EXECUTIVE SUMMARY

Liesch Associates, Inc. (**Liesch**) was retained by Scherer Limited Partnership (**Scherer**) to conduct a Phase One Environmental Site Assessment (**ESA**) and to prepare this Phase One ESA Report (the **Phase One ESA Report**) for an approximate 13.87-acre developed parcel of land with a main address of 9 9th Avenue NE and related addresses of 52 9th Avenue NE, 15 8th Avenue NE, 9 8th Avenue NE, 807 Sibley Street NE, 900 Sibley Street NE and 907 Sibley Street NE, City of Minneapolis (the **City**), County of Hennepin, State of Minnesota (the **Property**). The Property is located in part of the southeast 1/4 of the southeast 1/4, Section 15, Township 29 North, Range 24 West. The Property is commonly referred to as the "**Scherer Bros Lumber Company Site**". A list of Abbreviations, some of which are used throughout this Phase One ESA Report, is included in **Section 11.0** of this Phase One ESA Report. **Figure 1** in **Appendix A** shows the location of the Property. A Survey showing the Property is included as **Figure 2** in **Appendix A**. One of the purposes of the Phase One ESA is to allow Scherer to qualify for one or more of the following Landowner Liability Protections (**LLPs**) as defined in 42 U.S.C. § 9601 (35) (B): Innocent Landowner, Bona Fide Prospective Purchaser, or Contiguous Property Owner.

Property and Surrounding Properties Description

General Area	Commercial, residential, park and Mississippi River.
Site Improvements	Nine buildings used for sale and storage of building supplies and lumber, millworking purposes and vehicle maintenence. Three of the buildngs are open sided lumber storage buildings. Buildings were constructed between 1936 and 1985. Sibley St. NE and 9th Ave. NE separate portions of the Property.
Adjacent to North	Commercial building and parking areas to the north along the western portion of the Property and 10th Ave. NE with parking lot and open area to the north along the eastern portion of the Property.
Adjacent to East	Ramsey St. NE along the northern portion of the eastern Property boundary with commercial buildings and parking lots beyond. Commercial office/warehouse buildings adjacent to the southern portion of the Property along the eastern boundary of the Property.
Adjacent to South	8th Ave. NE with Boom Island Park and residential properties beyond.
Adjacent to West	Mississippi River with open area and commercial land use across the river.

The Property has nine buildings and which were constructed over a period of time beginning in 1936 and the last reported construction being in 1985. **Building 1**, constructed initially in 1936 with several additions through 1977, is a three story structure and contains the main office, office warehouse, trim shop, mill, wood specialties and millwork storage. The second and third floors are currently unused. **Building 2** was constructed in 1973, is a two story structure that contains the window shop. Building 3 was constructed in 1981, is a two story structure that contains the door shop. **Building 4**, constructed in 1959, is the vehicle maintenance garage. **Building 5** was constructed in 1954 and contains a warehouse (**Building 5A**) and an open sided wood storage building (**Building 5B**). **Building 6**, constructed in 1985, is a warehouse and yard office. **Building 7** and **Building 8**, both constructed in 1979, are open sided lumber storage buildings. **Figure 9**, constructed in 1977 is a receiving warehouse. **Figure 3** in **Appendix A** is a Site Plan of the Property showing the building locations and numbers. The Buildings 1 though 9 are collectively referred to as the "**Buildings**".

Based on information reviewed, the Property was historically a shingle mill and cedar post sawing mill as early as 1885 and a lumber company, with lumber milling, sawing and storage since at least 1912. The western portion of the Property was previously a side-channel of the Mississippi River and Hall's Island. According to the representatives of Scherer, the side channel of the Mississippi River was filled in the late 1960s by dredging Hall's Island and relocating the material to the eastern portion of the Property, which eliminated the former channel.

Adjoining property use to the north, south and east were lumber related activities from at least 1885 until 1912. From 1912 to present, the areas south of the Property were used as a railroad yard, open area and most recently a park. The area to the east of the Property was used for dwellings, parking areas and warehouses. The Mississippi River and the former Hall's Island were located to the West of the Property. See **Appendix J** for historic aerial photographs.

According to a Commitment to Insure from Old Republic National Title Insurance Company, Application No. OR1042082, Effective Date: December 1, 2006 (the **Title Commitment**), furnished to Liesch by Ryan Companies US, Inc. (**Ryan**), the Property is owned by Scherer Limited Partnership (**Owner**). The Title Commitment does not identify any environmental liens. The Title Commitment identified that the Scherer Bros Lumber Company Site included reclaimed land, accretions and Hall's Island. The Title Commitment also identified railroad and utility easement rights, a reservation of minerals and mineral rights to the State of Minnesota and rights of the public and the state to that part of the Scherer Bros Lumber Company Site lying below the natural high water mark of the Mississippi River.

Work performed for the Phase One ESA included: a review of federal, state, county, and municipal information; a walk-over survey; review of documents furnished to Liesch by Scherer, Ryan and/or others; an interview with representatives of the Owner and a review of historical data. The Phase One ESA was conducted in general accordance with the scope and limitations of

ASTM Standard Practice E1527-05. Any exceptions to this practice are noted in **Section 2.1** of this Phase One ESA Report.

Liesch has identified the following data gap, as defined by ASTM Standard Practice E1527-05: Historical information prior to the Property's first known developed use in 1885 was not reasonably available.

Based on Liesch's assessment and a review of information obtained, no recognized environmental conditions (**RECs**), as defined in the ASTM Standard Practice E1527-05, were identified for the Property except for the following:

- Results from an October 2009 Limited Phase Two Investigation prepared for Scherer by Liesch (the **Scherer Phase Two**), which was conducted primarily on the southwestern portion of the Property, identified elevated concentrations of lead, diesel range organics (**DRO**) and the volatile organic compound (**VOC**) naphthalene. Lead was reported at 10,300 milligrams per kilogram (**mg/kg**) in the soil sample from 7-feet to 9-feet bgs. The MPCA Tier 1 Soil Leachate Value (**SLV**) and Tier 2 Industrial Soil Reference Value (**SRV**) for lead are 525 mg/kg and 700 mg/kg, respectively. DRO, which does not have an MPCA action level established, was reported at 439 mg/kg. Naphthalene was reported at 0.432 mg/kg and the MPCA Tier 1 SLV and Tier 2 Industrial SRV are 7.5 mg/kg and 28 mg/kg, respectively. The release for these findings was reported to the Minnesota State Duty Officer on July 13, 2009 on behalf of the Owner. (**Sections 7.8** and **7.9**)

- Results from the Scherer Phase Two conducted on the Property identified asbestos in a soil sample collected from the surficial soils on the west-central portion of the Property. (**Section 7.9**)

- A 560-gallon waste oil UST was removed by Dean's Tank, Inc. on May 2, 1999. Confirmation sampling was reportedly completed by Peer Environmental and Engineering, Inc. (**Peer**). However, the Owner was unable to locate copies of the confirmation sampling results. (**Section 5.2**)

One historic REC was identified for the Property:

- A portion of the Property is a MPCA LUST site (LEAK NO: 1057) and the tank release area is located adjacent to the southwest portion of Building 4 (the vehicle maintenance garage) on the southeastern portion of the Property (see **Figure 4** in **Appendix A** for location). The parcel address for the LUST site is 52 9th Avenue NE. The MPCA issued closure of this LUST site on April 17, 1992. Closed LUST sites do not require additional investigation or remediation. However, if redevelopment is planned for this area, the residual impacted soils may require additional assessment. (**Section 4.1**)

The following items of environmental note were identified for the Property.

- The Property is a licensed generator of hazardous waste and reports under the Minnesota Department of Public Safety's Tier 2 requirements. The hazardous generators license is for the generation of bulbs, ballasts and waste oil. The Tier 2 reporting is for the storage of diesel fuel and gasoline in USTs located on the Property. (**Sections 4.1** and **5.2**)

- An UST was formerly located adjacent to the southwestern portion of Building 6 on the Property (see **Figure 5** in **Appendix A** for location). The UST was used to fuel delivery trucks for the Scherer Bros Lumber Company. The UST was removed in the late 1970s or early 1980s. No record of leaks were reported for the UST, however, no analytical information was collected to determine if there were any impacts to the soils and/or ground water. A soil boring completed adjacent to the former UST basin did not find readily apparent impacts (**Sections 5.2** and **7.9**)

- Historical information identified a shingle mill and cedar post sawing mill on the southwest corner of the Property. A tank (no size or contents listed) and a chimney were noted in association with the mill. (**Section 6.1**).

- The western portion of the Property was formerly a side-channel to the Mississippi River and Hall's Island. According to representatives of Scherer, Hall's Island was dredged and moved east to expand the western side of the Property. (**Sections 6.1**, **6.3** and **6.4**)

- Information reviewed from the City Directories identified a variety of commercial/industrial land use in the area of the Property. Based on the review of the City Directories, it was not readily ascertainable if these commercial/industrial activities may have resulted in impacts to soil and/or groundwater. (**Section 6.2**)

- A possible wetland area was noted in the EDR Response located either on or adjacent to the northwest corner of the Property along the Mississippi River. (**Section 3.3**)

- Suspect PCB containing items such as fluorescent light ballasts, compressors and transformers were observed on the Property. (**Section 5.1**).

- Ozone depleting chemicals were observed on the Property in roof-mounted air conditioning units, and refrigerators. (**Section 5.1**)

- Possible ACM) lead-based paint (LBP), mercury switches, fluorescent lamps and regulated wastes were observed on the Property. (**Section 5.1**).

- Miscellaneous chemicals were observed on the Property. (**Section 5.1**)

The Property has nine buildings and which were constructed over a period of time beginning in 1936 and the last reported construction being in 1985. **Building 1**, constructed initially in 1936 with several additions through 1977, is a three story structure and contains the main office, office warehouse, trim shop, mill, wood specialties and millwork storage. The second and third floors are currently unused. **Building 2** was constructed in 1973, is a two story structure that contains the window shop. The Buildings 1 though 9 are collectively referred to as the "**Buildings**".

Based on information reviewed, the Property was historically a shingle mill and cedar post sawing mill as early as 1885 and a lumber company, with lumber milling, sawing and storage since at least 1912. The western portion of the Property was previously a side-channel of the Mississippi River and Hall's Island. According to the representatives of Scherer, the side channel of the Mississippi River was filled in the late 1960s by dredging Hall's Island and relocating the material to the eastern portion of the Property, which eliminated the former channel.

Adjoining property use to the north, south and east were lumber related activities from at least 1885 until 1912. From 1912 to present, the areas south of the Property were used as a railroad yard, open area and most recently a park. The area to the east of the Property was used for dwellings, parking areas and warehouses. The Mississippi River and the former Hall's Island were located to the West of the Property. See **Appendix J** for historic aerial photographs.

According to a Commitment to Insure from Old Republic National Title Insurance Company, Application No. OR1042082, Effective Date: December 1, 2006 (the **Title Commitment**), furnished to Liesch by Ryan Companies US, Inc. (**Ryan**), the Property is owned by Scherer Limited Partnership **(Owner)**. The Title Commitment does not identify any environmental liens. The Title Commitment identified that the Scherer Bros Lumber Company Site included reclaimed land,

accretions and Hall's Island. The Title Commitment also identified railroad and utility easement rights, a reservation of minerals and mineral rights to the State of Minnesota and rights of the public and the state to that part of the Scherer Bros Lumber Company Site lying below the natural high water mark of the Mississippi River.

Work performed for the Phase One ESA included: a review of federal, state, county, and municipal information; a walk-over survey; review of documents furnished to Liesch by Scherer, Ryan and/or others; an interview with representatives of the Owner and a review of historical data. The Phase One ESA was conducted in general accordance with the scope and limitations of ASTM Standard Practice E1527-05. Any exceptions to this practice are noted in **Section 2.1** of this Phase One ESA Report.

2.0 SCOPE OF WORK

The following work items were completed for the Phase One ESA:

- Contacts with federal, state, county, and municipal regulatory agencies to determine if any known environmental concerns have been reported on or adjacent to the Property;
- A review of a database file search from EDR dated October 29, 2009 (the **EDR Response**);
- A walk-over survey of the Property to identify any readily apparent environmental concerns on or adjacent to the Property;
- A vapor intrusion assessment for the Property;
- A historical review of the Property, utilizing available aerial photographs, USGS topographic maps, Sanborn maps and City Street Directories;
- Interviews with representatives of the Owner;
- A review of the USGS well log files for the presence of wells on the Property;
- A review of previous environmental documents and other reports provided to Liesch by Ryan and the Owner; and,
- Preparation and submittal of this Phase One ESA Report summarizing the findings.

The following sections discuss the results of the investigation and summarize the information obtained for this Phase One ESA. This Phase One ESA Report does not include a complete compliance analysis with local, state or federal environmental laws, rules or regulations. However, Liesch attempted to note obvious instances of non-compliance. The Phase One ESA was conducted in accordance with the scope and limitations of ASTM Standard Practice E1527-05.

2.1 EXCEPTIONS OR DELETIONS FROM ASTM STANDARD

Liesch did not check the following Standard Historical Sources listed in the ASTM Standard Practice E1527-05 (property tax files, and zoning/land use records) because in Liesch's past experiences, information from these sources is not likely to be sufficiently useful in providing historical site information beyond those sources which were already checked by Liesch.

A review of Recorded Land Title Records, as defined in ASTM Standard Practice E1527-05, other than Liesch's review of the Title Commitment, was deemed unnecessary as other, more relevant historical sources, were available.

The following data failure was identified:

- Sanborn maps prior to 1885 evidencing the first use of the Property were not available.

Information was not reasonably obtainable regarding the first known developed use of the Property. Liesch considers this data failure to be a data gap.

3.0 PHYSICAL SETTING

A site's ability to impact surrounding properties is largely dependent on the direction of ground water flow from the site. To assess ground water flow to the Property, Liesch reviewed the 1989 Geologic Atlas for Hennepin County, Minnesota prepared by the University of Minnesota (the **Atlas**). The USGS 7.5-minute Minneapolis North and Minneapolis South topographic maps dated 1967 photorevised 1993 (the **Topographic Maps**) were also used to identify topographic features, such as hills, streams, and lakes, which may influence the site specific shallow groundwater flow direction at the Property.

3.1 TOPOGRAPHY

The Property is characterized by level topography. Based on the Topographic Maps, the elevation of the Property is approximately 800 feet NGVD. Based on a review of the Topographic Maps no topographical features of environmental concern were noted for the Property.

3.2 GEOLOGY/HYDROGEOLOGY

Liesch reviewed the Atlas which summarizes available information on the geology and hydrogeology of the area of interest. According to the Atlas, surficial deposits in the vicinity of the Property consist of postglacial deposits including: Floodplain Alluvium (Clayey), chiefly clay and silt, commonly mixed with variable amounts of very fine sand and organic matter, overlain

by thick artificial fill in developed areas; and, Floodplain Alluvium (Sandy), chiefly loamy sand, sand, and gravelly sand interbedded with and overlain by thin beds of finer sediment and organic matter, artificially filled where developed. The bedrock is reported as St. Peter Sandstone. St. Peter Sandstone consists of fine to medium grained friable quartz sandstone in the upper half to two-thirds of the formation. The lower part of the St. Peter Sandstone contains multicolored beds of mudstone, siltstone, and shale with interbedded very course sandstone. Depth to bedrock in the vicinity of the Property is approximately 50 to 100 feet bgs.

According to the Atlas, the depth to regional groundwater in the area of the Property is less than 10 feet bgs. Regional ground water flow is expected to be in a west-southwesterly direction toward the Mississippi River. However, local ground water flow direction is often influenced by topography and local drainage features such as lakes, streams and wetland areas and may vary from the regional ground water flow direction.

3.3 WETLAND CLASSIFICATION

Liesch reviewed the EDR Response which included a review of NWI maps published by the U.S. Department of the Interior Fish and Wildlife Service. The NWI maps indicate a possible wetland area adjacent to the northwest edge of the Property along the Mississippi River. Information from NWI maps available to EDR is included in **Appendix B**.

Liesch also reviewed the 1983 DNR Protected Waters and Wetlands Map for Hennepin County. No protected waters or wetlands were noted on the Property. The Mississippi River, which is a protected water, is located adjacent to the west boundary of the Property. The EDR Response indicates the Property is located within the 100-year and 500-year flood zones. A survey of the Scherer Bros Lumber Company Site dated February 17, 2007 (**Figure 2** in **Appendix A**) shows the Property on the FEMA Flood Insurance Map, Zones AE and X, Map No. 2701720357E, Effective: September 2, 2004, 100 year flood zone with an elevation of 808.0 feet.

3.4 VAPOR INTRUSION ASSESSMENT

Liesch conducted a Tier 1 - Initial (non-invasive screening) Vapor Intrusion Assessment (**VIA**) in general accordance with the scope and limitations of the Standard Practice for Assessment of Vapor Intrusion into Structures on Property Involved in Real Estate Transactions, ASTM Standard E2600-08. The Tier 1 VIA assesses readily available information in order to determine if potential vapor intrusion conditions (**pVICs**) are evident for the Property.

Liesch requested EDR to furnish a worksheet to help assess whether or not pVIC issues were apparent on the Property. Using this worksheet, Liesch assessed all sites reported within the applicable ASTM database search distances, as defined by ASTM Standard E2600-08. Each

reported site was assessed based on the physical location of the site, the detail furnished by EDR, whether or not a release was reported, what the chemical constituents in the release are or are likely to be, if the site was within the "Critical Distance" as identified by ASTM and whether or not the release site is up-gradient of the Property with respect to ground water flow.

Based on Liesch's assessment of listed sites within the "Critical Distance" of the Property, the Property was identified as a pVIC and is discussed below:

- **Scherer Brothers Lumber**, 52 9th Avenue NE, Minneapolis (LEAK Site No: 1057 – Closed 04/17/1992); located on the east portion of the Property.

The **Scherer Brothers Lumber** LUST site is located on the Maintenance Garage portion of the Property. Liesch reviewed the MPCA LUST file for the **Scherer Brothers Lumber** LUST site. An investigation report completed by Dahl & Associates, Inc. (**Dahl**) for Scherer Bros dated March 21, 1990, identified that residual petroleum impacts to soil and ground water exist at the LUST site. The concentrations of the residual contamination were acceptable to the MPCA for site closure at that time. Due to the **Scherer Brothers Lumber** LUST site being on the Property, and the reported residual petroleum contamination reported for the soil and ground water, the **Scherer Brothers Lumber** LUST site is considered a pVIC for the Property.

A copy of the EDR Vapor Intrusion Screen report, prepared using EDR's vapor intrusion worksheet, is included in **Appendix C**.

4.0 REGULATORY AGENCY RESPONSES

4.1 EDR RESPONSE

EDR was requested to conduct a file evaluation of the Property (the **EDR Response**) to determine if there were any identifiable environmental concerns on, or within a 1 1/4-mile radius from the center of the Property. The search distances were increased by 1/4-mile due to the size of the Property. The search meets the specific requirements of the ASTM Standard Practice E1527-05. A paper copy of the Executive Summary, Overview Map, Detail Map, Map Findings Summary and Orphan Site Summary of the EDR Response, dated October 29, 2009, are included in **Appendix B**. A compact disc containing the electronic copy of the full EDR Response follows the paper copy portion of the EDR Response. A description of each database is included in the EDR Response.

The EDR Response specifically identified the Property (9 9th Avenue NE address) in the Tier 2 (two separate listings) RCRA-CESQG and FINDS databases and the LUST, UST, MN SPILLS and EDR Historical Cleaners databases (52 9th Avenue NE address) for the Property summaries of which are discussed below:

Tier 2

This is the Minnesota Department of Public Safety's listing of facilities which store or manufacture materials that submit a chemical inventory report. A review of the Tier 2 database, dated December 31, 2008, as provided by EDR, has revealed that there are two (2) Tier 2 listings for the Property both listed as **Scherer Bros Lumber Co – River Yard**, addressed as 9 9th Avenue NE, Minneapolis. The Tier 2 listings are for gasoline and diesel fuel.

According to Mr. Dave Olson, Scherer Bros Facility Manager, gasoline and diesel fuel is storaged on the Property, and addressed as 52 9th Avenue NE. Based on the gasoline and diesel fuel being stored on the adjacent parcel, the Tier 2 listing is not considered a REC for the Property.

RCRA-CESQG

The RCRA database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by RCRA. A review of the RCRA list dated November 12, 2008, as provided by EDR, has revealed that the Property, listed as **Scherer Brothers Lumber**, 9 9th Avenue NE, Minneapolis, is a RCRA-CESQG site. No violations are listed for the **Scherer Brothers Lumber**. Inclusion on the RCRA-CESQG database list does not imply the facility has environmental problems or that a release has occurred and is not considered a REC for the Property.

LUST

LUST Incident Reports contain an inventory of reported LUST incidents. The data comes from the MPCA's Leak Sites list. A review of the LUST list, dated August 1, 2009, as provided by EDR, has revealed the Property in the LUST database. The LUST listing is for the 52 9th Avenue NE (Building 4) portion of the Property (see Tank Basin No. 1 on **Figure 4** in **Appendix A** for LUST basin location). The LUST listing for the Property is discussed below.

- **Scherer Brothers Lumber**, 52 9th Avenue NE, Minneapolis (LEAK Site No: 1057 – Closed 04/17/1992).

The LUST file for the Property has been closed by the MPCA. A copy of the MPCA closure letter dated April 17, 1992 is included in **Appendix D**. Closed sites have been remediated to levels acceptable to the MPCA, have an on-going remedial action in place, or it was determined that environmental conditions on the site had not been impacted by the reported release. Closed LUST sites are not considered RECs for the Property.

Liesch reviewed the report entitled "Petroleum Hydrocarbon Release Investigation Report, Scherer Brothers Lumber Company, 52 Ninth Avenue NE, Minneapolis, Minnesota, MPCA Leak No. 1057" prepared by Dahl & Associates, Inc. (**Dahl**) submitted to: Scherer Brothers Lumber Company and MPCA, dated December 10, 1989 (the **Release Investigation Report**) summarized the release detection and soil and groundwater assessment completed as part of the LUST investigation.

The Release Investigation Report identified that during removal of 10,000-gallon steel diesel fuel UST, a release of petroleum hydrocarbons was detected on May 3, 1989. The release was believed to be the result of corrosion of the UST, as evidenced by pits and holes observed in the UST.

Laboratory results from excavated materials identified petroleum impacted soils. A soil assessment of the UST basin was completed by Dahl. Eight soil borings were completed to determine the horizontal and vertical extent of the impacted soils. The soil borings identified impacted soils at the soil / ground water interface at 4200 parts per million. The Release Investigation Report concluded that ground water may be impacted from the release. The Release Investigation Report recommended additional investigation to define the extent of the ground water impacts (see **Section 7.2** for additional information).

The report entitled "Release Investigation and Correction Action Report, Groundwater Assessment Supplement, Scherer Brothers Lumber Company, 52 Ninth Avenue NE, Minneapolis, Minnesota, MPCA Leak No. 1057" prepared by Dahl & Associates, Inc. (**Dahl**) for

Scherer Brothers Lumber Company and MPCA, dated March 21, 1990 (the **Supplemental Investigation Report**). Four additional borings were completed in the vicinity of the LUST basin and were field screened and three ground water samples were collected for laboratory analyses.

The results of the ground water sample analyses identified total hydrocarbons as fuel oil in borings TB-10 and TB-11 at 200 ppm (see **Figure 4** in **Appendix A** for boring locations).

The Supplemental Investigation Report stated that no further soil remediation was recommended. One well was recommended to be installed and monitored on a quarterly basis to determine if there was a risk of impacted soils leaching into the ground water (see **Section 7.3** for additional information.

Based on the information reviewed, the **Scherer Brothers Lumber** LUST site is not considered a REC. However, due to the **Scherer Brothers Lumber** LUST site being closed, it is considered a historic REC for the Property.

UST

The UST database contains USTs registered with the MPCA. A review of the UST list, dated August 1, 2009, as provided by EDR, has revealed that the Property is included in the UST database. The following is a summary of the USTs registered for the Property:

Tank ID#	Status	Size (gallons)	Material	Product

102	Active	4,000	Fiberglass	Gasoline
103	Removed	560	Steel	Used or Waste Oil
4	Active	10,000	STI-P_3	Diesel Fuel

Inclusion on the UST list does not imply that a release has occurred or that the site has environmental problems. As identified above, the **Scherer Brothers Lumber** site is also a LUST site, which has been previously discussed in the LUST section above, and is considered a historic REC for the Property.

AST

The source of the AST database is the MPCA and includes registered ASTs. A review of the AST list, dated August 1, 2009, as provided by EDR, has revealed the Property is listed on the AST database. The following is a summary of the USTs registered for the Property:

Tank ID#	Status	Size (gallons)	Material	Product
104	Active	280	Steel	Motor Oil
105	Active	280	Steel	Used or Waste Oil

Inclusion on the AST list does not imply that a release has occurred or that the site has environmental problems. As identified above, the **Scherer Brothers Lumber** site is also a LUST site, which has been discussed above and is considered a historic REC for the Property.

MN SPILLS

This is the MPCA's Spills Log. A review of the MN SPILLS list dated August 1, 2009, as provided by EDR, has revealed that the Property is included on the MN SPILLS database. The MN SPILLS listing for the **Scherer Brothers Lumber** site is due to the LUST listing. As previously identified, based on the information reviewed, the **Scherer Brothers Lumber** LUST site is considered a historic REC for the Property.

FINDS

The FINDS database contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: Permit Compliance System (PCS); Aerometric Informational Retrieval System (AIRS); DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes); Federal Facilities information System (FFIS); State Environmental Laws and Statutes (STATE); and, PCB Activity Data System (PADS). A review of the FINDS database list dated July 23, 2009, as provided by EDR, has revealed that the Property, listed as **Scherer Brothers Lumber**, 9 9th Avenue NE, Minneapolis, is listed on the FINDS database.

The EDR Response identified the FINDS listing for the Property in the MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) database which facilitates the issuance of permits and manages compliance. The MN-DELTA listing is for the RCRA-CESG. The FINDS listing for the Property in the MN-DELTA database is not a REC for the Property.

Historical Cleaners

The Historical Cleaners site database is an EDR Proprietary Historical Database of Cleaner sites. A review of the Historical Cleaners list, which is undated, as provided by EDR, has revealed the Property, identified as **One Hour Martinizing**, 9 9th Avenue NE, Minneapolis, is listed on the Historical Cleaners database. Historical review of the Property (see **Section 6.0**) and an interview with the Owners representative (see **Section 5.2**) does not suggest that any portion of the Property

has been used as a cleaning facility. It appears that the listing is in error and the Historical Cleaners listing is not considered a REC for the Property

EDR identified the following sites within the ASTM search radius for the Property:

the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are two Manufactured Gas Plants site within approximately 1-mile of the Property.

Fire Department records identified the Tier II Emergency and Hazardous Chemical Inventory reporting for the Property, which as previously identified in **Section 4.1** is for the storage of petroleum products located on the Property. Additionally, an Application for Fire Department Permit to Store, Handle or Use Flammable Liquids dated May 29, 1961 (the **Application**) was included in the Fire Department files for the address of the Property. One 4,000-gallon gasoline tank and one 10,000-gallon diesel tank were noted on the Application. The Application did not identify if the request was for installation or removal. The Fire Department files included a drawing showing two tanks on the parcel addressed as 52 9th Avenue NE (adjacent to the Garage) dated October 1983, however, it is unknown if they are the tanks referenced in the Application. No other information pertaining to the Application was identified. As part of a Phase One ESA completed for Ryan by Liesch in July 2009 as part of a former redevelopment project (the **Ryan Phase One**), Liesch conducted a walkover survey of the southwestern portion of the Property (the **Redevelopment Property**) on June 26, 2009 and was accompanied by Mr. Dave Olson, Scherer Bros Facility Manager. A Site Plan for the Scherer Bros Lumber Company Site is included as **Figure 3** in **Appendix A**. The purpose of the walkover survey was to identify any readily apparent indications of potential environmental concern on or immediately adjacent to the Property. **Appendix E** contains a copy of the completed Walk-Over Survey Form. **Appendix F** contains selected photographs taken during the walkover survey.

Property and Surrounding Properties Description

General Area	Commercial, residential, park and Mississippi River.

Pipelines

No pipeline markers were noted on, or adjacent to the Property.

Heating/Cooling Systems

Roof-mounted heating and cooling systems are located on the Main Building. Gas fired and electric area heaters were also noted in areas of the Main Building on the Property.

5.2 INTERVIEWS

5.2.1 Owners Representative

On June 26, 2009 and July 1, 2009, as part of the Ryan Phase I ESA, and on November 10, 2009 Liesch interviewed the Owners representative Mr. Dave Olson, Scherer Bros Facility Manager, for information pertaining to items of environmental concern on or in the vicinity of the Property. Mr. Olson stated that a portion of the Main Building was formerly a vehicle service area, although he was not aware when this area was discontinued for such use. Mr. Olson stated that a UST was removed in the early 1980's from the southeast corner of Building 6, located adjacent to the north of the Property and that to his knowledge no sampling of soils was conducted during the UST removal. The approximate locations of Building 6 and the former UST Basin are shown on **Figure 5** in **Appendix A**.

Mr. Olson was asked for information regarding confirmation sampling of the 1999 removal of the 560-gallon waste oil UST by Dean's Tanks, Inc. (see Tank Basin No. 3 on **Figure 4** in **Appendix A** for location). Mr. Olson could not locate confirmation sampling results reportedly completed by Peer. Mr. Olson was not aware of any other environmental concerns on the Property and stated that to his knowledge, no tanks, wells, septic systems or chemical storage, other than retail quantities, occurred on the Property.

ASTM Standard Practice E1527-05 describes information gathering tasks to be performed by the "user", which for the purpose of the Phase One ESA is Scherer. The information gathered is to help identify the possibility of RECs for the Property. The questions asked of Mr. Pete Scherer, President of Scherer, regarding the Property and his responses follow:

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
Response: - No.

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CRF 312.26).
Are you aware of any Activity Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
Response: - No.

(3.) Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28).
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the

current or former occupants or the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Response: - Located there since 1934. Family Business.

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
Response: - No Idea.

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.29).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property? **Response**: - From 1934 on.

(b.) Do you know of specific chemicals that are present at the property? **Response**: - Generally.

(c.) Do you know of spills or other chemical releases that have taken place at the property? **Response**: - Yes, fixed tank.

(d.) Do you know of any environmental cleanups that have taken place at the property? **Response**: - Yes, fixed tank.

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
Response: No.

6.0 HISTORICAL RESEARCH

6.1 SANBORN FIRE INSURANCE MAP REVIEW

Sanborn Maps were prepared for various communities from the late 1800s through the 1980s. These maps show addresses, structures and other improvements, such as utilities and storage tanks, for the areas covered. A copy of the EDR Sanborn Response dated October 28, 2009 is included in **Appendix H**.

The following tables summarize the Sanborn Maps furnished by EDR for the Property and surrounding areas:

Year	Description
1885	J.B. Chatterton Shingle Mill and Cedar Post Sawing Mill (Chatterton Mill) is located on the southwestern portion of the Property. A tank (size and/or contents is not noted) and 50-foot chimney is shown adjacent to the Chatterton Mill. The Chatterton Mill is shown to have a 35-horsepower engine. The Fletcher Bros Sawmill is located on the northwestern portion of the Property with steam boilers fueled by sawdust. One dwelling is shown on the northwest corner of 9th Avenue NE and Ramsey Street NE and one dwelling is shown on the northwest corner of 9th Avenue NE and Water Street. The remainder of the Property is shown as wood, post, shingle and lath storage. Water Street NE, Sibley Street NE and 9th Street NE are located within the area of the Property.
1890	The Chatterton Mill was relocated further west on the Property and is adjacent to the Mississippi River. No tanks are shown in the new location of the Chatterton Mill. The area of the Fletcher Bros Sawmill is now labeled the Lamoreaux Mill with steam boilers fueled by sawdust and an oil room noted. C.H. Ruddick Lumber Co is located on the northeast portion of the Property with lumber storage shown. The two dwellings remain on the Property. The remainder of the Property remains as wood, post, shingle and lath storage.
1912	The Chatterton Mill and the Lamoreaux Mill are no longer shown on the Property. The south-central portion of the Property is labeled Tozer Lumber Co. with an electric rip saw and lumber sheds shown. The southeastern portion of the Property is labeled City Fuel Co. Yard No. 2, with a coal shed noted. A tool house and cement house are shown on the central portion of the Property. The remainder of the Property is shown as open or lumber storage. A railroad spur is shown crossing onto the Property from the north in the central portion of the Property and along the eastern portion of the Property.
1950 and 1952	The western portion of the Property is labeled Scherer Bros Lumber Co., with a saw and planing mill building located in the south-central portion of the Property. A roofing warehouse building and lumber storage building are located north of the saw and planing mill building. An office with attached lumber building is located on the west-central portion of the Property (the office area is not shown on the 1952 map). "Junk" areas are noted on the south-central portion of the Property. The northeastern portion of the Property is labeled Carr-Cullen Co. The Carr-Cullen Co. area includes a planing mill and lumber sheds. The southeastern portion of the Property is labeled Philadelphia & Reading Coal and Iron Co. Yard No 5, with coal storage and buildings shown.

Year	Description
1966	The roofing warehouse building and lumber storage building referenced above have been removed and the saw mill and planing mill building has expanded to include the lumber building on the west-central portion of the Property. A lumber storage building was also noted in the area of the lumber storage building. Lumber sheds are noted on the north-central portion of the Property. The Philadelphia & Reading Coal and Iron Co. Yard No 5 notations are no longer shown on the southeastern portion of the Property. On the east-central portion of the Property an auto repair facility is noted with a paint spray booth. The northeastern portion of the Property has an area labeled as a plastic bottle and tray warehouse.

The following table summarizes the review for the adjacent properties.

	East	Similar to above, however, scrap metal warehouses are shown south of 9th Avenue NE.
	West	As above.

The 1885 Sanborn Map shows the Chatterton Mill with a tank (size and/or contents is not noted) and a 50-foot chimney adjacent to the Chatterton Mill. The tank and chimney (due to potential ash with elevated levels of metals or other contaminants, is considered an item of environmental concern for the Property. Additionally, a Limited Phase Two Investigation recently completed identified elevated lead concentrations in the area of the former Chatterton Mill (see **Section**

7.9). The 1890 Sanborn Map shows the Lamoreaux Mill with an oil room noted. It is unknown if the oil room associated with the Lamoreaux Mill experienced a release of oil. The former oil room is considered an item of environmental concern.

6.2 CITY DIRECTORY REVIEW

Liesch reviewed the City Directories provided by HIG. The City Directory Review included a search of available City Directory collections, including the address range for the Property, as well as streets adjoining the Property: 9th Avenue NE, 8th Avenue NE and Sibley Street NE. According to HIG, no listings were available for vacated Water Street NE.

HIG reviewed the following Cross-Reference Directories: Polk's Minneapolis (1930 –1999) and Cole's Minneapolis (2002-2007) and the City Directories provided by HIG are included in **Appendix I**. City Directories were provided by HIG for the years: 1930, 1935, 1940, 1946, 1952, 1957, 1962, 1966-67, 1972, 1977, 1981-82, 1987, 1993, 1999, 2002 and 2007, for the address range of the Property.

Information provided by HIG for the address of the Property (9 9th Avenue NE, 52 9th Avenue NE, 15 8th Avenue NE, 9 8th Avenue NE, 807 Sibley Street NE, 900 Sibley Street NE and 907 Sibley Street NE) are summarized in the table below:

Review of the City Directories for the address of the Property identified the Philadelphia & Reading Coal & Iron Yard No. 5 in the 1930 through 1946, the Acme Transfer Co (garage) trucking firm in the 1972 City Directory and the Scherer Bros garage in the 1993 City Directory. Due to the possibility of impacts from those past activities, the listings for the Philadelphia & Reading Coal & Iron Yard No. 5 (51 8th Ave. NE) and the Acme Transfer Co (garage) trucking firm and Scherer Bros garage (52 9th Ave. NE), those City Directories are considered items of environmental note. As previously identified in Section 4.1, the closed LUST listing for the Scherer Bros garage (52 9th Ave. NE) is considered a historic REC for the Property.

Surrounding commercial properties of environmental note included the following listings:

6.3 AERIAL PHOTOGRAPH REVIEW

As part of Ryan Phase One, previously completed for a portion of the Property, Liesch obtained aerial photographs from Historical Information Gatherers, Inc. (**HIG**). Aerial photographs available from HIG were reviewed to identify past land uses and any readily apparent environmental concerns on or near the Property. Photographs from the years 1937, 1940, 1947, 1953, 1957, 1964, 1969, 1979, 1984, 1991, 1997, 2000, 2003 and 2008. Aerial photographs prior to 1937 were not reasonably ascertainable. Copies of the aerial photographs are included in **Appendix J**.

The following table summarizes the aerial photograph review for the Property.

Year	Description
1937	The extreme western portion of the Property is a side-channel of the Mississippi River with an island and the main channel of the Mississippi River beyond. The south-central portion of the Property appears to have a building and/or lumber storage. The eastern portion of the Property appears to have possible lumber storage.
1940	The south-central portion of the Property appears to be a mixture of small buildings, storage areas and idle land. A building appears to be present on the northwestern and two buildings appear present on the northeastern potion of the Property. Possible lumber storage and idle land is noted on the remaining areas of the Property.
1947	The southwestern portion of the Property appears to be idle land. Buildings are present on the majority of the Property and lumber storage appears present through out the majority of the area of the Property.
1953, 1957	The Property is similar to the 1947 aerial photograph, however, idle areas on the southern potion of the Property appear to be used for lumber storage.
1964	Additional building(s) appear west of the building located on the south-central portion of the Property and the maintenance garage has been constructed on the southeastern portion of the Property. The remainder of the Property is similar to the 1953 and 1957 aerial photographs.

Year	Description
1969	Two additional buildings appear on the central portion of the Property which are believed to be the open-sided storage buildings. The buildings on the south-central portions of the Property appear to have been expanded and it appears that the Main Building is continuous along Sibley St. NE from 8th Ave. NE to 9th Ave. NE. On the extreme western portion of the Property the side-channel of the Mississippi River appears to have been partially filled, reportedly by dredging the island and moving the material to the western portion of the Propety. Previously a well defined channel existed between the Property and the island.
1979, 1991, 1997, 2000, 2003, 2008	The Property appears similar to the current configuration. The majority of the eastern portion is developed with the Buildings and/or parking areas and the western portion of the Property appears to be primarily lumber storage. The western portion of the Property has been filled and the aforementioned island no longer present.

The following table summarizes the aerial photograph review for the adjacent properties.

Year	Direction	Observations
1937	North	Idle, possible small piles of lumber.
	South	8th Ave. NE with idle land use beyond. Train tracks beyond idle land.
	East	Ramsey St. NE with commercial buildings beyond on the northern portion of the Property Idle land to the east of the Property on the southern portion of the Property.
	West	Mississippi River with idle and commercial land use beyond.
1940, 1947, 1953, 1957	North	Idle and/or open land and possible lumber storage areas.
	South	As above with a possible commercial building in the southwest quadrant of 8th Ave. NE and Sibley St. NE shown in the 1953 aerial photograph.
	East	Ramsey St. NE with commercial buildings beyond on the northern portion of the Property. Commercial buildings adjacent to the Property along the southern portion of the Property.
	West	As above.
1964	North	Commercial buildings, parking areas and idle land.
	South	As above.
	East	Ramsey Street NE with commercial buildings beyond along the northern portion of the Property and commercial buildings adjacent to the southern potion of the Property.
	West	As above.

Year	Direction	Observations
1969	North	Commercial buildings and parking areas.
	South	As above
	East	Commercial buildings previously noted along the northern portion of the Property have been razed, with recently graded idle land present. Land use adjacent to the east along the southern portion of the Property as in the 1964 aerial photograph.
	West	As above
1979, 1984	North	As above.
	South	8th Ave. NE with idle land use, possibly recently filled and/or graded.
	East	Ramsey St. NE with a parking lot and a commercial building present along the northern portion of the Property. Land use adjacent to the east along the southern portion of the Property as in the 1964 and 1969 aerial photographs.
	West	As above.
1984	North	As above.
	South	8th Ave. NE with idle land beyond. Possible residential buildings adjacent to the south across 8th Ave. NE along the eastern portion of the Property.
	East	As above.
	West	As above.
1991, 1997, 2000, 2003, 2008	North	As above.
	South	8th Ave. NE with apparent marina, open areas and parking lots along the western 3/4 of the Property boundary.
	East	As above.
	West	As above.

Review of the aerial photographs indicate that the side-channel of the Mississippi River was filled prior to 1969. As previously identified, the side-cannel was filled by dredging the existing Hall's Island to create the western portion of the Property in the late 1960s.

6.4 HISTORICAL MAP REVIEW

6.4.1 Historical USGS Topographic Map Review

Historic topographic maps provided by HIG were reviewed to identify past land uses and any readily apparent environmental concerns on or near the Property. USGS topographic maps reviewed for the area of the Property included: the 15-minute Minneapolis, Minnesota 1901 map and the 7.5-minute Minneapolis South, Minnesota 1952, 1967, 1972, 1977 and 1993 maps. Copies of the topographic maps are included in **Appendix K**.

Information discerned from the maps for the Property is discussed below:

Year	Description
1901	The Property is within a developed area. No specific buildings or other items are depicted on the map.
1952	Open area, no buildings or other development features shown. Western portion of the Property is a side channel of the Mississippi River and Hall's Island beyond the side channel.
1967	One building shown on the south-central portion of the Property. Railroad spur shown crossing 9th Ave. NE onto the Property.
1972, 1977	Property similar to 1967 map, however, side channel on the western portion of the Property has been filled. Hall's Island is no longer shown in the map.
1993	The building on the south-central portion of the Property has been expanded extending from 9th Ave. NE to 8th Ave. NE. Additional buildings are shown on the northeastern and northwestern portions of the Property.

The following table summarizes the review for the adjacent properties.

Year	Direction	Observations
1902	North	Land use is shown as a generally developed area. No specific buildings or other items are depicted on the map.
	South	8th Ave. NE with the area beyond shown as a generally developed area. No specific buildings or other items are depicted on the map.
	East	The area is shown as a generally developed area. No specific buildings or other items are depicted on the map.
	West	Mississippi River shown to west of the Property with area beyond shown as a generally developed area. No specific buildings or other items are depicted on the map.
1952, 1967	North	Commercial buildings and open areas shown.
	South	8th Ave. NE with open area and railroad spurs beyond.
	East	Commercial buildings and open areas beyond.
	West	Mississippi River with open areas and railroad spurs beyond.
1972, 1977	North	As above
	South	8th Ave. NE with open land beyond. Many of the railroad spurs appear to have been removed.
	East	As above.
	West	As above.

Year	Direction	Observations
1993	North	Commercial buildings and open areas.
	South	8th Ave. NE with one small building and open areas. All railroad spurs appear to have been removed.
	East	Commercial buildings.
	West	Mississippi River with commercial buildings beyond. Railroad spurs have been removed.

The maps do not identify utility pipelines or other items of readily apparent environmental concern on or near the Property.

Review of the topographic maps indicate that the side-channel of the Mississippi River was filled prior to 1972 out to Hall's Island to create the western portion of the Property in the late 1960s. Due to the source and/or quality of the fill material being unknown at this time, the fill material is considered a REC for the Property.

6.4.2 Historic Atlas Map Review

HIG provided Liesch with copies of portions of the historic atlas maps, including: Plate 7 of the 1892 Atlas, Plate 26 of the 1914 Atlas and Plate 26B of the 1940 Atlas. No publishers were noted on the Atlases. Copies of the historic atlas maps are included in **Appendix K**.

The 1892 Atlas shows the J.B. Chatterton Saw Mill on the southwestern portion of the Property and an additional saw mill on the northwestern portion of the Property. The area of the Property is also labeled "Booms Landing". A shingle mill is shown to the north and a saw mill, across 8th Avenue NE, to the south of the Property on the 1892 Atlas. No other features of environmental note were identified on the 1892 Atlas.

The 1914 Atlas shows the southern part of the Property as part of the St. Anthony Mill Co.'s Boom Landing and the southeastern part of the Property as Toxer Lumber Company with one building shown. Hall's Island shows three buildings labeled "Municipal Bathing, Play Houses". No other features of environmental note were identified on the 1914 Atlas.

The 1940 Atlas shows the Property as part of Boom Landing. No additional notations were provided in the 1940 Atlas.

Liesch's review of these maps did not identify environmental features or information not previously discussed in this Phase One ESA Report.

6.5 WELL RECORDS REVIEW

Liesch reviewed well log records from the MGS CWI, provided by HIG, for the area of the Property. No wells were identified for the Property or adjacent to the Property. A copy of HIG's response regarding well log records is included in **Appendix L**.

Liesch also reviewed the EDR Response which listed well logs for the area of the Property. The EDR Response did not identify wells on or adjacent to the Property.

6.6 DATA FAILURE

The following data failure was identified:

- Sanborn maps prior to 1885 evidencing the first use of the Property were not available.

No information was reasonably obtainable that provided information regarding the first known developed use of the Property. Liesch considers this data failure to be a data gap.

7.0 DOCUMENT REVIEW

Liesch reviewed, as part of its preparation of this Phase One ESA Report, documents provided by the Owner and Ryan, which are summarized below.

7.1 1985 Geotechnical Report

Geotechnical Exploration Program, Proposed Storage Buildings, Scherer Bros. Lumber Company, Minneapolis, Minnesota prepared for Olson Concrete Company by Soil Exploration, dated May 28, 1985 (the **1985 Geotechnical Report**). Soil borings conducted as part of the Geotechnical Report were primarily located on the portion of the Scherer Bros Lumber Company Site located north of the vacated 9th Avenue NE. However, one boring was completed on the Property, which was located on the south-central portion near 8th Avenue NE.

The soil boring log for the one soil boring completed on the Property identified fill, consisting of silty sand and clayey sand with concrete, wood and brick to a depth of 12.5 feet bgs and fill with a mixture of muck and wood from 12.5 feet to 13.5 feet bgs. Other than the fill, the 1985 Geotechnical Report did not identify items of environmental concern for the Property.

7.2 Release Investigation Report

The report entitled "Petroleum Hydrocarbon Release Investigation Report, Scherer Brothers Lumber Company, 52 Ninth Avenue NE, Minneapolis, Minnesota, MPCA Leak No. 1057"

prepared by Dahl & Associates, Inc. (**Dahl**) submitted to: Scherer Brothers Lumber Company and MPCA, dated December 10, 1989 (the **Release Investigation Report**) summarized the release detection and soil and groundwater assessment completed as part of the LUST investigation.

The Release Investigation Report identified that during removal of 10,000-gallon steel diesel fuel UST, a release of petroleum hydrocarbons was detected on May 3, 1989. The release was believed to be the result of corrosion of the UST, as evidenced by pits and holes observed in the UST.

Laboratory results from excavated materials identified petroleum impacted soils. A soil assessment of the UST basin was completed by Dahl. Eight soil borings were completed to determine the horizontal and vertical extent of the impacted soils. The ground water assessment portion of the Release Investigation Report reviewed locations of ground water wells within ½-mile of the release site.

According to the Release Investigation Report, 85 cubic yards of impacted soils were transported off-site for treatment. The soil borings identified impacted soils at the soil/ground water interface at 4200 parts per million. The Release Investigation Report concluded that ground water may be impacted from the release. The Release Investigation Report recommended additional investigation to define the extent of the ground water impacts.

7.3 Supplemental Investigation Report

The report entitled "Release Investigation and Corrective Action Report, Groundwater Assessment Supplement, Scherer Brothers Lumber Company, 52 Ninth Avenue NE, Minneapolis, Minnesota, MPCA Leak No. 1057" prepared by Dahl & Associates, Inc. (Dahl) for Scherer Brothers Lumber Company and MPCA, dated March 21, 1990 (the **Supplemental Investigation Report**). Four additional borings were completed in the vicinity of the LUST basin and were field screened and three ground water samples were collected for laboratory analyses.

The results of the ground water sample analyses identified total hydrocarbons as fuel oil in borings TB-10 and TB-11 at 200 ppm (see **Figure 4** in **Appendix A** for boring locations).

As a result, additional soils were excavated from the UST basin. The Supplemental Investigation Report stated that 155 cubic yards of impacted soils were excavated and transported off-site for treatment.

The Supplemental Investigation Report stated that no further soil remediation was recommended. One well was recommended to be installed and monitored on a quarterly basis to determine if there was a risk of impacted soils leaching into the ground water.

7.4 Dahl October 7, 1991 Letter

In a letter to the MPCA from Dahl Re: Scherer Brothers Lumber Company, 52 Ninth Avenue Northeast, Minneapolis, Minnesota. Site Identification Number LEAK#00001057, dated October 7, 1991 (**Dahl October 7, 1991 Letter**), Dahl summarized the status of the release site investigation and the results of ground water analyses from the monitoring well installed in August 1990 (see (see **Figure 4** in **Appendix A** for location of monitoring well MW-1). Ground water monitoring sampling events were completed on August 30, 1990, November 20, 1990, February 20, 1991 and June 31, 1991.

The Dahl October 7, 1991 Letter stated that with the exception of the ground water samples collected on February 20, 1991, levels of dissolved hydrocarbons were detected below the Minnesota Department of Health Recommended Allowable Limits in Drinking Water (RALs). Additionally, the Dahl October 7, 1991 Letter stated that due to the removal of the UST and the excavation of contaminated soils removing the source of the contamination, there is no longer a source for contaminant migration. The Dahl October 7, 1991 Letter recommended the closure of the LUST file and abandonment of the monitoring well.

7.5 MPCA Closure Letter

In a letter to Scherer Brothers Lumber from the MPCA Re: Petroleum Tank Release Site Closure, Site: Scherer Brothers Lumber, Minneapolis, Site ID#: LEAK00001057, dated April 17, 1992, the MPCA stated the requested work had been completed and the MPCA did not intend to require additional investigation or cleanup work. Additionally, the monitoring well could be abandoned. A copy of the MPCA Closure Letter is included in **Appendix D**.

7.6 2006 Title Commitment

Commitment to Insure from Old Republic National Title Insurance Company, Application No. OR1042082, Effective Date: December 1, 2006 (the **2006 Title Commitment**), furnished to Liesch by Ryan, the Property is owned by Scherer Limited Partnership (the **Owner**). The Title Commitment covered the entire Scherer Bros Lumber Company Site and did not identify any environmental liens. The Title Commitment identified that the Scherer Bros Lumber Company Site included reclaimed land, accretions and Hall's Island. The Title Commitment also identified railroad and utility easement rights, a reservation of minerals and mineral rights to the State of

Minnesota and rights of the public and the state to that part of the Scherer Bros Lumber Company Site lying below the natural high water mark of the Mississippi River.

7.7 2007 Survey

ALTA/ASCM Land Title Survey prepared for Scherer Bros by Lot Surveys Company, Inc. dated February 17, 2007 (the **2007 Survey**). The 2007 Survey, included as **Figure 2** in **Appendix A**, is for the Scherer Bros Lumber Company Site and includes the Property. The Survey shows that a portion of the Property is located within the FEMA 100-year Flood Zone. No additional information of environmental concern is noted on the 2007 Survey.

7.8 Ryan Phase One

Liesch on behalf of Ryan prepared the document entitled "Phase One Environmental Site Assessment, Approximate 6.08 Acre Parcel, Part of Scherer Bros Lumber Property, 9 9th Avenue Northeast, Minneapolis, Minnesota", prepared for Ryan Companies US, Inc. and Scherer Limited Partnership by Liesch, dated July 16, 2009 (**Ryan Phase One**). The Ryan Phase One was prepared for a potential redevelopment project located on the southwestern portion of the Property (the **Redevelopment Parcel**). **Figure 6** in **Appendix A** illustrates the area of the Redevelopment Parcel for the Ryan Phase One). The Ryan Phase One identified the following RECs:

- Preliminary results from a Limited Phase Two Investigation for conducted on the Redevelopment Parcel by Liesch for the Owner has identified elevated concentrations of lead, diesel range organics (**DRO**) and the volatile organic compound (**VOC**) naphthalene. Lead was reported at 10,300 milligrams per kilogram (**mg/kg**) in the soil sample from 7-feet to 9-feet bgs. The MPCA Tier 1 Soil Leachate Value (**SLV**) and Tier 2 Industrial Soil Reference Value (**SRV**) for lead are 525 mg/kg and 700 mg/kg, respectively. DRO, which does not have an MPCA action level established, was reported at 439 mg/kg. Naphthalene was reported at 0.432 mg/kg and the MPCA Tier 1 SLV and Tier 2 Industrial SRV are 7.5 mg/kg and 28 mg/kg, respectively. The release for these findings was reported to the Minnesota State Duty Officer on July 13, 2009 on behalf of the Owner.

- The western portion of the Redevelopment Parcel was formerly a side-channel to the Mississippi River and Hall's Island. The side channel was filled in the late 1960s. The source of the fill is unknown and no analytical information is known to have been completed for the fill material. Based on the unknown characteristics of the fill material, the fill is considered a REC for the Redevelopment Parcel.

One historic REC was identified for the Redevelopment Parcel:

- A LUST site (LEAK NO: 1057) is located adjacent to the east of the Redevelopment Parcel on a portion the Scherer Bros Lumber Company Site. The MPCA issued closure of this LUST site on April 17, 1992. Closed LUST sites do not require additional investigation or remediation.

The following items of environmental note were identified for the Property.

- The **Scherer Brothers Lumber** LUST site is located up-gradient of the Redevelopment Parcel. Review of the MPCA LUST file for the **Scherer Brothers Lumber** LUST site identified residual petroleum impacts to soil and ground water were present. Due to the **Scherer Brothers Lumber** LUST site being adjacent to the Redevelopment Parcel, and the reported residual petroleum contamination reported for the soil and ground water, the **Scherer Brothers Lumber** LUST site is considered a potential vapor intrusion condition (**pVIC**) for the Property.

- The Redevelopment Parcel is a licensed generator of hazardous waste and reports under the Minnesota Department of Public Safety's Tier 2 requirements. The hazardous generators license is for the generation of bulbs, ballasts and waste oil. The Tier 2 reporting is for the storage of diesel fuel and gasoline in USTs located adjacent to the Redevelopment Parcel.

- A UST was formerly located adjacent to the northern boundary of the Redevelopment Parcel (located on the Property). The UST was used to fuel delivery trucks for the Scherer Bros Lumber Company. The UST was removed in the late 1970s or early 1980s. No record of leaks were reported for the UST, however, no analytical information was collected to determine if there were any impacts to the soils and/or ground water.

- Historical information identified a shingle mill and cedar post sawing mill on the southwest corner of the Redevelopment Parcel. A tank (no size or contents listed) and a chimney were noted in association with the mill.

- Information reviewed from the City Directories identified a variety of commercial/industrial land use in the area of the Redevelopment Parcel. Based on the review of the City Directories, it was not readily ascertainable if these commercial/industrial activities may have resulted in impacts to soil and/or groundwater.

- A possible wetland area was noted in the EDR Response located either on or adjacent to the northwest corner of the Redevelopment Parcel along the Mississippi River.

- Suspect PCB containing items such as fluorescent light ballasts, compressors and transformers were observed on the Redevelopment Parcel.

- Ozone depleting chemicals were observed on the Redevelopment Parcel in roof-mounted air conditioning units, and refrigerators.

- Possible ACM) lead-based paint (LBP), mercury switches, fluorescent lamps and regulated wastes were observed on the Redevelopment Parcel.

- Miscellaneous chemicals were observed on the Redevelopment Parcel.

7.9 Scherer Phase Two

Liesch on behalf of Scherer prepared the document entitled "Limited Phase Two Environmental Site Assessment, Approximate 6.08 Acre Parcel, Part of Scherer Bros Lumber Property, 9 9th Avenue Northeast, Minneapolis, Minnesota", prepared for Scherer Limited Partnership and Ryan Companies US, Inc., dated October 22, 2009 (**Scherer Phase Two**). Based on the results of the Scherer Phase Two, the following areas were identified as exhibiting environmental concern.

- Elevated lead and Benzo(a)Pyrene (**BaP**) Equivalents, exceeding the MPCA Tier 1 Soil Leachate Values (**SLVs**) and/or MPCA Tier 2 Industrial Soil Reference Values (**SRVs**), were noted in soil samples in the area of soil borings B-3 and B-4 (see **Figure 5** in **Appendix** A for locations). This area corresponds to the general area where historical information, as reported in the Ryan Phase One, identified a shingle mill and cedar post sawing mill on the southwest corner of the Redevelopment Parcel. A tank (no size or contents listed) and a chimney were noted in association with the mill. The clinkers reported in the soils in B-3 and B-4 may have been associated with the chimney reported for the shingle mill and cedar post sawing mill.

- Elevated DRO was noted in soil samples from B-1 through B-9 on the Redevelopment Parcel. The source of the DRO on the Redevelopment Parcel is not definitively known. However, the presence of DRO identified in the soils may be associated with the fill brought onto the western portion of the Redevelopment Parcel which was formerly a side-channel to the Mississippi River and Hall's Island. The side channel was filled in the late 1960s. The source of the fill is unknown.

- All soil samples on the Redevelopment Parcel identified fill ranging from 2.5 feet to 19 feet bgs. Debris in the fill material was noted to contain concrete, brick, asphalt, wood, foundry sand, clinkers, ash, glass and rubber.

- Asbestos was identified in a soil sample from soil boring B-12, which was located to the north of the Redevelopment Parcel on the Property.

8.0 CONCLUSIONS

Based on Liesch's assessment and a review of information obtained, no recognized environmental conditions (**RECs**), as defined in the ASTM Standard Practice E1527-05, were identified for the Property except for the following:

- Results from an October 2009 Limited Phase Two Investigation prepared for Scherer by Liesch (the **Scherer Phase Two**), which was conducted primarily on the southwestern portion of the Property, identified elevated concentrations of lead, diesel range organics (**DRO**) and the volatile organic compound (**VOC**) naphthalene. Lead was reported at 10,300 milligrams per kilogram (**mg/kg**) in the soil sample from 7-feet to 9-feet bgs. The MPCA Tier 1 Soil Leachate Value (**SLV**) and Tier 2 Industrial Soil Reference Value (**SRV**) for lead are 525 mg/kg and 700 mg/kg, respectively. DRO, which does not have an MPCA action level established, was reported at 439 mg/kg. Naphthalene was reported at 0.432 mg/kg and the MPCA Tier 1 SLV and Tier 2 Industrial SRV are 7.5 mg/kg and 28 mg/kg, respectively. The release for these findings was reported to the Minnesota State Duty Officer on July 13, 2009 on behalf of the Owner. (**Sections 7.8** and **7.9)**

- Results from the Scherer Phase Two conducted on the Property identified asbestos in a soil sample collected from the surficial soils on the west-central portion of the Property. (**Section 7.9)**

- A 560-gallon waste oil UST was removed by Dean's Tank, Inc. on May 2, 1999. Confirmation sampling was reportedly completed by Peer Environmental and Engineering, Inc. (**Peer**). However, the Owner was unable to locate copies of the confirmation sampling results. (**Section 5.2**)

One historic REC was identified for the Property:

- A portion of the Property is a MPCA LUST site (LEAK NO: 1057) and the tank release area is located adjacent to the southwest portion of Building 4 (the vehicle maintenance garage) on the southeastern portion of the Property (see **Figure 4** in **Appendix A** for

location). The parcel address for the LUST site is 52 9th Avenue NE. The MPCA issued closure of this LUST site on April 17, 1992. Closed LUST sites do not require additional investigation or remediation. However, if redevelopment is planned for this area, the residual impacted soils may require additional assessment. **(Section 4.1)**

The following items of environmental note were identified for the Property.

- The Property is a licensed generator of hazardous waste and reports under the Minnesota Department of Public Safety's Tier 2 requirements. The hazardous generators license is for the generation of bulbs, ballasts and waste oil. The Tier 2 reporting is for the storage of diesel fuel and gasoline in USTs located on the Property. **(Sections 4.1** and **5.2)**

- An UST was formerly located adjacent to the southwestern portion of Building 6 on the Property (see **Figure 5** in **Appendix A** for location). The UST was used to fuel delivery trucks for the Scherer Bros Lumber Company. The UST was removed in the late 1970s or early 1980s. No record of leaks were reported for the UST, however, no analytical information was collected to determine if there were any impacts to the soils and/or ground water. A soil boring completed adjacent to the former UST basin did not find readily apparent impacts **(Sections 5.2** and **7.9)**

- Historical information identified a shingle mill and cedar post sawing mill on the southwest corner of the Property. A tank (no size or contents listed) and a chimney were noted in association with the mill. **(Section 6.1)**.

- The western portion of the Property was formerly a side-channel to the Mississippi River and Hall's Island. According to representatives of Scherer, Hall's Island was dredged and moved east to expand the western side of the Property. **(Sections 6.1, 6.3** and **6.4)**

- Information reviewed from the City Directories identified a variety of commercial/industrial land use in the area of the Property. Based on the review of the City Directories, it was not readily ascertainable if these commercial/industrial activities may have resulted in impacts to soil and/or groundwater. **(Section 6.2)**

- A possible wetland area was noted in the EDR Response located either on or adjacent to the northwest corner of the Property along the Mississippi River. **(Section 3.3)**

- Suspect PCB containing items such as fluorescent light ballasts, compressors and transformers were observed on the Property. **(Section 5.1)**.

- Ozone depleting chemicals were observed on the Property in roof-mounted air conditioning units, and refrigerators. (**Section 5.1**)

- Possible ACM) lead-based paint (LBP), mercury switches, fluorescent lamps and regulated wastes were observed on the Property. (**Section 5.1**).

- Miscellaneous chemicals were observed on the Property. (**Section 5.1**)

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal Delisted NPL site list

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 06/29/2009 has revealed that there are 2 Delisted NPL sites within approximately 1.25 miles of the target property.

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 06/30/2009 has revealed that there are 2 CERCLIS sites within approximately 0.75 miles of the target property.

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 7 CERC-NFRAP sites within approximately 0.75 miles of the target property.

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-TSDF sites within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

SHWS: The Superfund Site Information Listing records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Minnesota Pollution Control's Superfund Permanent List of Priorities.

A review of the SHWS list, as provided by EDR, and dated 05/20/2009 has revealed that there are 6 SHWS sites within approximately 1.25 miles of the target property.

State and tribal Brownfields sites

BROWNFIELDS: Purchasing, selling, or developing property can present a special set of obstacles if the property is contaminated with chemicals. The Petroleum Brownfields Program is one of several programs within the Minnesota Pollution Control Agency (MPCA) designed to help people address these obstacles. The purpose of

the Petroleum Brownfields Program is to provide the technical assistance and liability assurance needed to expedite and facilitate the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum.

A review of the BROWNFIELDS list, as provided by EDR, and dated 09/30/2008 has revealed that there are 2 BROWNFIELDS sites within approximately 0.75 miles of the target property.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 50 RCRA-NonGen sites within approximately 0.5 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 61 EDR Historical Auto Stations sites within approximately 0.5 miles of the target property.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 20 EDR Historical Cleaners sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A

GRACO INC (Continued) **1000176612**

CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GRACO INC (Continued) **1000176612**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A

GRACO MINNESOTA INC. - TECHNICAL CENTER (Continued) **1000176625**

CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

COLOPLAST MANUFACTURING US LLC (Continued) **1000180069**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Comments:	**No File**\\n Spill cause is under investigation, spill was discovered this morning. Spill had been on-going for a couple days. Material from a metal plating business came up out of a sanitary sewer manhole, went across a street, through a ditch, and into a storm drain. Nothing recoverable, sampling is needed to determine the extent of contamination and to support a potential enforcement case.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

PIONEER METAL FINISHING (Continued) **1000312357**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

UNION SCRAP IRON & METAL CO (Continued) **1000337744**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Summary Details:

Conditions at listing September 1983): Union Scrap Iron Metal Co. sorted and crushed lead battery fragments on a l-acre site in Minneapolis, Minnesota, from l973 through l980. Lead was separated and sold for recycling. The plastic and rubber fragments remaining, which also contain lead, accumulated in piles, which are partially covered with tarpaulins. Presently, an estimated 30,000 tons of these fragments are on the site. According to the State, airborne lead levels adjacent to the site significantly exceed background levels. There is also potential for ground water and surface water contamination. In a Stipulation Agreement signed with the State on Aug. 22, l983, Union Scrap agreed to remove the pilesby December 1984 and conduct a soil contamination study. Status June 1984): Union Scrap submitted plans for removal of the piles and for the soil contamination study. The plastic and rubber fragments will be sieved to remove lead fragments, which will be recycled at Poly Metals, Inc., in St.

Paul, Minnesota. The sieved plastic will be sold for recycling. The rubber fragments will be used as an additive in asphalt paving material.
