Questions and Answers

Minneapolis Park and Recreation Board
Asset Management
Waste and Recycling Container & Collection Services

Processing and Disposal Services
VENDORS: acknowledge in your proposal that you have reviewed and integrated this additional guidance into your proposal and cost estimate.

ADDITIONAL requirements: for the 96-gallon containers the vendor shall indicate that they will provide routine cleaning of the containers based on requests from the MPRB project manager or their assigned representative. For cost estimating purposes assume each container shall be cleaned two (2) times per year.

QUESTION 1
If the quantity of containers is more than 1 should the unit price represent all containers being serviced or just one? For example, page 19 of 42 lists 4-30-yard roll off containers for C&D.
ANSWER QUESTION 1
The bid shall be a cost per each container as a next day request maybe to remove the waste from one container and not all containers due to nuisance or other reasons.

GENERAL ANSWER TO ALL WASTE SERVICES
IF MULTIPLE Containers are serviced based on a trip to the site a reduction of price should be identified in the proposal. Illustrate clearly in the proposal a % discount based on servicing each additional container per site as applicable.

QUESTION 2
Roll-off containers can have a varied amount of tons dependent upon the waste. Should the unit price for roll-off containers have a haul + ton pricing scheme or a flat rate that includes or assumes 4 tons of material?
ANSWER QUESTION 2
The bid / vendor cost estimate should identify a price per each roll-off container and then a schedule of cost for tonnage of waste. In addition, the vendor shall describe in their proposal their process to weigh the waste materials including demonstrated certified weights of their vehicles used for services to the MPRB.

QUESTION 3
What do you consider a small, medium and large containers?
ANSWER QUESTION 3
The proposal shall identify the actual size of these containers within their proposal. The cost estimate shall identify the cost for the containers based on the vendors assumed size of container.

QUESTION 4
There are a few services that have more than one 96-gallon cart per location. Should our unit price assume all containers will be serviced during each service event or should we submit unit pricing for 1 container and depending upon how many containers are full at the time of service that’s what we will charge?
ANSWER QUESTION 4
Assume that you may get called for service per each 96-gallon cart due to nuisance or type of materials in the containers. Estimate shall be for each container within the site.

GENERAL ANSWER TO ALL WASTE SERVICES
IF MULTIPLE Containers are serviced based on a trip to the site a reduction of price should be identified in the proposal. Illustrate clearly in the proposal a % discount based on servicing each additional container per site as applicable.

QUESTION 5
On page 24 of 42 this question is in reference to the table. You have recycled waste 1x/wk. service quantity 7 listed on the 5th, 6th and 7th lines. What size containers are you referring to?
ANSWER QUESTION 5
Refer to the tables on page 23 identifying the size of containers and the frequency noted for each size of container. The totals on Table M reflect a summary from tables I, J, K and L.
