

Addendum #1: Response to Questions to 2019 Water Chemistry Lab RFP

- 1. If we do not perform one of the tests do you want us to state that we do not perform (DNP) it or find someone to sub contract to?**

For the purposes of this RFP, MPRB staff request that, if a lab does not perform a test, the lab find a sub-contractor to complete the analysis.

Include in the Proposal:

1. who will be doing the analysis
2. cost of that analysis (including any shipping costs)
3. any additional reporting time that may be associated with the sub-contracted analysis

Labs should note in the Proposal if they choose not facilitate a subcontractor for analysis that they do not perform.
