

Mississippi Flyway Habitat Enhancement and Connectivity Pilot

Minneapolis
Park & Recreation Board

Project Selection

The pilot project will focus on expanding the habitat planned at Glen Gale Park and Farview Park. It will also bring habitat to Jordan Park, which compliments a pollinator themed public art piece that will be designed summer 2025. These three project locations will all help to start building out additional habitat for the 26th Avenue Habitat Corridor. **Learn more:** <http://bit.ly/mpls-habitat>
