Master Plan of Aligned Use and Water Management at Hiawatha Golf Course Property,
a part of Nokomis-Hiawatha Regional Park

Community Advisory Committee Meeting #2

April 30, 2018 - 6:30pm to 8:00pm

MPRB Headquarters

Comments:

The vision the CAAC should adopt should serve the broadest user base possible, with over 100 acres of land available, a multiple use vision is certainly feasible.

The integration of activities that are currently not found in S. Minneapolis would draw more people, and support local residents. These could include a mountain bike park, ultimate frisbee league space (they currently have to travel to Blaine), and a food forest.

I would support a vision and principles that would help create a vibrant multi-use park for everyone. These uses would also help support cleaner water in Lake Hiawatha better than the current golf and pumping regimen.

Also, in determining which consultant to hire, chose Barr, having a sound basis for understanding the hydrology
