

**CEDAR AVE FIELD PARK**  
CONSTRUCTING A NEW VISION

Cultural Spaces, Added Amenities, and Increased Natural Areas

**Designing for cultural events and spaces:**  
 The design includes a 20,000 sf Pow Wow/event space with an arbor. It proposes a number of informal and formal seating areas for large events and an elders garden, which support for intimate gathering spaces.

**A multi-purpose building:**  
 The addition of a multi-purpose building serves a number of purposes for the community, including providing an area for youth programming, event vendors, and also houses indoor bathrooms for the public to access during building hours. It is anticipated that this building could be staffed in partnership with one or more community partners.

**Added amenities for all ages:**  
 One of the most requested items was to include Water Play at the park. Summers are getting hotter and youth need a place in their community to stay cool. Other additions include improved playground spaces, a skate spot, and additional court space for different age groups.

**Natural and forested areas:**  
 Gardens and forest areas help create family gathering spaces, relaxation, and shade within the park. The ecological landscape also provides socio-cultural benefits as plants will be selected based on community requests and known Indigenous plants that contain cultural uses.
