DATE: November 15, 2018  
LOCATION: Farview Park  
PROJECT: 26th Ave. Overlook and Shoreline Enhancement  
SUBJECT: Public Open House Minutes

1. Public Open House Comments:
   - Generally, the design direction was well received. Sensing river in some way was important.
   - Access to river down the water level was mentioned.
   - Bike way connection and trail network to the overlook was important.
   - 26th Ave. Bikeway is well used up to Farview Park currently from North Minneapolis. Attraction down to the river is needed to extend the use.
   - 2nd and 26th intersection is used by bikers currently.
   - Photo Center and other art related businesses a block south of 26th Avenue.
   - Fishing opportunities desired but not limited to the location
   - Community wanted to see it happen soon rather than planning and pictures
   - Suggestion for creative intervention along the bikeway to direct and invite people to the Overlook. Suggestion to use telephone phones on 26th Ave after Washington to create a light pattern, playing off the beacon
   - Suggestion for a formal presentation instead of the open house format
