Closing the Gap: Investing in Neighborhood Parks (Closing the Gap) is an initiative of the Superintendent and Commissioners to share information with Minneapolis residents and partners about the current condition and service level of neighborhood parks, and gather information about investment priorities for replacement, operating, and maintenance of existing park assets. It looks at the impacts of the age of the system and deferred maintenance — or delaying regular upkeep past the point of repair — has had on the 157 neighborhood parks in Minneapolis. This report articulates the key findings of the engagement that has been conducted from February through October 15, 2015.

Minneapolis’ neighborhood parks have the greatest number of physical assets that require greater resources to operate, maintain, and replace. To sustain the current level of physical assets in the park system the MPRB needs $14.3 million plus inflation each year to meet capital investment needs. The MPRB currently has $4-5 million per year to invest in these assets. The current annual capital gap is $9.3 million plus inflation. The neighborhood parks also require annual investments to operate them to industry standards for activities such as mowing, building maintenance, tree pruning, roof repairs, and path repairs. The current operational gap is a minimum of $3 million plus inflation per year.

A spectrum of community engagement methods and communications tools were used to share and collect information for the Closing the Gap imitative. The engagement methods were a resident phone survey, community meetings, intercept events, online and paper survey, and stakeholder meetings. The communications tools that were used for the initiative included informational materials, a webpage, and notifications (delivered by new releases, govdelivery notices, ads in local papers, and stakeholder contact lists).

Key Findings

Much of the engagement for Closing the Gap was conducted in collaboration with RecQuest (which focuses on recreation centers) and Service Area Master Plans (which focuses on the outdoor facilities in neighborhood parks) initiatives. This allowed for a collaborative, robust engagement process. This report, however, articulates the key findings of the engagement that relates to Closing the Gap, such as ideas for funding strategies and how well the current programs, services, recreation centers, and outdoor park facilities are serving residents. Significant information was collected during this time period that is critical to the success of RecQuest and Service Area Master Plans, a complete analysis of that information will be used and reported in the respective reports for those projects. Below are the key findings as they relate to Closing the Gap.

Funding Ideas and Strategies Sponsorships, donations, additional vendors/concessions, and partnerships were supported across the engagement. Expressions of support, however, were typically accompanied with a desire to ensure the sponsors, donors, potential vendors, and partners are well matched to the mission and values of the Minneapolis park and recreation system. Across the engagement methods participants expressed a willingness to address the funding gap through an increase in property taxes. The support for maintaining the system was higher than the support for enhancing it. The Morris Leatherman Company indicated that responses to the resident survey revealed that judicious improvements or expansion would be seen as part of a greater “maintenance” effort.
**Programs/Services** The most common theme that emerged across the engagement methods was the support for youth programming and sports. Respondents of the resident survey and online/paper survey indicated that youth sports and programs, and police protection in parks are important. Adventure recreation, and adult programs and sports were typically least important among these respondents. Community meeting and intercept respondents expressed the need for diversity in and different types of programs. Community meeting participates also articulated a need for more programming that is customized to the demographics of a community.

**Recreation Centers** Across many of the engagement methods, participants expressed the need to make recreation centers more welcoming, comfortable, and safe. These recommendations ranged from providing working air conditioning to amenities such as coffee kiosks. In the online/paper survey and community meetings respondents provided insights into what is needed at recreation centers. Gymnasia and fitness areas were most commonly identified in the responses to this question. Based on the responses from the community meetings, there is some variation in views for centers across the city. It appears that there is a greater desire for enhanced facilities with greater amenities in southwest, safety was a priority in north, and multi-use spaces were discussed in downtown, north, northeast/southeast and south. In some cases, participants indicated that more, better or larger facilities are needed to be able to address the variety of recreation options desired.

**Outdoor Facilities and Assets** Resident needs and perceptions of outdoor assets and facilities varied by engagement method and location of the city. In general, playgrounds, athletic fields, dog parks, ice rinks, and wading pools were considered important. A common theme that emerged across community meetings and online/paper survey respondents was the desire to introduce more natural areas, paths, nature play, gardens, and trees into neighborhood parks. The importance of restrooms, functioning drinking fountains, and/or benches was raised in each service area during community meetings.

**Maintenance and Care** The resident survey provided an overall look at the perceptions of maintenance and care of the park system. It indicated that 94% of residents think the maintenance and appearance of the park system is good or excellent. The community meetings and online/paper survey provided opportunities to learn more about which maintenance and care services might be most important. Respondents to both methods indicated that waste pickup and removal, and playground maintenance and safety were most important. These respondents also indicated that landscape care and mowing were least important.
Throughout 2015, the Minneapolis Park and Recreation Board (MPRB) has been undergoing what may be the most comprehensive planning effort in its 130 year history. Minneapolis residents have been encouraged to get involved and help the MPRB with three distinct, yet deeply intertwined projects: RecQuest, Service Area Master Plans, and Closing the Gap: Investing in our Neighborhood Parks (Closing the Gap). RecQuest is the MPRB’s in-depth assessment of its recreation centers. Service Area Master Plans focuses on the future of the outdoor facilities within the parks.

Closing the Gap: Investing in Neighborhood Parks is an initiative of the Superintendent and Commissioners to share information with Minneapolis residents and partners about the current condition and service level of neighborhood parks, and gather information about investment priorities for replacement, operating, and maintenance of existing park assets. It looks at the impacts that the age of the system and deferred maintenance — or delaying regular upkeep past the point of repair — has had on the 157 neighborhood parks in Minneapolis.

This report articulates the key findings of the engagement that relates to Closing the Gap, such as ideas for funding strategies and how well the current programs, services, recreation centers, and outdoor park facilities are serving residents. Significant information was collected during this time period that is critical to the success of RecQuest and Service Area Master Plans, a complete analysis of that information will be used and reported in the respective reports for those projects.

**Capital Gap**

Neighborhood parks have greatest number of physical assets that require greater resources to operate, maintain, and replace. These assets range from outdoor amenities such as wading pools and playgrounds to structural and property infrastructure including recreation centers, roofs, windows, parking lots, and much more. To sustain the current level of physical assets in the park system the MPRB needs $14.3 million plus inflation each year. The MPRB currently has $4-5 million per year to invest in these assets. Looking back at capital investments made from 2000 to 2015, the capital funding gap for neighborhood parks has grown to $111 million. The current annual capital gap is $9.3 million plus inflation.

Unless the replacement and preventative maintenance costs associated with the neighborhood park system’s infrastructure are addressed, the backlog and costs will continue to increase. Assuming the current funding levels remain constant, the capital funding gap will grow an additional $46 million from 2016-2020 and by 2040 the capital gap will be over $461 million.

**Park Maintenance and Care Gap**

Park attendance, usage, and demand for enhanced programs and services have all been increasing on an aging park system, while at the same time budget reductions were enacted to manage funding shortfalls and rising expenses. These budget reductions have contributed to increased maintenance and care and capital funding gaps in the park system. From 2003-2012, the workforce was reduced by 136 full-time positions (23 percent); since 2013 the Park Board has been able to add 28 full-time positions back to the workforce, leaving the organization with 18% fewer full-time positions today. During that same time period, the staffing losses were coupled with reductions in park maintenance and care resources, creating significant challenges for the MPRB to keep up with the annual needs of neighborhood parks. Today, the annual maintenance and care gap for neighborhood parks is over $3 million, with that number increasing each year due to inflationary cost increases and increased usage in Minneapolis’ neighborhood parks. (Table 1)

**Table 1. Examples of Maintenance and Care Gaps in the Neighborhood Park System**

</tbody>
</table>
To reach a broad audience, a spectrum of community engagement methods and communications tools were used to share and collect information for the Closing the Gap initiative from February through October 15, 2015. The engagement methods were a resident phone survey, community meetings, intercept events, online and paper survey, and stakeholder meetings. The communications tools that were used for the initiative included informational materials, a webpage, and notifications (delivered by new releases, govdelivery notices, ads in local papers, and stakeholder contact lists).

**Engagement**

Each engagement method is described below.

**Minneapolis Park and Recreation Board 2015 Residential Survey:** This survey was completed in early 2015 by the Morris Leatherman Company, a research firm located in Minneapolis (Attachment A). A random sample of 500 residents shared their perspectives about current and future park needs and issues. Care was taken by The Morris Leatherman Company to ensure respondents represented the demographics of the city for race and ethnicity, household type, and renter versus owner. The survey was administered by phone (land lines and cell phones). When necessary, language interpreters were engaged to help individuals complete the survey. Questions focused on perceptions of the entire park and recreation system, usage of the park and recreation system, demographic data, and perceptions of different funding strategies. The results of this survey are statistically valid and can be considered representative of the city as a whole.

**Community Meetings:** These meetings provided community members with the opportunity to learn about the neighborhood park funding gap, RecQuest, and Service Area Master Planning and to provide input into these projects. In each meeting, a presentation (Attachment B) provided the background for the capital and operational funding gap for the system, and citywide and park specific capital gap information about individual parks through park profiles (Attachment C). In total, 31 meetings were held. After the presentation, participants were asked a range of questions that focused on funding strategies and ideas, perceptions of parks and recreation centers, what does and doesn’t work at parks and recreation centers, which programming and facilities are desired, and priorities for maintenance and care of the system (Attachment D). MPRB staff facilitated the discussions and took notes summarizing participants’ responses and comments.

Prior to holding the meetings staff held a kick-off meeting for neighborhood organization staff to learn about the initiative and to gather insights about how to make the meetings most valuable to residents. Neighborhood organization staff were very helpful in providing input that shaped the content and design of the meetings and in notifying residents of the meetings.

Similar to the kick-off meeting for neighborhoods, several meetings were held for MPRB staff to learn more about the funding gap and the information that was or would be shared in the community meetings. Staff were instrumental in helping identify questions that would be asked by the community. The frequently asked questions document was created based on their questions (Attachment E).

This method does not produce statistically valid information; it represents qualitative, anecdotal evidence of priorities noted among community meeting respondents. It does, however, provide an interactive opportunity to delve into greater detail on questions that were asked in phone, paper or online surveys. This information, when combined with statistically valid information, provides a more robust picture of the preferences and needs of the community.

**Intercepts/Events:** Intercepts take the engagement process to community events that are already occurring and to locations where people already gather. Using posters with questions people can contribute feedback on the spot (Attachment F). Participants used stickers on posters to answer questions about funding strategies and maintenance priorities. These posters were typically paired with others that focused recreation centers and/or the outdoor assets of neighborhood parks (Attachment G). Staff was on hand to provide assistance. The posters that included translation were developed, as needed.

Intercept events were held throughout the city and, at several of the community meetings, the posters were brought out into the park to collect information from patrons that were engaged in activities within the park. In total, intercepts were conducted at 24 events, including cultural events (Falling Water Festival, Monarch Festival), neighborhood-based events and festivals (MPRB movies in the park, Luxton Summer Celebration, West Bank Block Party, Corcoran neighborhood BBQ, Central Gym Family Fun Day), and broader community celebrations (Minneapolis Urban League Family Day, Battle of the Badges cook-off, multiple Open Streets events).

Like the community meetings, this method does not produce statistically valid information; it represents the opinions and thoughts shared by those who completed an intercept versus the city as a whole. The information, however, when combined with results of other methods helps build the overall awareness and depth of knowledge about the preferences and needs of the community.
Online and Paper Survey: This survey was available online and by paper (Attachment H) through September 30, 2015. Like the resident phone survey, the questions focused on perceptions of the park and recreation system, usage of the park and recreation system, demographic data, and perceptions of different funding strategies. The survey was available on the Closing the Gap webpage, at community meetings for the initiative, and at recreation centers. Readily available throughout the city, the questionnaire provided a simple and convenient way for residents and park visitors to participate in the engagement process.

This method does not produce statistically valid information; it represents the opinions and thoughts shared by those who completed a survey versus the city as a whole. The information, however, when combined with results of other methods helps build the overall awareness and depth of knowledge about the preferences and needs of the community.

Stakeholder Meetings: These meetings focused on the MPRB’s partners or underserved/under-represented populations. Each meeting was tailored for the needs of the organization or the MPRB’s relationship with the organization, including Asian Media Access, Mujeres en Accion, Phillips Community Center tenants, YMCA, Phyllis Wheatley, and Youth Coordinating Board.

The primary focus of these meetings was to share information and identify future opportunities to gather input from the individuals the partner or stakeholder services. In a few meetings, data was collected using the same questions that were used in the community meetings. Where applicable, that data was added into the community meetings findings.

Communications

Each communication tool is described below.

Informational Materials: Informational materials were developed and distributed in the public meetings, stakeholder meetings, staff meetings, and online. These materials were:
- A fact sheet about the project (Attachment I);
- Two budget information sheets (Attachments J and K);
- A frequently ask questions sheet (Attachment E); and
- Funding profiles for each neighborhood park with significant assets and a citywide profile of neighborhood parks (see Attachment C for an example).

Webpage: To reach residents across the city and provide consistent information about the neighborhood park funding gap staff developed a webpage that provided links to materials shared in the meetings, a link to the online survey, history about the project, information about engagement opportunities, the resident survey results, and the funding profiles that were developed for the neighborhood parks. In September, to help community members who were not able to attend a meeting where they could learn more about the initiative, a video of the presentation that was provided at each community meeting was posted on the webpage in both a long and short version.

Notifications: Throughout the initiative the MPRB shared key information through new releases, GovDelivery notices, ads in local papers, and stakeholder contact lists. GovDelivery is the MPRB’s electronic notification software that shares information with individuals who have requested to be kept informed on topics of their choice. The stakeholder contact list was developed by our Community Outreach and Assess unit and consists of key partners or organizations within each service area of the city. Staff also identified, using ActiveNet, park patrons for each service area and sent notifications to them about how to participate.
Participation Statistics

Resident Survey
500 respondents
Considerations for the findings for this method:
- The findings are statistically valid.
- The findings are representative of the city as a whole.
- The respondents are geographically balanced across the city.
- The respondents reflect the race/ethnicity, household type, and rent versus owner demographics of the city.

Community Meetings
322 attendees
Considerations for the findings for this method:
- There is a greater representation of respondents from south and southwest Minneapolis.
- The results cannot be generalized across the larger population of Minneapolis.
- The trends identified provide another data point for uncovering community priorities for the future of Minneapolis parks and recreation.
- The findings should be compared to findings from other engagement activities.

Intercepts
24 events (participation varied, with 10-100 participants per event)
Considerations for the findings of this method:
- Service area master plan data is collected primarily with in the particular service area that the intercept was held.
- RecQuest data is collected across the city.
- The tool is very successful in reaching underserved/under-represented populations and those that have minimal time to devote to engagement processes.
- The results cannot be generalized across the larger population of Minneapolis.
- The trends identified provide another data point for uncovering community priorities for the future of Minneapolis parks and recreation.
- The findings should be compared to findings from other engagement activities.

Online/Paper Survey
354 respondents (260 online and 94 paper)
Considerations for the findings of this method:
- There is a greater representation of respondents from south and southwest Minneapolis.
- The results cannot be generalized across the larger population of Minneapolis.
- The trends identified provide another data point for uncovering community priorities for the future of Minneapolis parks and recreation.
- The findings should be compared to findings from other engagement activities.

Stakeholder Interviews
7 meetings
Considerations for the findings of this method:
- In a few meetings, data was collected using the same questions that were used in the community meetings. Where applicable, that data was added into the community meetings findings.
Funding Ideas and Strategies

Sponsorships, donations, additional vendors/concessions, and partnerships were supported across the engagement for addressing the funding gap. Expressions of support, however, were typically accompanied with a desire to ensure the sponsors, donors, potential vendors, and partners are well matched to the mission and values of the Minneapolis park and recreation system. Naming rights were supported in the resident survey but were less supported in methods that are not statically valid. Across the engagement methods participants expressed a willingness to address the funding gap through an increase in property taxes. The support for maintaining the system was higher than the support for enhancing it. The Morris Leatherman Company indicated that responses to the resident survey revealed that judicious improvements or expansion would be seen as part of a greater “maintenance” effort. Increasing fees for youth or adult programs and services received the most opposition throughout the process, and suggestions to increase fees were commonly paired with the concept of providing scholarships for those that could not pay the fee. Common themes of the community meetings that were not included in the other methods were the desire to reduce the number of assets (such as golf courses), and to strategically tap into the resources within the community, and to apply technologies that make the system more efficient (such as investing in renewable energy).

Resident Survey Results

The resident survey revealed that Minneapolis residents are supportive of several revenue generating strategies including additional concessions or vendors, partnering with private organizations, corporate sponsorships, and naming rights. There was also support, but to a lesser degree, for increasing program fees for adults and youth, and assessments to property owners along parkways for parkway improvements (Figure 1).

The survey also revealed that residents are supportive of increasing taxes to maintain the current service level provided by the MPRB. According to The Morris Leatherman Company, support for a property tax increase to maintain the park and recreation system is very high and judicious improvements or expansion would be seen as part of a greater “maintenance” effort (Figure 2).

Community Meeting and Intercept Results

During the community meetings, participants were asked “What ideas or funding strategies should the MPRB consider to solve the funding gap for neighborhood parks?” At seven intercept events, park patrons responded to an intercept poster that focused on preferred funding strategies. The summary of these methods are combined below and fall into five major themes. The findings provide qualitative, anecdotal evidence of priorities noted among community meeting and intercept event respondents. The community meeting and intercept event findings should be compared to findings from other engagement activities.

Look to the state, city, and taxpayers for funding. Community meeting respondents answered that additional funding for neighborhood parks could come through a variety of government-based channels, such as “increased city and state funding,” “state bonding,” and “neighborhood assessments.” Additional specific funding sources included allocating any remaining funds from the City of Minneapolis’ Neighborhood Revitalization Program, “lottery funds,” and a greater allocation of the City of Minneapolis’ budget. In all areas of the city, respondents suggested that a dedicated park referendum would be an appropriate funding approach. Those that completed the intercept posters also supported increasing property taxes.

Seek capital from alternative sources. Looking for funds from alternative sources was raised as a viable funding strategy across the city. Community meeting responses ranged from fundraising (memberships similar to MPR), seeking park sponsorships (from a variety of sources), grants, donations, endowments, naming rights for buildings and facilities, advertising in buildings, fields and ice rinks, and additional concessions, including lifting the ban on alcohol so
more events can take place in neighborhood parks. Respondents also mentioned raising fees for vendors and permits, and raising fees for activities and programs that are non-sustainable (but ensuring scholarships are available for those in need). While sponsorships were mentioned multiple times, respondents also noted that the sponsoring organizations need to be a good fit for MPRB. Those that completed the intercept boards for this question supported additional concessions (like Sea Salt) more than additional vending opportunities (food trucks) and didn’t want additional rental opportunities (fields, rooms, canoes). Intercept respondents supported increasing adult sport and program fees.

**Look to community partners.** Partnering with a variety of community organizations was raised as a way to cut costs (schools, YMCA, YWCA, neighborhood associations, churches, professional sports teams). Options respondents identified for partnering included sharing resources, spaces, labor, and dedicated fundraising.

**Lighten the load.** Selling underused properties or facilities was raised, including Meadowbrook Golf Course. Also, before deciding to renovate or replace facilities and amenities, determine if replacement is necessary (how often it is used?). Discontinuing golf (if not profitable) and selling courses was raised.

**Be strategic and think long-term.** Suggestions included investing in renewable energy to save money in the future, increasing use of volunteers for neighborhood park maintenance, shifting from maintained park areas to natural to lessen maintenance, and creating a foundation for each neighborhood park.

**Online and Paper Survey Results**

Online and paper survey respondents favor partnerships with private organizations, sponsorships, concessions/vendors/rental opportunities, and property tax increases to maintain current service levels over program fee increases (adult or youth), naming rights, and property tax increases for enhancements (see Figure 3). More specifically:

**Closing the Gap survey respondents are opposed to increasing fees for youth sports and programs.** Over half of respondents (57%) oppose increased fees for youth programs. This parallels early findings from other engagement activities.

**Closing the Gap survey respondents generally support partnerships for funding.** Corporate sponsorships, partnerships with private organizations and opportunities for concessions/vendors/rentals were among the most supported funding methods. Allowing the purchase of naming rights was the least popular of these funding methods.

**Closing the Gap survey respondents generally support an increase in property taxes.** Nearly two-thirds support an increase in property taxes to maintain (65%) or enhance (60%) the MPRB services levels.

![Figure 3. Online and Paper Survey Responses to Funding Methods](image-url)
**Programs/Services**

The most common theme that emerged across the engagement methods was the support for youth programming and sports. Respondents of the resident survey and online/paper survey indicated that youth sports and programs and police protection in parks are important. Adventure recreation and adult programs and sports were typically least important among these respondents.

Community meeting and intercept respondents expressed the need for diversity in and different types of programs. Community meeting participants also articulated a need for more programming that is customized to the demographics of a community. When asked what would encourage more use of recreation centers or parks, through intercepts and the online/paper survey, low cost or free programming rated the highest.

**Resident Survey Results**

The resident survey revealed that Minneapolis residents find all of the services specified in the survey were important to them and/or their household. Youth and safety services rated the highest. Those that were less important (yet still important overall) were adult services, intergenerational programming, and adventure recreation (Figure 4).

**Figure 4. Resident Survey Responses to Importance of Current Services**

**Findings from the community meetings regarding programs and services** are organized by service area and citywide. Some findings reflect the opinions of a few people, while others were shared by more participants. The findings provide qualitative, anecdotal evidence of priorities noted among community meeting respondents. The community meeting findings should be compared to findings from other engagement activities. Analysis suggests that reported priorities differed among participants involved in different outreach activities (e.g., resident survey, community meetings, and intercept events).

**Downtown**

**Expanded Services.** Identified gaps in services included the need for longer hours in park buildings, lifeguards at pools, improved communication about programs and events, and racially equitable programming.

**Other Recreation Opportunities.** Participants recommended keeping in mind that downtown workers have access to recreation programs and facilities provided by others. MPRB sites should be programmed accordingly.

**Staffing Opportunities.** Participants noted the need for more staff and the potential for internships to help individuals build skills while staffing the park.

**Outdoor Programs.** Participants noted the importance of having a wide range of programming options, such as fitness classes and sports, environmental education, meditation, gardening, ice skating, group picnicking, and singing.

**North**

**Programs for All Age Groups.** In addition to recreation programs for youth and adults, participants noted the importance of social programs for populations such as seniors, families, and parents.

**Popularity of Sports.** A wide range of athletic activities were identified as important, including tennis, soccer, basketball, swimming, ice skating, skiing, and walking.

**Development Opportunities.** Participants stressed the importance of adding skill development, job training, and educational presentations to existing programs for youth, such as Nite Owlz.

**Partnerships.** Participants felt it was important to expand program offerings through partnerships with non-profits, for-profits, and other public agencies.
Northeast/Southeast

Recreation Programming. Several comments indicated the importance of or need for more recreation programming opportunities, including toddler programs; childcare and out-of-school programs; health, fitness, and sports; education or lifelong-learning; and community events such as movies in the park and community sings. Both indoor and outdoor facility programs were noted. Partnerships, such as with Community Education at the University of Minnesota, were noted as ways to extend recreation opportunities in the neighborhood.

Programs for All Age Groups. Participants felt that programs and services should reflect the demographics of the surrounding neighborhood, including high numbers of toddlers and young children. Other respondents called out needs for programs for adults, seniors, and teen girls.

Sports Programming. Participants’ comments about sports emphasized a desire for more flexible scheduling with expanded drop-in and weekend hours.

Additional Hours for Youth Services. Some comments indicated a desire for expanded facility hours and better access to recreation centers for children and youth.

South

Programming Focus. Participants felt that more programs and services are needed for senior, immigrant, and middle school youth populations. More events, non-sports recreation, and activities (creative, educational, social, cultural, etc.) are needed in parks and recreation centers.

Expanded Services. Participants desire a variety of services, including signage, staffing, marketing, communication about programs, and coordination with program instructors.

Coordinated Programming. Participants desire better coordination of programs between recreation centers, greater outreach to first-generation residents, and an evaluation of the value of certain program offerings (horseshoe pits, etc.).

Partnerships. Participants suggested partnerships with student, school, and community groups, especially to increase programmatic options, and train new coaches.

Costs and Fees. Two conflicting comments were noted about costs and fees. There is a desire to keep costs low and programs affordable, while also considering ways to improve facilities for enhanced revenue generation.

Service Improvements Needed. Comments suggested that improvements are desired in maintenance and sports field allocation.

Southwest

Recreation Programs. A desired was noted for continued, quality sports programs (especially soccer), as well as programs that respond to new trends in recreation (e.g. pickleball). Some participants supported having more staffing in recreation centers to support more fitness programming.

Popularity of Events. Participants expressed general enthusiasm for festivals, movies, music, and other events held in parks.

Broader Service Provision. Participants recognized that recreation centers are just one provider of services to residents, and should therefore seek greater efficiency by avoiding duplication.

Expanded Hours. Participants expressed a need for expanded hours for greater access to recreation opportunities.

Programming Focus. Participants felt that more programs and services are needed that reflect the ages and cultures of the surrounding community members.

Citywide

Customized Programs and Services. Across the city, comments illustrated a desire to tailor services to the demographics of nearby or local residents, creating opportunities for all ages and multi-cultural groups in the community.

Diverse Recreation Opportunities and Programs. Comments illustrated an interest in a wide range of drop-in and organized activities and events. There is a clear interest in sports, health, and fitness, as well as a desire to balance these opportunities with social gatherings, educational programs, youth development/childcare programs, and other non-sports activities.

Support Amenities and Services. There is an interest in services that support a more welcoming, comfortable recreation experience. These included better maintenance, enhanced staffing, and concessions.

Intercept Results

RecQuest. Eighty one percent (81%) of the respondents to the RecQuest intercepts indicated that they or a member of their household had participated in an organized program/event in a Minneapolis park in the last two years. When asked what would encourage them to use a recreation center and park more frequently, respondents selected low-cost or free programs and different types of programs (than those that are currently offered) most frequently. Of least importance to respondents were more reservable rooms and meeting spaces, and programs closer to public transportation.
Online and Paper Survey Results

Online and paper survey respondents identified connecting people with the outdoors, providing police protection in parks, and fitness, health, and wellness activities as the most important program and services for neighborhood parks (Figure 5). Those programs and services that were identified as least important were adult sports and programs, and adventure recreation. When asked what else was needed at recreation centers, the top program and service responses were to be open during convenient times, more low cost or free programs, and more programs for children. (see Figure 9, page 16).

Minneapolis Park and Recreation Board online and paper survey
Recreation Centers

Across many of the engagement methods, participants expressed the need to make recreation centers more welcoming, comfortable, and safe. These recommendations ranged from providing working air conditioning to amenities such as coffee kiosks. In the online/paper survey and community meetings respondents provided insights into what is needed at recreation centers. Gymnasia and fitness areas were most commonly identified in the responses to this question. Based on the responses from the community meetings, there is some variation in views for centers across the city. It appears that there is a greater desire for enhanced facilities with greater amenities in southwest, safety was a priority in north, and multi-uses spaces were discussed in downtown, north, northeast/southeast and south. In some cases, participants indicated that more, better or larger facilities are needed to be able to address the variety of recreation options desired.

Resident Survey Results

The resident survey indicated that 27% of Minneapolis residents used a recreation center in the last two years (Figure 6). Of those respondents, 93% rated the quality of the center as good or excellent. Lack of interest and being too busy were the greatest reasons for not using a recreation center (Figure 7).

Figure 6. Resident Survey Responses to Recreation Center Use and Quality

FINDINGS

Community Meeting Results

Findings from the community meetings regarding recreation centers are organized by service area and citywide. Some findings reflect the opinions of a few people, while others were shared by more participants. The findings provide qualitative, anecdotal evidence of priorities noted among community meeting respondents. The community meeting findings should be compared to findings from other engagement activities. Analysis suggests that reported priorities differed among participants involved in different outreach activities (e.g., resident survey, community meetings, and intercept events).

Downtown

Support Amenities. Participants appreciated and expressed the desire for more amenities that create welcoming, inviting social spaces, such as coffee shops, cafés, popcorn machines, art, and multicultural displays.

Multi-Use Spaces. Participants noted the benefits of a flexible space to host art exhibits, weddings, meeting rooms, offices for neighborhood organizations, and art classes.

North

Recreation Spaces. Comments indicated a desire for a sports complex or gym where they can attend recreation classes or other athletic activities.

Community Spaces. Comments suggested that participants desire flexible multi-use spaces that are warm and welcoming, where they can attend organized programs and meet and rent space for social, educational, and entertainment purposes.

Safety. Generally speaking, recreation centers are important as safe spaces for youth. Safety cameras are needed.
**Northeast/Southeast**

**Insufficient Space.** Comments indicated that programs and parking/facility needs are outgrowing the available space. New, expanded multi-use centers are needed, offering a variety of spaces where people can socialize and meet.

**Improvements Needed.** In addition to space issues, participants noted a range of building updates and maintenance needs, as well as issues around lack of bathroom access and uncomfortable furniture.

**South**

**Insufficient Facilities and Spaces.** Participants noted the importance of multi-use spaces, storage space, and meeting space. Comments indicated a desire for more indoor facilities to support active recreation, such as gymnasiums, pickleball and bocce courts, and play areas.

**Improvements Needed.** Participants noted shortcomings with amenities (storage, lighting, air conditioning, etc.) and facility condition, particularly gyms. A desire for ‘green’ facilities was noted.

**Southwest**

**Recreation Center Enhancements.** There were more comments in the Southwest than any other service area around expectations for recreation center facilities. Noted needs include larger gymnasiums, fitness space, pools, attractive lobbies, more modern facilities, more flexible use spaces, meetings rooms, party rooms, attractive reservable spaces, specialized classrooms, computer labs, and improved support amenities such as air conditioning, restrooms, registration technology, audio-visual equipment, safety cameras, coffee bars, book nooks, foosball tables, storage, fireplaces, and comfortable furniture.

**Unstructured Social Spaces.** Participants noted the importance of indoor spaces where people of all ages can drop in to socialize and feel comfortable while engaging in unstructured activities.

**Accessibility.** Participants expressed a need for improved infrastructure and greater physical accessibility of indoor facilities.

**Facility Equity.** Some comments indicated that all recreation centers should have the same amenities while others prioritized the need to base amenities on the interests and character of individual neighborhoods.

**Improvements Needed.** Participants noted the need for larger centers, working air conditioning, safety updates, storage and energy efficiency, and infrastructure improvements.

**Insufficient Space.** Participants desire both indoor and outdoor facilities and equipment for active recreation, plus multi-use spaces such as classrooms, kitchens, and other rooms for social/meeting purposes.

**Facility Efficiencies.** Participants noted a need to introduce efficiencies where possible, ranging from a focus on energy to a regular review of facility use to prioritize funding, development, and improvements.

**Citywide**

**Space and Place.** In commenting on recreation center spaces, many respondents noted the amenities, services, staffing, and programming options that make recreation centers safe, accessible, and desirable places to socialize and play.

**Improvements Needed.** Comments suggested that a variety of upgrades that are needed in recreation centers to ensure safety, comfort, and usability.

**Support Amenities.** There is an interest in having amenities and facilities that support a more welcoming, comfortable recreation experience. These varied from needs for air conditioning and facilities in good condition to desires for elements such as coffee kiosks, fireplace gathering space, and high-tech audiovisual equipment.

**Insufficient Space.** In some cases, more, better, or larger facilities are needed to be able to address the variety of recreation options desired.

**Intercept Results**

Intercept posters did not include questions about specific improvements to recreation centers.
Online and Paper Survey Results

Online and paper survey respondents identified gymnasium, large rooms for programs, and reservable meeting spaces as the most important spaces of recreation centers (Figure 8). The least important were lobby spaces and computer rooms. Respondents also indicated that the top space related needs for recreation centers they visit were fitness space and gymnasia (Figure 9).

**Figure 8.** Online and Paper Survey Responses Importance of Spaces in Recreation Centers

MPRB's Recreation centers have space for a variety of uses. Of these, how important or useful are the following to you?

- Gymnasium
- Large room for programs
- Reservable meeting or party room
- Arts and crafts room
- Kitchen
- Lobby/seating area
- Child care room
- Game room
- Computer room

**Figure 9.** Online and Paper Survey Responses to What is Needed at Recreation Centers

Is anything else needed at the recreation centers that you visit?

- Staff who speak my language
- Transportation to the center
- More staff
- More child care programs
- Concessions
- More programs for adults
- More programs for seniors
- Newer facilities/remodeling
- A greater variety of programs
- More drop-in activities
- Better maintenance
- More programs for teens
- Gymnasium
- More programs for children
- More low cost/free programs
- Fitness space
- Center open during convenient times

*Minneapolis Park and Recreation Board online and paper survey*
Outdoor Facilities

Resident needs and perceptions of outdoor assets and facilities varied by engagement method and location of the city. In general, playgrounds, athletic fields, dog parks, ice rinks, and wading pools were considered important. A common theme that emerged across community meetings and online/paper survey respondents was the desire to introduce more natural areas, paths, nature play, gardens, and trees into neighborhood parks. The importance of restrooms, functioning drinking fountains, and benches was raised in each service area during community meetings.

Resident Survey Results

The resident survey revealed that the majority of Minneapolis residents rate neighborhood facilities positively (Figure 10), this includes basketball, ice rinks, and playgrounds. Those assets that were rated most positively included natural areas, trails, beaches, and picnic facilities. These assets are more commonly found in regional parks in Minneapolis. The largest number of negative responses were for tennis courts and playgrounds, these assets are typically found in neighborhood parks.

Figure 10. Resident Survey Responses to Satisfaction with Assets

![Rating of Components]

In terms of use, the most frequently used assets are typically within regional parks (Figure 11). These include trails, natural areas, beaches, and picnic facilities. The most frequently used assets that is typically in a neighborhood park are playgrounds.

Athletic fields were discussed separately in the resident survey (Figure 12). Of the respondents, 19% used athletic fields. Of those that used them, 99% thought their quality was good or excellent.
**Community Meeting Results**

Findings from the community meetings regarding outdoor assets and facilities are organized by service area and citywide. Some findings reflect the opinions of a few people, while others were shared by more participants. The findings provide qualitative, anecdotal evidence of priorities noted among community meeting respondents. The community meeting findings should be compared to findings from other engagement activities. Analysis suggests that reported priorities differed among participants involved in different outreach activities (e.g., resident survey, community meetings, and intercept events).

### Downtown

**Outdoor Recreation Facilities.** Participants noted the importance of having a wide range of facilities to be able to support activities such as fitness, environmental education, meditation, gardening, picnicking, outdoor eating, and performances.

**Improvements needed.** Walking paths and tennis courts were identified as important outdoor facilities that need improvement.

**Leisure and quiet.** Participants noted parks as places for quiet walking, sitting, and leisure.

**Art in Parks.** Art in the parks contributes to the quality of the space.

### North

**Gathering Spaces.** Parks were identified as important places to gather for not only social and educational activities, but also for relaxation and enjoyment of nature. This included gardens, picnic areas, outdoor classroom, and natural areas.

**Safety and Security.** Participants requested a focus on park safety through policing, outdoor supervision, clear posting of rules, and creating community ownership of the parks.

**Improvements Needed.** Participants indicated a desire for more and/or better playgrounds, sports fields, and dog parks. Concern was raised about the impacts of deferred maintenance, especially on large assets like the North Commons Water Park.

### Northeast/Southeast

**Insufficient Facilities and Spaces.** Participants conveyed that the area lacks multi-use community facilities (such as sport fields), walking paths, and ice rinks.

**Natural Areas.** Participants expressed a desire for more natural areas and trees, and amenities such as gardens.

**Support Facilities.** Available restrooms and working drinking fountains were a concern among participants.

### South

See intercept data below for more information, as the south service area intercept posters were used to collect information about outdoor facilities and assets at the community meetings in south Minneapolis.

### Southwest

**Outdoor Amenities and Facilities.** Participants noted the importance of outdoor amenities and facilities that support year-round recreation, including sports fields (some with lighting), sports courts (basketball and tennis), sledding, ice rinks, slack lining, wading pools/splash pads, picnic areas (tables and grills), and playgrounds.

**Unstructured Social Spaces.** Participants noted the importance of outdoor spaces where they can socialize and feel comfortable, especially where people of all ages can drop in to participate in unstructured activities.

**Nature and Gardens.** Natural areas, trees, gardens, nature play, community gardens, and open spaces were common requests for participants. There was also a sense of focusing on habitat and pollinator friendly environments.

**Support Facilities.** Available restrooms and working drinking fountains were a concern among participants.

### Citywide

**Outdoor Amenities and Facilities.** Participants noted the importance of several outdoor amenities and facilities. Athletic fields, dog parks, ice rinks, playgrounds, trails or paths, wading pools or pools, picnic areas, and tennis courts were important across the city.

**Nature, Trees, and Gardens.** Natural areas, trees, gardens, and open spaces were common requests for participants across the city.

**Support Facilities.** Available restrooms and working drinking fountains were a concern among participants.

### Intercept Results

**South**

Respondents to the South Service Area intercept posters indicated the greatest preferences for existing wading pools, playgrounds, trails, and ice skating rinks. Shelter, sand volleyball, baseball, and tennis rated the lowest for existing assets. Their highest preferences for future assets included a swimming pool and vertical climbing walks. High quality diamonds and parking lots were least desired for future assets.
Outdoor Facilities

Online and Paper Survey Results

Respondents to the online and paper survey prioritized investments in paths, picnic facilities, recreation centers, and playgrounds the highest (Figure 13). They placed the lowest priority on investments in artificial turf fields. They felt nature play and natural areas were missing the most from neighborhood parks (Figure 14).

Figure 13. Online and Paper Survey Responses to Investment Priority in Assets

Figure 14. Online and Paper Survey Responses to Assets Missing

Is anything missing from the neighborhood parks that you visit?
Maintenance and Care

The resident survey provided an overall look at the perceptions of maintenance and care of the park system. It indicated that 94% of residents think the maintenance and appearance of the park system is good or excellent. The community meetings and online/paper survey provided opportunities to learn more about which maintenance and care services might be most important. Respondents to both methods indicated that waste pickup and removal, and playground maintenance and safety were most important. These respondents also indicated that landscape care and mowing were least important. In the community meetings, respondents also placed higher value on recreation center maintenance and lower value on tree care, whereas online/paper survey respondents placed higher value on pathway maintenance and less value on outdoor court maintenance.

Resident Survey Results

The resident survey reveals that 94% of Minneapolis residents rate the appearance and maintenance of the park system good or excellent (Figure 15).

Community Meeting and Intercept Results

In the community meetings participants were asked to indicate which maintenance services were most important to them and/or their household in a small group discussion or to complete an intercept poster that focused on maintenance and care of the neighborhood park system. The responses were combined and tabled to create a single number for each service. For example, if 5 respondents thought that a service was not important and 11 respondents thought it was important, the resulting value for that service was 6. The higher the number, the more important the service was to participants. The combined responses (Table 2) showed that recreation center maintenance, trash/litter pick-up and removal, and playground safety and maintenance were of greatest importance to respondents. Tree care, landscape care, and mowing were least important.

Maintenance and care services that were least important are tennis court maintenance, landscape care within parks, and mowing within parks (Figure 16).
We acknowledge, with gratitude, the contributions of the following staff for their work in the Closing the Gap initiative and the development of this report.

Adam Arvidson, Director of Strategic Planning
Ginger Cannon, Community Outreach and Research Planner
Tom Johnson, Engineering Technician II
Michelle Kellogg, Community Outreach and Access Manager
Justin Long, Assistant Superintendent of Environmental Stewardship
Jayne Miller, Superintendent
Brenda Compean Morales, Urban Scholar and Bilingual Information Ambassador
Jamie Neldner, Assistant Director of Recreation Centers and Programs
Elise Niedermeier, Community Outreach and Access Coordinator
Colleen O’Dell, Project Planner/Designer
Veronica Quillien, Community Outreach and Access Coordinator
Jennifer Ringold, Deputy Superintendent
Paul Rosen, Budget and Analysis Manager
Michael Schroeder, Assistant Superintendent of Planning
Robin Smothers, Social Media and Marketing Consultant
Dawn Sommers, Director of Communications and Marketing
Athelgra Williams, Community Outreach and Access Coordinator
J. Nicholas Williams, Assistant Superintendent of Recreation
Cordell Wiseman, Director of Community Outreach
Emily Wolfe, Recreation Administration Coordinator

We also thank the recreation center staff and environmental stewardship staff across the organization that hosted meetings at parks throughout the summer and provided critical information to develop the materials for the project.
Hello, I'm ________ with the Morris Leatherman Company, a research firm located in Minneapolis. We have been hired by the Minneapolis Park and Recreation Board to speak with a random sample of residents about issues facing the community. This survey is being conducted because the Minneapolis Park Board and staff are interested in your opinions and suggestions about current and future park needs and issues. I want to assure you that all individual responses will be held strictly confidential; only summaries of the entire sample will be reported.

If you’re not familiar with the Minneapolis Park and Recreation Board, it operates and maintains 251 park properties totaling nearly 6,790 acres of land and water. The park system includes 49 recreation centers, playgrounds, more than 100 miles of trails, wading pools, outdoor ice rinks and much more.

1. Approximately how many years have you lived in Minneapolis?
   - FIVE YEARS OR LESS........1
   - SIX TO TEN YEARS.........2
   - 11 TO 20 YEARS..........3
   - 21 TO 30 YEARS.........4
   - OVER THIRTY YEARS....5
   - DON’T KNOW/REFUSED..6

2. What do you like most about the parks and opportunities for recreation within Minneapolis?

3. What do you like least about the parks and opportunities for recreation within Minneapolis?

4. What is your overall impression of the Minneapolis Park and Recreation System -- excellent, good, only fair or poor?
   - EXCELLENT..............1
   - GOOD....................2
   - ONLY FAIR..............3
   - POOR....................4
   - DON’T KNOW/REFUSED..5
5. What is your overall impression of the appearance and maintenance of the Minneapolis Park and Recreation System -- excellent, good, only fair or poor?

   EXCELLENT.................1
   GOOD......................2
   ONLY FAIR...............3
   POOR....................4
   DON’T KNOW/REFUSED....5

IF "ONLY FAIR" OR "POOR," ASK:

6. Why did you rate the appearance and maintenance as (only fair/poor?)

   __________________________________________________________
   __________________________________________________________

The Minneapolis Park and Recreation Board operates 49 recreation centers, located in neighborhood parks across Minneapolis. Keeping this in mind ...

7. Have you used a Recreation Center during the past two years for recreation purposes?

   YES.......................1
   NO......................2
   DON’T KNOW/REFUSED......3

IF "YES," ASK:

8. Which Recreation Center do you use most often?

   __________________________________________________________

9. How often do you use a Recreation Center - daily, two to three times a week, weekly, two to three times a month, monthly or less often?

   DAILY......................1
   2 TO 3 TIMES A WEEK.....2
   WEEKLY....................3
   2 TO 3 TIMES A MONTH...4
   MONTHLY...................5
   LESS OFTEN...............6
   DON’T KNOW/REFUSED.....7

10. Overall, how would you rate the quality of the Recreation center - excellent, good, only fair or poor?

    EXCELLENT...............1
    GOOD....................2
    ONLY FAIR...............3
    POOR....................4
    DON’T KNOW/REFUSED....5

IF "ONLY FAIR" OR "POOR," ASK:
11. Why do you feel that way?

________________________________________________________________________

The Park Board offers two types of programming: those held INSIDE a recreation centers such as basketball, music lessons, tumbling, pottery, yoga, preschool and those held OUTSIDE such as baseball, soccer, tennis lessons, geocaching, archery, and neighborhood festivals.

12. Do you participate in INSIDE programs at a Recreation Center?

YES......................1
NO.........................2
DON’T KNOW/REFUSED.......3

IF “YES,” ASK:

13. What INSIDE programs did you participate in?

63. Are there any other Minneapolis park facilities or offerings, you or members of your household use that I haven’t listed? (IF “YES,” ASK:) What would those be?

________________________________________________________________________

IF PARK FACILITY OR OFFERING IS GIVEN, ASK:

64. How often you or a member of your household use that facility - daily, two to three times a week, weekly, two to three times a month, monthly or less often?

- DAILY.........................1
- 2 TO 3 TIMES A WEEK......2
- WEEKLY.......................3
- 2 TO 3 TIMES A MONTH.....4
- MONTHLY......................5
- LESS OFTEN...................6
- DON’T KNOW/REFUSED.......7

65. How would you rate ________ - excellent, good, only fair or poor?

- EXCELLENT................1
- GOOD..........................2
- ONLY FAIR....................3
- POOR..........................4
- DON’T KNOW/REFUSED.......5

66. Now, tell me if you or members of your household would be willing to travel to that park facility or offering? (IF “YES,” ASK:) Would you be willing to travel five minutes or less, 6 to 10 minutes, 11 to 15 minutes, 16 to 20 minutes or over 20 minutes?

- NO.........................1
- YES/5 MINUTES OR LESS....2
- YES/6 TO 10 MINUTES......3
- YES/11 TO 15 MINUTES.....4
- YES/16 TO 20 MINUTES.....5
- YES/OVER 20 MINUTES......6
- DON’T KNOW/REFUSED.......7

67. In general, do you feel existing parks and recreation facilities offered by the Park Board meet the needs of you and members of your household?

- YES.........................1
- NO.........................2
- DON’T KNOW/REFUSED.......3
Attachment A. The Morris Leatherman Company Survey

68. What do you feel is missing?

________________________________________________________
________________________________________________________

69. Do you or members of your household currently use park and recreation facilities or participate in park and recreation programs and activities outside of the Minneapolis Park and Recreation system? (IF "YES," ASK:) What would that be?

_____________________________________________________________
_____________________________________________________________

To what extent does each of the following considerations limit your household’s use of Minneapolis public parks and trails and participation in Minneapolis recreation activities and programs — would you say it limits you a lot, somewhat, or not at all?

Moving on....

I'm going to read you some PAIRS of statements. As I read each pair, tell me whether the FIRST statement or the SECOND statement COMES CLOSEST to your own views -- even if neither is exactly right. (ASK AFTER INITIAL ANSWER) Do you feel strongly about that, or not?
100. A) I prefer SELF-DIRECTED park and recreation activities that don't require organization, such as walking or open gym; OR
B) I prefer ORGANIZED park and recreation activities that require organization, such sports leagues and hobby classes.

Weather permitting....

101. A) I prefer indoor park and recreation activities; OR
B) I prefer outdoor park and recreation activities?

Changing topics....

The City of Minneapolis and the Minneapolis Park and Recreation Board are facing budget challenges. To help address these challenges, some people have suggested the Park System set fees for the use of several currently free services, increase fees for services already paid for by participants, or offer other revenue-generating services. For each of the following proposals, please tell me if you would strongly support it, somewhat support, somewhat oppose, or strongly oppose it. If you have no opinion, just say so.... (ROTATE LIST)

STS  SMS  SMO  STO  DKR

102. Increase all adult recreation fees so the cost of programs or services is fully paid for by the fees charged?

103. Impose fees for youth recreation programs and services based upon their ability to pay?

104. Charge property owners on city parkways in the city for the maintenance of those parkways?

105. Adding additional concession stands, vendors and rental opportunities?

</tbody>
</table>
113. Suppose you were looking for a new home. If the costs and amenities of two homes you liked were virtually identical, closeness to a park would be an important factor in your decision between the two homes.

114. The Minneapolis Parks and Lakes play an important positive role in the emotional and psychological health of city residents.

115. The Minneapolis Parks and Lakes play a key role in the physical health and wellness of city residents.

116. The Minneapolis Parks play an important role in serving the public good, by offering free or low-cost recreational facilities and activities to everyone.

Moving on....

117. About what percent of the property taxes you pay goes to the operation of the Minneapolis Park and Recreation System?

For your information, the actual percentage is about 8.0 percent of your total property taxes, or 8 cents out of every dollar?

118. Do you think all the operations of the Minneapolis Park and Recreation system are funded entirely by property taxes?
Attachment A. The Morris Leatherman Company Survey

119. Would you support or oppose a property tax increase to maintain Minneapolis Park and Recreation System infrastructure, programs and services at their present levels? (WAIT FOR RESPONSE) Do you feel strongly that way?

If "OPPOSE" OR "STRONGLY OPPOSE," ASK:

120. What infrastructure, programs and services would you be willing to see cut?

121. Would you support or oppose a property tax increase to enhance Minneapolis Park and Recreation System infrastructure, programs and services? (WAIT FOR RESPONSE) Do you feel strongly that way?

If "STRONGLY SUPPORT" OR "SUPPORT," ASK:

122. What Minneapolis Park and Recreation System infrastructure, programs and services would you like to see enhanced?

123. When you consider the property taxes you pay and the quality of the infrastructure, programs and services provided by the Minneapolis Park and Recreation system, how would you rate that value -- is it an excellent value, a good value, an only fair value or a poor value?

Turning to communications.....
124. What is your principal source of information about Minneapolis Parks and its activities? (READ LIST, #1-#8)

PARK BROCHURE/GUIDE.....01

The Future of Neighborhood Parks

The park system has regional and neighborhood parks

- Regional parks – larger in size, fewer physical amenities, serve broader than Minneapolis residents, local, state and federal funding
- Neighborhood parks – smaller in size, physical amenities, serve Minneapolis residents, only local funding

Attachment B. Closing the Gap Presentation

What do we know?

Closing the Gap: Investing in our Neighborhood Parks

Long Term Sustainability of Minneapolis Park System

- 2003 – 2013, significant reductions in personnel and resources
- Over the past 3-4 years one area of focus at the Park Board has been to improve operating efficiencies and streamline our work
- Strides have been made in identifying and implementing those efficiencies
- Even so, the 10 years of reductions and the age of the system, significant challenges exist for funding the park systems operating and capital needs

Capital Funding Gap

- More than $140 million behind (neighborhood parks, golf, fleet, pathway paving and lighting and ITS)
- 80% of the gap is in neighborhood park capital
- 2000 to 2015, neighborhood parks are almost $111 million behind
- 2016-2020, neighborhood parks capital gap grows by additional $46 million
- 2021-2040, neighborhood parks capital gap grows an additional $304 million

Citywide Asset Investment/Need Snapshot 2000-2020

2000-2040, total neighborhood parks capital gap of $461 million

- $14.3 million annually is needed to meet current neighborhood parks capital needs (2016 value)
  - Currently spending $4-5 million annually
  - Annual funding gap of over $9.3 million
**Attachment B. Closing the Gap Presentation**

### What Other Cities Are Facing
- Park systems across the country are facing similar challenges.
- Older park systems, like Minneapolis’s system, are facing more challenges than most given the age of the infrastructures and assets.
- Some cities with rich park systems have tackled this challenge, in different ways.

### What are We Doing to Address Funding Gap
- **In February 2015** - conducted a community survey about parks.
- **May to September 2015**
  - Public Meetings on Neighborhood Park Conditions
  - Gather funding model and case study data from other cities
  - Hold public forum on funding model and case study data
  - Conduct additional local research
- **October to December 2015**
  - Board of Commissioners consider information gathered
  - By December 2015 - Board of Commissioners make decision
    - Maintain current funding level
    - Private funding
    - Referendum for additional tax revenue

### Next 25-30 years?

**RecQuest**

- **Develop a comprehensive recreation center and program plan to assure that recreation centers, programs and services equitably align with community needs.**

**Service Area Master Plans**

- **Focus:** Citywide
- **Outcome:** Recreation center and program plan
- **Est. Completion:** Spring 2016

**RecQuest**

- **Focus:** South and Downtown
  - **Outcome:** Service area master plan with park plan for each park
- **Est. Completion:** Dec 2015/Jan 2016

Each asset (bench, recreation center, playground, etc) within the park system has a lifecycle, or a period of time in which the condition of the asset allows it to be fully enjoyed by park patrons. To reach the full lifecycle of any one asset periodic improvements need to be made (replacement of roof, repair of a piece of play equipment, mechanical upgrades to a wading pool). The replacement date is the date in which the asset reaches the end of its lifecycle or useful life.

Funds invested 2000-2015
Projected 2016-2020 investment (based on approved 2015-2020 CIP)
Funding gap (what should have been invested) by 2020

MPRB, 05-27-15. Funding amounts are based on Board-approved 2015-2020 Capital Improvement Program, and are based on best available data to date.
Closing the Gap: Investing in Our Neighborhood Parks

AGENDA

6:00 pm – Sign-in
6:05 pm – Welcome/Introductions
6:10 pm – Presentation
6:45 pm – Small Group Discussions at Tables

Warm-up Question: What is the most important thing we need to hear about your neighborhood park?

Question 1: What ideas or funding strategies should the MPRB consider to solve the funding gap for neighborhood parks?

Question 2: Of the activities, programs and services provided in neighborhood parks, which are most important to you and/or your household? Are there any missing? If so, which ones?

Question 3: Recreation centers have space for a variety of uses. Which spaces are most important or useful to you and/or your household? Is there anything missing? If so, what would you like to see at the recreation centers?

Question 4: Of the outdoor assets and facilities provided in neighborhood parks, which ones are most important to you and/or your household? Are there any assets missing? If so, which ones?

Question 5: When considering the maintenance and care of the neighborhood parks, what maintenance services are most important to you and/or your household?

8:00 pm – Adjourn
Closing the Gap: Investing in Our Neighborhood Parks

Frequently Asked Questions

Questions about How to Get Involved

1. Where can I get more information about Closing the Gap?
The Minneapolis Park and Recreation Board’s (MPRB) web site includes a project page for Closing the Gap. It is at the following link: www.minneapolisparks.org/closingthegap.

You can sign-up for regular email updates at www.minneapolisparks.org/subscribe, enter your email address then select the “Closing the Gap” topic in the Planning Section.

You can also call the project hotline at 612-313-7789 or email closingthegap@Minneapolisparks.org.

2. How is the MPRB going to reach out to under-represented and under-served populations, including non-English speakers, in this education process?

With the expertise of the MPRB’s Community Outreach and Access staff, the MPRB will reach out and meet with underserved and underrepresented populations, including non-English speakers. To introduce the topic and opportunity, press releases and informational posters will be translated into Spanish, Hmong, and Somali. We will collaborate with communities to identify and develop additional information. If you have recommendations for groups or organizations that the MPRB should connect with, please email closingthegap@Minneapolisparks.org or call the project hotline at 612-313-7789.

3. How can I give my input if I am not able to attend a meeting?

Starting June 10, you may provide your input through an on-line survey at www.minneapolisparks.org/closingthegap.

Starting June 15, a paper survey will also be available at recreation centers and the MPRB HQ building (2117 West River Road N) or by calling 612-230-6400.

4. It appears that the focus is only on existing park users. How is equity established if that is the focus?

To address equity, the MPRB is reaching out to all residents of Minneapolis, including those that do not traditionally use the park system. This will include providing information at several non-MPRB events in June-September and reaching out to underserved and underrepresented populations. If you have recommendations for groups or organizations that the MPRB should connect with, please call the project hotline at 612-313-7789 or email closingthegap@Minneapolisparks.org.

5. How is Closing the Gap related to RecQuest and Service Area Master Plan projects?

Closing the Gap, RecQuest and Service Area Master Plans focus on the future of neighborhood parks in Minneapolis. While Closing the Gap focuses on the funding gap for neighborhood parks, RecQuest and Service Areas Master Plans are planning efforts that, with community engagement, will define the vision for and investment in neighborhood parks for the next 25-30 years. Their individual focus is as follows:

**Closing the Gap: Investing in our Neighborhood Parks** shares information about the current condition of our neighborhood parks. After more than a decade of deferring maintenance to meet budget shortfalls, many of Minneapolis’ 157 neighborhoods parks are in trouble. Neighborhood parks have the greatest number of physical assets (such as wading pools, playgrounds, roofs and parking lots) that require greater resources to operate, maintain and replace. Yet, since 2000, the funds available to care for these community hubs have been significantly less than the amount needed. As a result, the funding gap for neighborhood parks has grown to more than $110 million and if not addressed, will grow an additional $46 million by 2020.

**RecQuest** is the MPRB’s in-depth assessment of its community recreation centers designed to help guide recreation center investments for the next 25-30 years. RecQuest will not only review the physical spaces within the recreation centers themselves, but also the programs, services and activities the centers currently provide to assess if they are meeting the community’s needs. RecQuest will also help identify any areas of Minneapolis where programming is not currently offered but needed.

**Service Area Master Plans** take a complete look at all outdoor park assets within the service areas of Minneapolis (Downtown, North, Northeast/Southeast, South, Southwest). Using community input, master plans set a vision for operations, management, and improvements; create improvement plans for each neighborhood park, set priorities and estimate budgets. Currently, Service Area Master Plans are underway for the Downtown and South Service Areas. Over the next five years, Service Area Master Plans will be prepared for the Southwest, North, and Northeast/Southeast Service Areas.

Questions about Neighborhood and Regional Park Funding

6. What is the difference between a neighborhood and a regional park?

The Minneapolis park system includes neighborhood and regional parks. Neighborhood parks are typically small in size, 6 blocks or less, and include assets (playgrounds, recreation centers, wading pools, athletic fields, etc.) used primary by the neighborhood or community near it. Funding for investments in neighborhood parks is available only through local property tax revenues. Regional parks are owned, operated and maintained by the MPRB, but they are also designated as part of the Metropolitan Council System of Regional Parks and Trails. These parks are usually large in size, often over 100 acres, and contain most of the natural areas in the Minneapolis park system. These parks serve regional visitors as well as Minneapolis residents. As such, funding for investments in regional parks is through local property tax revenues, regional funding through the Metropolitan Council and state and federal funding sources.
7. Why doesn’t the Closing the Gap discussion include regional parks?
Unlike neighborhood parks, which almost entirely serve and are supported by Minneapolis residents, regional parks are also financially supported by regional, state and federal funding sources.

8. How are neighborhood parks currently funded?
Neighborhood parks are funded primarily by Minneapolis residents through property taxes. Primary funding sources for the capital improvements in neighborhood parks are Net Debt Bonds ($2.5 million per year) and Capital Levy ($1.5 million per year). Programs, operations and maintenance are funded by Minneapolis property taxes.

9. How is acquisition or purchase of new park land funded?
Acquisition or purchase of new park land typically occurs within the regional park system and is funded primarily by regional park dollars (Parks and Trails Legacy funds, Environment and Natural Resources Trust Fund) and watershed funding (Mississippi Watershed Management Organization) and, to less extent, MPRB general funds.

10. Why is the MPRB buying more park land if it can’t take care of the land and assets it currently is responsible for?
The MPRB is buying property consistent with the Above the Falls Regional Park Master Plan. This plan envisions public land on both sides of the Mississippi River between Plymouth Avenue and North Mississippi Regional Park. This is bringing critical regional parks and natural areas to north and northeast Minneapolis, a portion of the city that, historically, has not had the same investment in the acquisition and development of regional parks as other areas in Minneapolis. The acquisition of park land along the Mississippi River is continuing and completing the park system legacy of providing public park land along bodies of water within Minneapolis.

11. Why doesn’t the MPRB remove assets from parks?
The MPRB removes assets if the asset falls into disrepair and it doesn’t have the funding to repair or improve the asset to make it safe and accessible for public use. To date, the MPRB has not had to remove many assets. However, most of the major assets within the neighborhood park system, such as recreation centers, athletic fields and wading pools, are reaching the end of their lifecycles. Without adequate funding, the MPRB will need to work with residents to determine which assets will be removed.

12. How many neighborhood parks are there in the Minneapolis park and recreation system?
The Minneapolis park system includes 251 properties and 157 of them are neighborhood parks.

13. Why is funding of the neighborhood parks important for the community?
The results of a 2015 survey of Minneapolis residents demonstrate that Minneapolis residents believe that the Minneapolis parks and lakes are unique and valuable assets for the city (95%). Survey results further articulated that Minneapolis residents believe parks and lakes play an important positive role in the emotional and psychological health of city residents (89%) and physical health and wellness of city residents (91%). The survey results also indicated that residents believe the park system contributes to the economy by increasing the value of properties near parks (90%). Finally, residents indicated that they believe Minneapolis parks play and important role in serving the public good, by offering free or low-cost recreational assets and activities to everyone (91%).

14. What does it take to maintain our neighborhood parks?
What level of maintenance are we able to provide today?
What should the level of maintenance be?
Below are examples of typical maintenance activities that the MPRB conducts in the park system. The table provides information about the current level of service and the desired level of service based on industry best practices.

<table>
<thead>
<tr>
<th>Activity</th>

</table>

Questions about the Funding Impacts
15. What happens if the MPRB doesn’t get more funding?
If the MPRB does not get additional funding for neighborhood parks, it will need to work with residents to determine which assets, services and programs will be reduced or removed. These decisions will need to consider several factors, including facility condition, trends in park and recreation, equity of asset and program delivery across the system, and operation and maintenance needs.

16. What happens if the MPRB gets more funding?
If the MPRB gets additional funding, it will develop and approve a new budget to reflect the increase in funding. While exact expenditures will depend on the intended use of the funding, the MPRB would seek to accelerate its implementation of capital improvements as guided by RecQuest and park master plans. These plans will consider several factors including facility condition, trends in park and recreation, equity of asset and program delivery across the system, and operation and maintenance needs. Depending on the intended purpose of the funding, the MPRB may also enhance services, programs, operations and maintenance in several areas related to neighborhood parks.

17. Will the need for more staff to design and construct improvements, and operate, program and maintain the neighborhood park system be included in the discussion?
Yes, the discussion of funding needs will include consideration of impacts to staffing to design and construct improvements, and operate, program and maintain the neighborhood park system.

18. Will the funding needed to maintain and operate the parks and assets in the parks be included in the discussion?
Yes, the discussion will include consideration of the funding needed to maintain and operate the parks and assets in the parks.
19. Will my taxes increase?
The level of tax increase will be dependent on the level of funding that the MPRB decides to request. In 2015 dollars, every 1% increase in property taxes generates $517,748 in revenue. A 1% increase in property tax is equivalent to a $2 increase in property taxes for the median home valued at $181,500.

20. Would an increase in funding for the MPRB take away from other tax supported services like police, fire, waste removal, etc.?
The Board of Estimate and Taxation sets the levy limits for the MPRB and the City of Minneapolis separately. Police, fire, waste removal and other city services are impacted by changes in the levy limit set for the City of Minneapolis. A levy limit change for MPRB does not impact the services provided by the City of Minneapolis.

21. Would an increase in funding result in lower general fund support from the City to the MPRB?
It is important that if increased funding is made available to the MPRB that current funding from the City of Minneapolis remains at the same level. The MPRB will work to ensure that current funding levels from the City of Minneapolis to the MPRB remain, at minimum, at same current level.

Questions about the Closing the Gap Handouts and Calculations

22. Are ice rinks included in the numbers in the Closing the Gap handouts?
Indoor and outdoor rinks are not included in the numbers. The indoor rinks (Parade and NE Ice Arena) are not tax supported assets. The outdoor rinks are infrastructure that is placed over existing fields to provide a seasonal program. The warming rooms that serve the outdoor rinks are included in the replacement value of the recreation center and the impact to the athletic fields as a result of ice making are considered in the expected lifecycle of the athletic fields.

23. Are golf courses included in the numbers in the Closing the Gap handouts?
Golf courses are not included in the numbers, as they are not tax supported assets.

24. Are parkways and parkway lighting included in the numbers in the Closing the Gap handouts?
Parkways and parkway lighting are not included in the numbers. Parkways and parkway lighting are primarily located within the regional park system and are part of a service redesign agreement between the City of Minneapolis and MPRB. As part of the agreement, the City of Minneapolis is responsible for funding the reconstruction and repaving of the parkway system and parkway lighting. The MPRB supports the City’s work by allocating regional and some local funding to help accelerate the improvement of the parkways and parkway lighting.

25. Do the numbers in the Closing the Gap handouts include new projects or assets?
New projects or assets are those that are not currently provided within the park system. This is in contrast to the renovation or replacement of existing assets. The numbers are based on the replacement of existing assets within the park system. RecQuest and service area master plans will provide guidance on the changes in assets that will be required to meet the next generation of park users. Changes may include the replacement of an existing asset with a new type of asset or the addition of a new asset into the system. These planning processes will provide information about how asset changes will impact the funding gap.

26. Do the numbers include the cost of operating and maintaining the parks?
The numbers include the capital funding needed to replace the existing assets within the park system as well as the funding needed to close the gap between existing operations and maintenance levels and recommended levels based on park and recreation best practices.

27. What are the average lifecycles that were used for the assets in the neighborhood parks?
Within each park there are several assets, such as a playground, recreation center, paths, sidewalk, wading pools, etc. Each of these assets has a lifecycle or useful life for which it can be expected to provide good quality service to park visitors. This lifecycle is based primarily on the materials from which it is built. Below are the average lifecycles of the most common assets within the neighborhood park system.

WELCOME!

What do you think?

The **Minneapolis Park & Recreation Board** is taking a close look at the condition of our downtown parks as well as our internal operations: how parks are maintained; what fields, courts, and other amenities are being used and how much; what all that use costs; and where we might consider new parks. Once complete, the **Downtown Service Area Master Plan** will help guide future investments to make the most of Downtown Minneapolis’ recreation opportunities, and is a part of a larger effort to prepare master plans for all five service areas of Minneapolis (South, Downtown, Southwest, North, and Northeast) over the next five years. This project is **in partnership with the City of Minneapolis’ Downtown Public Realm Framework Plan**, which will guide future improvements to the Downtown Minneapolis experience.

Visit [www.minneapolisparks.org](http://www.minneapolisparks.org) to find out more, or scan the following QR code with your smartphone to go directly to the project page.
What is your relationship with Downtown Minneapolis?

Choose all that apply:

- Student
- Employee/Employer
- Visitor
- Resident
What brings you downtown to have fun, play or enjoy yourself?

Select the two (2) responses that are most important:

- Already here for work, school or home
- Attending a sports event
- Attending a cultural or performing arts event
- I like the energy and variety of things to do
- Unique locations and experiences
What would you like to see happening in parks and public spaces downtown?

Select the two (2) responses that are most important:

- Resting or people watching
- Outdoor eating
- Fitness classes or organized activities
- Playing games (chess, bocce, hacky sack, Scrabble)
- Learning about art, history or culture
- Markets or vending
- Festivals and events
- Seeing or making art, dance or music
- Winter activities
- Other (Write in your response)
How long would you travel to a favorite park or activity downtown?

Select one (1) response:

- Less than 2 minutes
- 2-10 minutes
- 10-15 minutes
- 15-30 minutes
- More than 30 minutes
When are you most likely to visit a park or spend time outdoors downtown?  
Select the two (2) responses that are most likely:

- early in the morning, before work/school
  - Mon-Fri, 5am-9am
- mid-morning
  - Mon-Fri, 9am-11am
- lunch time
  - Mon-Fri, 11am-1pm
- mid-afternoon
  - Mon-Fri, 1pm-5pm
- after work
  - Mon-Fri, 5pm-7pm
- evening
  - Mon-Fri, 7pm-10pm
- weekend morning
  - Sat-Sun 5am-11am
- weekend afternoons/evenings
  - Sat-Sun 11am-10pm
What activity/activities would you like to see added to downtown’s parks and public spaces?

Write your answer on a post-it note:

2: Youth and Adult

How much of our parks should offer facilities for youth and how much should they offer facilities for adults? Place a dot to show the type of park you prefer.

¿Cuántos de nuestros parques deben ofrecer facilidades para los jóvenes y cuántos deben ofrecer facilidades para adultos? Coloque un punto para mostrar el tipo de parque que usted prefiere.
3: Environment

Should we build parks that are more environmentally sustainable, even if it costs more? Place a dot to show how much we should spend money on sustainability.

¿Debemos construir parques que sean ambientalmente más sostenibles, aunque cuesten más? Coloque un punto para mostrar cuánto debemos gastar en la sostenibilidad.
Attachment G. Posters for South Service Area Master Plan

4: Athletic Facilities

Should parks have all specialty fields that are made for one kind of sport, or all multipurpose fields, or somewhere in between? Place a dot to show the type of park you prefer.

Miyo tafay in Park yadda loo qaabeyso xuudaysin loogu talo galay hal ciyaar oo kaleys, ama xarumo ciyaar oo kaladuwan ah ama wax u dheereysa? Ku dhig calaamada tsasaysa nooca Park-kaaad siibto.

Las parques deben tener campos de especialidad que se hacen para un tipo de deporte, o todos los campos deben tener usos múltiples, o en algún lugar en el medio? Coloque un punto para mostrar el tipo de parque que usted prefere.
Help plan for the future of the neighborhood parks in Minneapolis! The Minneapolis Park and Recreation Board (MPRB) invites you to take 15 minutes to complete the following survey. Your responses will help us understand how residents and park visitors prioritize investments in neighborhood parks, and the community’s park and recreation needs. Please take to complete the following survey by September 30, 2015. The survey is also available at www.minneapolisparks.org/ClosingtheGap.

Before you start, here is a description of a neighborhood park
The Minneapolis park system includes neighborhood and regional parks. Neighborhood parks are typically small in size, 6 blocks or less, and include assets (playgrounds, recreation centers, wading pools, athletic fields, etc.) used primary by the neighborhood or community near it. Funding for investments in neighborhood parks is available only through local property tax revenues. Regional parks are owned, operated and maintained by the MPRB, but they are also designated as part of the Metropolitan Council System of Regional Parks and Trails. These parks are usually large in size, often over 100 acres, and contain most of the natural areas in the Minneapolis park system. These parks serve people that live in our region as well as Minneapolis residents. As such, funding for investments in regional parks is provided through local property tax revenues, as well as by the Metropolitan Council and state and federal funding sources.

### 1. Of the following assets provided in neighborhood parks, how would you prioritize investments? (Circle one: 1=Not important at all; 2=Not important; 3=Somewhat important; 4=Very important)

<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>
7. Is anything else needed at the recreation centers that you visit? Please consider the following items and select three that you most want to see in the parks.

- Gymnasium
- Fitness space
- Concessions
- More drop-in activities
- A greater variety of programs
- More low cost or free programs
- Transportation to the center
- Center open at more convenient days or times
- More staff
- Staff who speak my language
- Better maintenance
- Newer facilities/remodeling
- More child care programs
- More programs for children
- More programs for teens
- More programs for adults
- More programs for seniors
- Other: Please specify_____________

8. Please indicate your level of support or opposition to the following funding methods. (Circle one: 1=Strongly Oppose; 2=Oppose; 3=Support; 4=Strongly Support)

<table>
<thead>
<tr>
<th>a. Increasing property taxes to maintain the current level of service, programs or assets provided by the MPRB.</th>
<th>Strongly Oppose</th>
<th>Strongly Support</th>
<th>Do Not Know</th>
</tr>
</thead>
<tbody>
<tr>
<td>b. Increase property taxes to increase or enhance the current level of service, programs or assets provided by the MPRB.</td>

Closing the Gap: 
Investing in Our Neighborhood Parks

An initiative of the Superintendent and Commissioners to share information with Minneapolis residents and partners about the current condition and service level of neighborhood parks, and gather information about investment priorities for replacement, operating and maintenance of existing park assets.

**Challenge: Taking Care of What We Have**

- Neighborhood parks have greatest number of physical assets that require greater resources to operate, maintain and replace failing assets
- Park Board lacks sufficient resources to properly maintain, repair and replace all of its existing assets and provide public services at the current level
- Annual operating and maintenance budgets for neighborhood parks are behind by over $2 million just for mowing, trail repair, roof repairs and building maintenance
- From 2003-2012, the workforce was reduced by 136 full-time positions (23 percent); since 2013 Park Board has recovered 8 percent of the previously lost positions
- Park Board currently invests $4 - $5 million annually in neighborhood infrastructure replacement and improvements; however, current level of park assets requires $14.3 million and this funding gap will increase annually with inflation
- From 2000-2015, the funding gap for repairing and replacing aging and failing neighborhood park assets has grown to $111 million
- Unless the replacement and preventative maintenance costs associated with the park system’s infrastructure are addressed, the backlog and costs will continue to increase, and the funding gap will grow an additional $46 million from 2016-2020
- Challenge not unique to Minneapolis; issue being faced by urban park systems throughout country

**Proactive Steps: Addressing Funding Gap & Long Term Sustainability**

- 2012-2014 Improvements in operating efficiencies results in annual savings of $2.3 million
- 2015 McKnight Foundation grant to engage urban park leaders throughout country to learn what they are doing to address this challenge in their cities, and to engage Minneapolis residents and stakeholders in developing a plan to address funding challenges
- Educate residents on neighborhood park conditions and survey them on funding gap solutions

**Community Information Sharing**

- Multiple meetings in each quadrant of city; meetings scheduled 15-30 days in advance:
  - June – North Minneapolis
  - June/July – Southwest Minneapolis
  - July/August – South Minneapolis
  - August/September – Northeast/Souththeast Minneapolis
  - September – Citywide
- Schedule at www.minneapolisparks.org/closingthegap
- To request a meeting modification in order to participate, contact Emily Wolfe at ewolfe@minneapolisparks.org or 612-230-6415 in advance of the meeting
- Fact sheets, survey and park profile sheets available online and in recreation centers:
  - Survey to assess community funding priorities for replacement, operating and maintenance of existing neighborhood park assets
  - Park profile sheets show existing funding gaps (profiles for parks with most assets produced first and available according to meeting schedule; profiles of remaining parks available in September)

**Timeline and Next Steps**

- May - October: Community information meetings and survey
- Fall - Winter: Report to Board with decision by Board by December 2015

**For More Information**

- Subscribe to receive updates and meeting notices at www.minneapolisparks.org/subscribe then select the “Closing the Gap” topic in the “Planning” section
- Email closingthegap@minneapolisparks.org or call the hotline, 612-313-7789

**Neighborhood Park Fast Facts**

- **157** Neighborhood parks
- **6 million** Estimated annual neighborhood park visits
- **9,000** Activities (programs, events, etc) offered annually
- **ASSETS INCLUDE:**
  - 7 Athletic fields – artificial turf
  - 390 Athletic fields – natural turf multipurpose
  - 64 Basketball courts
  - 49 Buildings – Recreation centers
  - 48 Buildings – Non-recreation centers
  - 48 Parking lots
  - 112 Playgrounds
  - 121 Tennis courts
  - 63 Wading pools
  - 2 Water parks

Numbers reflect current records and may change. Neighborhood Park operations, maintenance and replacement of existing assets funded through property taxes. For every dollar residents pay in property taxes, eight cents goes to Park Board.

Fast Facts do not include data about Regional Parks that annually serve more than 21 million visitors from throughout the metro region and are eligible for state, regional and federal funding for park improvements.
Attachment J. Budget Sheet I

Closing the Gap
2015 BUDGET

Revenues

Property Taxes $ 50,994,300
Enterprise $ 9,304,955

Capital Projects $ 11,462,000
City Management Fee, Contributions and Other $ 2,288,329
Debt Service $ 1,213,537

Total Expenditures $ 87,691,522

Capital Program Overview

The Minneapolis Park and Recreation Board’s 2015 Capital Improvement Program includes improvements for regional and neighborhood parks.

Funding Sources

Capital improvements in the Minneapolis Park system are funded by several sources. Each source has specific funding requirements and limitations. The funding sources below are categorized by those used to fund neighborhood parks and regional parks.

Projected Neighborhood Park Funding Source
Net Debt Bonds $ 2,500,000
Pay as You Go – Capital Levy $ 1,500,000
Pay as You Go – Additional $ 1,030,000

Total $ 5,030,000

Projected Regional Park Funding Source
Metropolitan Council/Regional Parks $ 1,810,000
Parks and Trails – Legacy $ 3,246,000
Lottery in Lieu $ 1,395,000

Total $ 6,450,000

Superintendent’s Office

**Leadership, vision, direction**
The Superintendent’s Office is responsible for the executive management of the highly diverse services and operations of the Minneapolis Park and Recreation Board. The Superintendent provides leadership and vision, implements Board policy, and crafts strategic and financial planning objectives. The Superintendent serves as an ambassador to the community and to other governmental agencies. The Superintendent’s Office oversees communications and marketing; community outreach; and park safety and security.

Planning Services

**Developing the system**
Planning Services provides expertise to lead, advise and guide the development and redevelopment of the Minneapolis Park system. The division oversees park system research and analysis, community engagement for park planning and design, park master planning, real estate services, design and engineering, physical development and redevelopment, and construction permitting.

Recreation Services

**Providing visitor activities**
Recreation Services provides expertise to lead, provide and create affordable recreational, cultural, educational, and leisure opportunities to benefit and enhance the lives of all Minneapolis residents. The division oversees recreation facility operations, including recreation centers, golf courses, aquatic facilities and beaches, ice arenas, cross-country skiing venues, and Wirth Winter Recreation Complex; recreation, education, and interpretive programming; and athletic fields and complexes.

Environmental Stewardship

**Caring for the system**
Environmental Stewardship provides expertise for the care and maintenance of the park system. The division oversees the maintenance of the Minneapolis Park system’s physical infrastructure; equipment and fleet; natural areas and water resources; forestry; volunteer coordination; and environmental education.

### Attachments

- **Communication:** 72,355 email subscribers, 2.2 million annual website visits
- **Community Policing:** 9,200 calls for service, 5,600 visits to rec centers, 400 special events

### Numbers current as of December 2014

- **Miles of city streets arborists plant and maintain trees:** 1,100
- **Acres mowed or maintained:** 3,597
- **AIS boat inspections:** 8,800
- **Participations:** 15,000 Neighborhood Naturalist participants, 70,000 Eloise Butler Wildflower Garden visitors
- **MPRB event participants:** 104,000 attended events, 85,500 listened to concerts, 31,583 watched movies
- **Permits processed:** 8,500 parking, 7,387 dog park, 1,054 picnic, 260 photo, 180 wedding, 170 event permits
- **Technology increases:** 10 Terabytes disc space storage, 40 Megabytes faster connection to City

### Renovations Completed or Underway

- **Four playgrounds, three athletic fields, one recreation center, 3.5 miles of trail repaved, 4.5 miles parkway resurfaced**
- **Park Plans Completed or Underway:** five master plans, three activity plans, two service area plans

### Sport team participants

- **6,910 youth, 28,900 adults**
- **Non-sport recreation center class participants:** 208,481
- **Golf rounds played:** 95,000
- **Cross-Country Ski Passes sold:** 4,500
- **Rec Plus locations:** 19
- **Athletic facility rental permits issued:** 200 permits to 150 organizations, for 6,000 games

### MPRB employees

- **486 full-time, 1,288 temporary**
Park Board Operating Budget (General Fund)
The Park Board Operating Budget provides resources to fund programs and services to maintain neighborhood parks, natural resources and the urban forest and provide recreational opportunities and park safety. The 2015 Revenue and Expenditure budget is $68.2 million.

Operating Budget Revenues (General Fund)
Property Tax
The Park Board levies a set dollar amount of property taxes each year that is collected from property owners in the City based on the type and value of their property.

Local Government Aid
LGA is funding from the State of Minnesota that cities across the state, including Minneapolis, receive. The City of Minneapolis then transfers a portion of its LGA to the Park Board.

Fees, Fines and Other Revenue
These revenues include items such as recreation center program fees, adult sports, grants, donations, off-leash permits, parking and traffic citations, etc.

Operating Budget Expenditures (General Fund)
Wages and Fringe
The majority of Park Board operating expenditures support full and part-time staff wages and fringe benefits.

Operating
These expenditures include equipment, utilities, contracts and supplies.

Capital
The operating budget transfers funds to capital projects for neighborhood park rehabilitation and improvements.

Park Board Enterprise Fund
The Park Board Enterprise Fund includes business-type activities that are fully supported by revenue from the business activities. Profits from the Enterprise Fund activities are used for capital rehabilitation, construction, improvements or debt service. The 2015 revenue budget is $9.3 million and expense budget $9.1 million

Tree Preservation and Reforestation Fund
The Tree Preservation and Reforestation Fund accounts for a special property tax levy to address threats to the urban forest due to Emerald Ash Borer and tree loss due to storms. The amount of the tax levy in 2015 is $1.5 million, which supports the removal of 5,000 ash trees and planting of replacement trees in 2015.
Pressures on Park Board Operating Budget and Capital Funding

The Park Board has set a target of transferring $5 million annually from the operating budget to fund neighborhood park capital improvements. Due to rising operating expenses and service delivery demands this target has not been reached. In 2015 $2.5 million will be transferred from the operating budget to fund neighborhood park capital improvements.

Revenue Pressures

Local Government Aid
Local Government Aid (LGA) has been an unpredictable funding source. State budget deficits resulted in substantial reductions of local government aid between 2008 and 2011. Actions taken by the State to balance the State budget from 2008 through 2011, resulted in a loss of $8.5 million in certified state aids to the MPRB General Fund. MPRB LGA funding stabilized in 2012, with the certified amount substantially lower than past years.

Property Tax
Park Board Commissioners set an annual tax levy weighing Park Board’s funding needs with citizen’s desires for services and ability to pay, and economic conditions. Over the last ten years the average increase in the Park Board property tax levy was 3.7 percent.

Rising Costs

Over the last ten years Park Board health insurance premiums have increased 68%, energy costs 38% and pension contribution rates 25%. Over this period inflation has only increased by 18%. These costs in excess of inflation have directly reduced the amount of funding available for programs and services.

Operational Gaps

Park attendance, usage, and demand for enhanced programs and services have all been increasing, while at the same time budget reductions were enacted to manage funding shortfalls and rising expenses. These budget reductions have contributed to increased operational and capital funding gaps in the Park system.

From 2003-2012, the workforce was reduced by 136 full-time positions (23 percent); since 2013 the Park Board has been able to add 28 full-time positions back to the workforce.

Below are examples of operational gaps in the park system:

<table>
