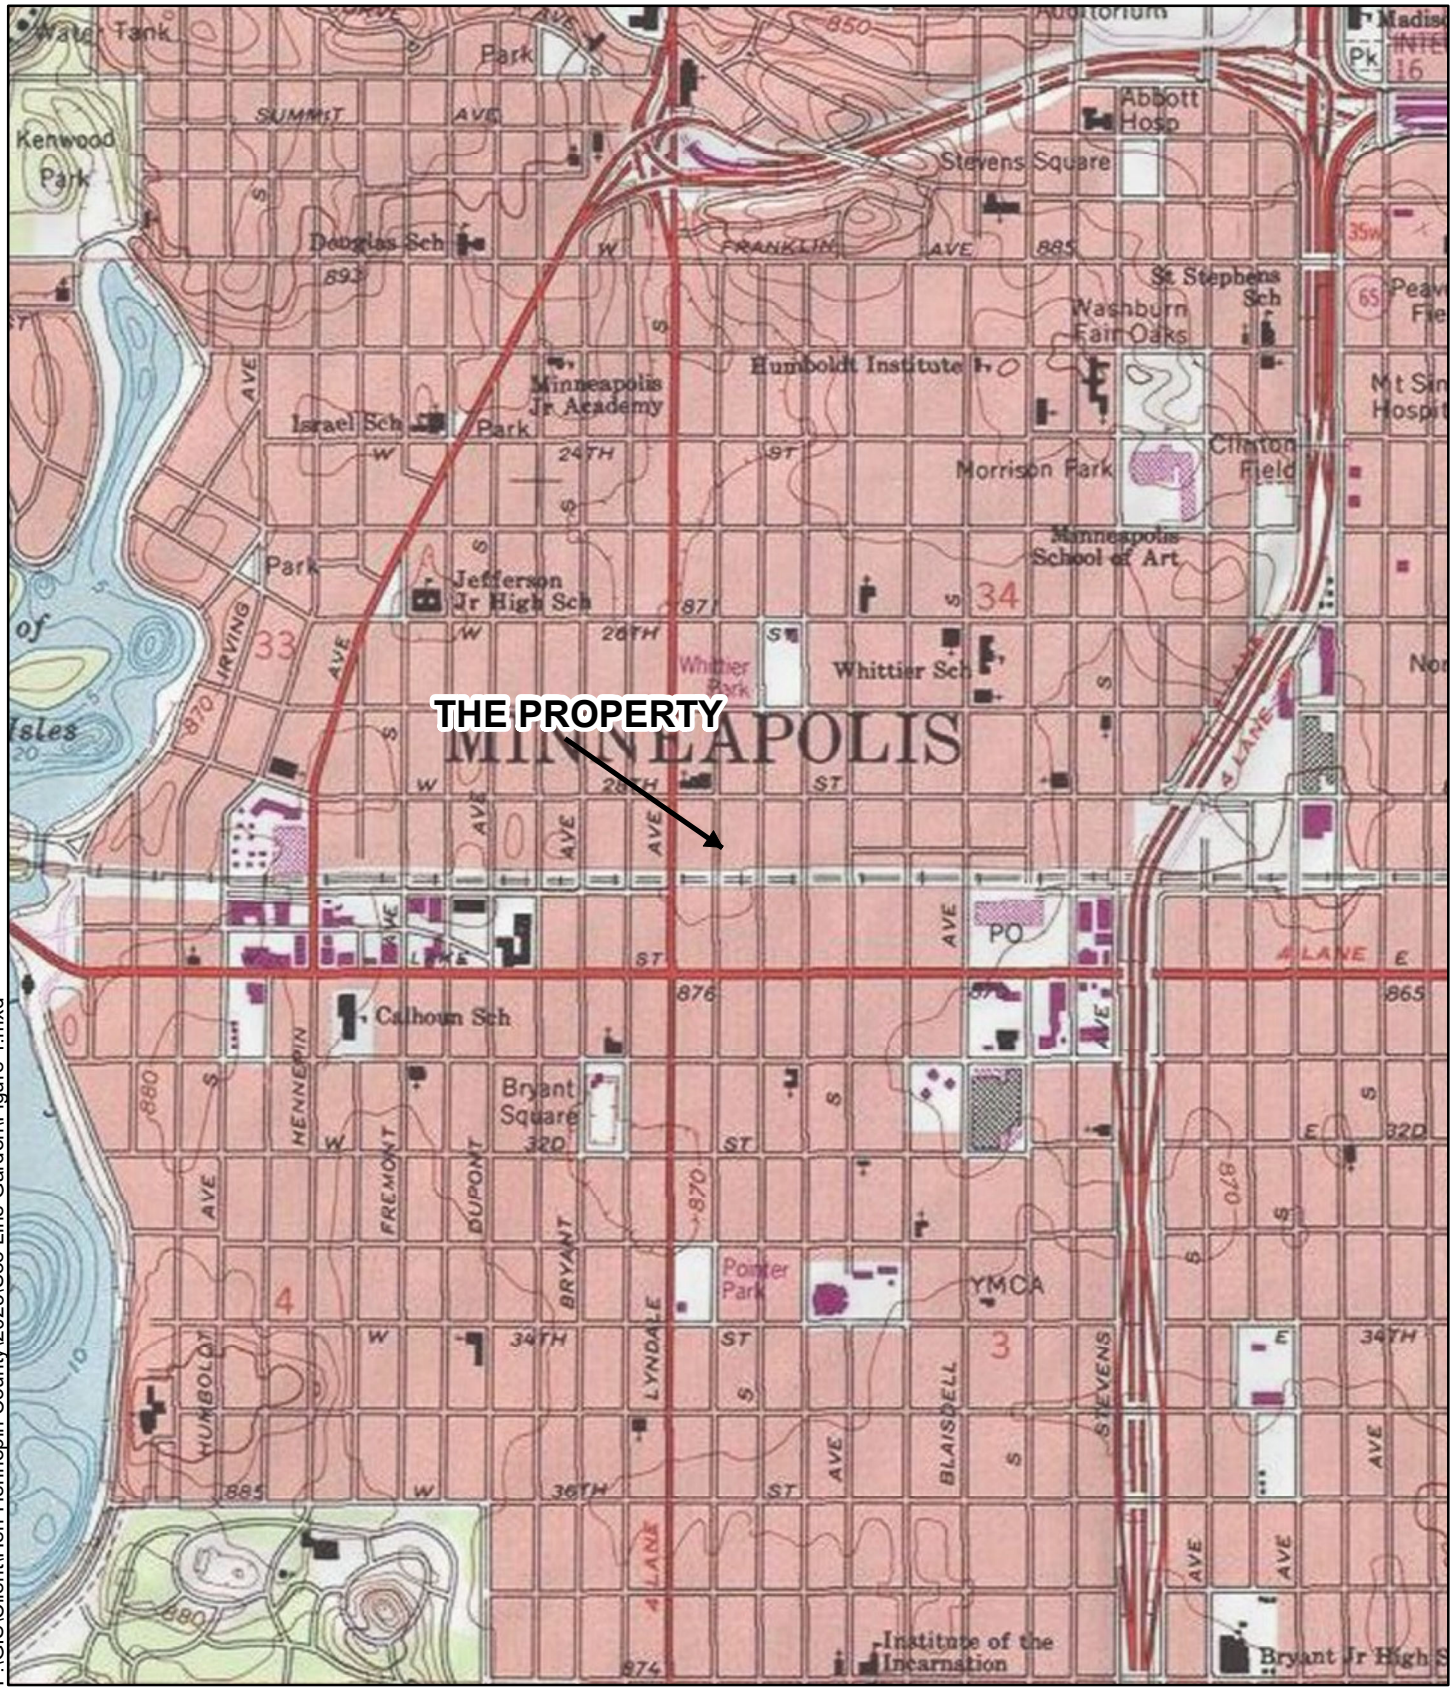
11.0 Statement and Signatures

Landmark performed this Phase I ESA in December 2023 and January and February 2024 in general conformance with the EPA AAI Final Rule, as amended on December 15, 2022, the ASTM Practice 1527-21, and User-specific requirements. Special terms, conditions, limitations and exceptions, and deviations that apply to this Phase I ESA are described in previous sections.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in 312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Nicole Bonde-Jones
Environmental Professional

Sherry Van Duyn
Environmental Professional



Landmark's experience and the environmental professional(s) and project team qualifications are included in **Appendix E**.

Certified Sanborn® Map Report

12/19/23

Site Name:

Soo Line Garden
2845 Garfield Ave S
Minneapolis, MN 55408
EDR Inquiry # 7524371.5

Client Name:

Landmark Environmental
9555 James Avenue South
Bloomington, MN 55431
Contact: Nicole Bonde-Jones

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Landmark Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Landmark Environmental (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Important notice

The special assessments listed above include unpaid fees and fines for code enforcement violations issued by Construction Code Services, Environmental Services, Housing and Fire Inspections, Lead and Healthy Homes, Sidewalk Inspections, and Zoning Enforcement. It also includes assessments for sidewalk repair.

It does not include any other assessments from the Department of Public Works, the Minneapolis Park and Recreation Board, or Hennepin County. This could include street construction and certain kinds of tree removal assessments.

Assessment information from the 2023 levy year and earlier reflect what was assessed (or paid or cancelled) at the end of each respective year. After the City of Minneapolis submits the levy to Hennepin County, any outstanding balance is owed to the county. You can contact Hennepin County Taxpayer Services at **612-348-3011** for the current balance (including interest) and to make payments.

For more information about special assessments, call **311** from within the city limits, or if outside Minneapolis, call **612-673-3000**. TTY/TDD users dial 612-673-2157. EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UPTOWN LAKE STREET C	INTERSECTION OF W. 2	W 1/8 - 1/4 (0.130 mi.)	M121	623

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly

known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 34 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

MN SHWS: The Superfund Site Information Listing records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Minnesota Pollution Control's Superfund Permanent List of Priorities.

A review of the MN SHWS list, as provided by EDR, and dated 08/25/2023 has revealed that there are 7 MN SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal brownfield sites

MN BROWNFIELDS: Purchasing, selling, or developing property can present a special set of obstacles if the property is contaminated with chemicals. The Petroleum Brownfields Program is one of several programs within the Minnesota Pollution Control Agency (MPCA) designed to help people address these obstacles. The purpose of the Petroleum Brownfields Program is to provide the technical assistance and liability assurance needed to expedite and facilitate the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum.

A review of the MN BROWNFIELDS list, as provided by EDR, and dated 08/25/2023 has revealed that there are 78 MN BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 08/15/2023 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
LAKE STREET HOUSING Cleanup Completion Date: -	510 WEST LAKE STREET	S 0 - 1/8 (0.111 mi.)	J89	484
LAKE STREET HOUSING Cleanup Completion Date: -	410 WEST LAKE STREET	SSE 0 - 1/8 (0.115 mi.)	J96	522
LYNDALE GREEN LEAF Cleanup Completion Date: -	2743 LYNDALE AVE S	NNW 0 - 1/8 (0.123 mi.)	I113	592

Local Lists of Hazardous waste / Contaminated Sites

MN SRS: The database contains site information for sites monitored by the Site Remediation Section.

A review of the MN SRS list, as provided by EDR, and dated 08/25/2023 has revealed that there are 131

EXECUTIVE SUMMARY

MN SRS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

MN VAPOR: A listing of sites with potential or identified vapor risk. Vapor intrusion occurs when chemical vapors migrate from a source of contamination through the soil into the basements or foundations of buildings. These chemical vapors can sometimes pose risks to human health.

A review of the MN VAPOR list, as provided by EDR, and dated 08/28/2023 has revealed that there are 49 MN VAPOR sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 25 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Waste Description: Lead

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Program Site Was Referred From:	Not reported
Program Interest:	VIC
Physical Location:	Located in Minneapolis on the east side of Lyndale Avenue and one block north of the Midtown Greenway. Site is located to the Muralys of Lynlake VIC Site.
Natural Resource Damage:	False
Cleanup Cost:	Not reported
Notes:	Voluntary Party is Requesting:No Association DeterminationOff-Site Source DeterminationNo Action LetterSite Description:The 0.44 acre Site consists of four parcels of land. Historically the Site has been occupied since the early 1900s by residential dwellings, carpenters shop buildings, a machine shop, an electricians shop, a soap and chemical company, and a general contractor. The Site is currently occupied by a restaurant and commercial office space. The proposed redevelopment for the Site consists of constructing a one story, slab on grade, credit union building. A subsurface investigation, conducted in October 2008, consisted of: advancing seven soil borings; one hand auger boring; constructing three temporary wells; and advancing three soil gas points. Fill was observed at the Site at depths ranging from 2 to 10 feet below ground surface. Ten soil samples, three ground water samples, and three soil gas samples were analyzed for selected compounds including: volatile organic compounds (VOCs); polynuclear aromatic hydrocarbons (PAHs); gasoline range organics (GRO); diesel range organics (DRO); polychlorinated biphenyls (PCBs); and Resource Conservation and Recovery Act (RCRA) metals. DRO, PAHs, mercury, and lead were detected in the soil samples. The benzo-a-pyrene equivalent of the carcinogenic polynuclear aromatic hydrocarbons (PAHs), individual non-carcinogenic PAHs, and mercury were less the MPCA's residential soil reference values (SRVs). The lead concentration in one sample was above the residential SRV. Tetrachloroethene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane, and toluene were detected in the ground water samples collected at the Site. The PCE and TCE concentrations were above the Minnesota Department of Healths (MDH) Health Risk Limits. DRO, detected in the soil and petroleum VOCs detected in the ground water, are under the oversight of the Petroleum Brownfields Program. The Identified Release is PAHs, mercury, and lead in the soil, and PCE, TCE, 1,1,1-Trichloroethane in the ground water.

Physical Location:	Located in Minneapolis on the east side of Lyndale Avenue and one block north of the Midtown Greenway. Site is located to the Muralys of Lynlake VIC Site.
Natural Resource Damage:	False
Cleanup Cost:	Not reported
Notes:	Voluntary Party is Requesting:No Association DeterminationOff-Site Source DeterminationNo Action LetterSite Description:The 0.44 acre Site consists of four parcels of land. Historically the Site has been occupied since the early 1900s by residential dwellings, carpenters shop buildings, a machine shop, an electricians shop, a soap and chemical company, and a general contractor. The Site is currently occupied by a restaurant and commercial office space. The proposed redevelopment for the Site consists of constructing a one story, slab on grade, credit union building. A subsurface investigation, conducted in October 2008, consisted of: advancing seven soil borings; one hand auger boring; constructing three temporary wells; and advancing three soil gas points. Fill was observed at the Site at depths ranging from 2 to 10 feet below ground surface. Ten soil samples, three ground water samples, and three soil gas samples were analyzed for selected compounds including: volatile organic compounds (VOCs); polynuclear aromatic hydrocarbons (PAHs); gasoline range organics (GRO); diesel range organics (DRO); polychlorinated biphenyls (PCBs); and Resource Conservation and Recovery Act (RCRA) metals. DRO, PAHs, mercury, and lead were detected in the soil samples. The benzo-a-pyrene equivalent of the carcinogenic polynuclear aromatic hydrocarbons (PAHs),

2815-2827 LYNDALE AVENUE (Continued) **S109604863**

individual non-carcinogenic PAHs, and mercury were less the MPCA's residential soil reference values (SRVs). The lead concentration in one sample was above the residential SRV. Tetrachloroethene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane, and toluene were detected in the ground water samples collected at the Site. The PCE and TCE concentrations were above the Minnesota Department of Healths (MDH) Health Risk Limits. DRO, detected in the soil and petroleum VOCs detected in the ground water, are under the oversight of the Petroleum Brownfields Program. The Identified Release is PAHs, mercury, and lead in the soil, and PCE, TCE, 1,1,1-Trichloroethane in the ground water.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
