

Welcome!

Minneapolis Park and Recreation Board is in the process of creating a concept plan for Todd Park to improve neighborhood amenities and enhance spaces for athletics, play, and gathering. In partnership with Minneapolis Public Schools, the project will upgrade existing fields to include a premier fastpitch and JV softball field. The project also hopes to reimagine the courts, add new nature play features, improve viewing and gathering areas, and enhance drainage and stormwater management on site.

Please take a moment to review the boards and share your feedback. Write your thoughts on sticky notes and place dots below the images you prefer. Your input will help shape the design so the park reflects the needs of the Hale Page Diamond Lake neighborhood and its visitors. Thank you for your participation!

Playground *Additional Elements*

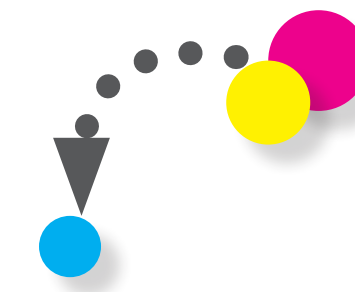

TODD PARK PLAYGROUND UPDATES

Phase 1 of the playground is now complete! The new equipment is open and ready for play. As we look ahead to Phase 2, we're exploring opportunities to add nature play features with elements like logs, boulders, and native plantings that make kids want to hop, balance, and run. We're also considering the addition of a scooter/trike track, a small paved loop designed for young children to practice biking and scootering in a fun, safe space. We'd love your input on what kinds of features would help make Todd Park even more fun and engaging for the neighborhood. What would you like to see?
