

Elmer Says... Trees Love Water!

Just like you, trees need water to stay healthy. Trees can get water from rain, but they need your help, too!

What YOU Can Do!

When it is sunny and warm, trees get hot and thirsty, just like you!

You can use a bucket or a hose to water your tree when it gets hot and dry!

What Nature Does!

Trees love the rain! It helps them get big and strong.

Trees absorb water through their roots, sending it all the way up to the leaves!

Elmer Says... Water Trees Weekly!

We help trees.
